Course Name : Diploma in Electronics
Semester : I
Subject name : Elements of Electronics
Subject Code : DE 1001

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | |
|---|----------|---------------------|--------|---|-------------------|--------------------------------|---------------------------|
| Theor y (HRS) | Tutorial | Practica l (HRS) | Credit | Semester Exam Duration (TH/PR)Hours | Internal Marks | Semester Exam Marks (TH) | Total Marks (TH/PR) |
| 3 | 0 | 2 | 4 | 2 | 50 | 50 | 100 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | |

Note :- (Make changes as per your subject requirement)

1. Theory period is of 60 minutes and Practical Sessions is of 120 minutes
2. Minimum 40% marks are needed for passing in internal and semester examinations

3. Internal marks

| | |
|--------------------------------|----------|
| Project based Assignments (TW) | 25 Marks |
| Practical Lab | 10 Marks |
| Practical Skill Test | 15 Marks |
| Total | 50 Marks |

4. Semester Examination (Theory)

Theory semester examination includes a two hour theory paper of 50 marks.

5. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
6. It is mandatory to appear for semester theory examination and skill tests. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignment and Laboratory experiment will not be declared successful for that examination head.
7. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

(Direct Second year admitted students need to complete only Term Work (TW) of 25 Marks i.e Project Based Assignments as per their eligibility)

Rationale: Elements of Electronics intends to teach students about the different material required for manufacturing of electronic components. The students will learn the

properties of materials and their compositions. They will understand the principle of working of electronics components and get the ability to practically use them in circuits. Fabrication technologies for PCBs, single sided, double sided, multi-layer and flexible, etc. PTH technology for finishing of PCBs, screen printing and photographic methods for PCB-artwork will be studied in detail.

Course Outcomes: On successful completion of course, students will be able to :

1. Identify different components and their characteristics..
2. Learn different properties of material used in electronics.
3. Make Use of material for specific component
4. Design and make of PCBs with component testing

Learning Structure

| | |
|-------------|---|
| Application | Applications of component and materials in the field of Electronic engineering |
| Procedure | Identification of components ,study of characteristics ,Fabrication Testing of PCB |
| Principle | Principal of working of Electronics Components Material and characteristics behavior of each |
| Concepts | Permittivity, Permeability ,Hysteresis loop Electromagnetic Domain Integrated Circuits Florescent and phosphorescent materials |
| Facts | Electronics Components, material and their Properties. Conductor Material, Resistance material ,Photoelectric Material s etc |

Course Contents

THEORY

| Unit | Chapter | Topic and Details | No. of Lectures assigned |
|------|---------|---|--------------------------|
| I | 1 | Materials and their properties | |
| | | Conductor materials: Pure metal & alloys conductivity and mechanical strength, super conductivity materials | 4 |
| | | Resistance materials: pure metals and alloys carbon and ceramic specific resistance temperature coefficient of resistance | 6 |
| | 2 | Rectifying materials: metallic pairs, rectifying ratio and peak inverse voltage. | 2 |

| | | | |
|-----|---|---|----|
| | | Thermocouple material: thermoelectric effect, thermoelectric series. | 4 |
| | 3 | Photoelectric, photo-emissive and photo-conductive phenomenon and devices, photo voltaic cell, piezoelectric materials, florescent and phosphorescent materials | 4 |
| II | 4 | Magnetic materials: Electromagnetic domain theory, Ferromagnetic metals and alloys, soft and hard magnetic materials, rectangular magnetic characteristic materials, ferro cube, permittivity and permeability, hysteresis loop, effect of air gap on hysteresis loop. | 4 |
| | 5 | Insulating materials: Cellulose, plastic glass, ceramic, liquids, compounds, quartz, inert gasses, permittivity, Di-electric strength and power factor, FeO ₂ , ferrite materials, dielectric amplifiers | 4 |
| III | 6 | Components for Electronics: Resistors, capacitors, inductors, choke coils, transformers, permanent magnets, electromagnets, mechanical switches, solid state switches, connectors, electromechanical relay, solid state relay, diodes, SCR, Integrated Circuits, transistors, dry cell, storage batteries (accumulators). DISPLAYS : Seven Segment LED Display, Dot Matrix LED Display, Liquid Crystal Display | 12 |
| IV | 7 | Fabrication technology and testing: Fabrication technologies for PCBs, single sided, double sided, multi-layer and flexible, etc. PTH technology for finishing of PCBs, screen printing and photographic methods for PCB-artwork, | 5 |

*Note: Number of units should be equal to number of credits

PRACTICALS

| Sr. No | Course Outcome | Laboratory Activities | No. of Hrs assigned |
|--------|----------------|--|---------------------|
| 01 | CO1 | Study of Resistors (Types, Size and Wattage etc.) | 1 |
| 02 | CO1 | Study of Capacitors (Types, Leads orientation and Face Value etc.) | 1 |
| 03 | CO1 | Perform inductor characteristic and its Types | 1 |
| 04 | CO1 | Study of performance of Transformers | 2 |
| 05 | CO2 | Study applications of switches Mechanical Switches and Rotary switches | 1 |
| 06 | CO2 | Study of electromagnetic Relay | 1 |
| 07 | CO2 | Study of Diodes (Appearance, Types and applications.) | 1 |

| | | | |
|----|-----|---|---|
| 08 | CO1 | Study performance characteristics Zener Diodes | 1 |
| 09 | CO2 | Study of Bipolar Junction Transistors (Appearance, PNP and NPN types) | 1 |
| 10 | CO3 | Study of Light Emitting and Photodiodes. | 1 |
| 11 | CO3 | Study of LDR, Photo-cell and Solar Cell | 1 |
| 12 | CO3 | Study of Semiconductor Device Naming (Coding) Methods | 1 |
| 13 | CO3 | Study of different Connectors | 1 |
| 14 | CO4 | Soldering Techniques | 1 |
| 15 | CO4 | Performing soldering to prepare mini project | 1 |

PROJECT BASED ASSIGNMENTS

| Unit No | Course Outcome | Details | Marks |
|---------|----------------|--|-------|
| I | CO1 | Write properties of different material used in electronics | 2 |
| | CO2 | Test resistance of different metals and compare as conductors | 2 |
| | CO1 | Make a chart of components. | 2 |
| II | CO2 | Do magnetization of ferromagnetic substance and study the magnetizing core. | 2 |
| | CO4 | Compare magnetic strength of given magnetic material with the help of an electromagnet | 2 |
| | CO2 | Measure insulation resistance using Merger | 2 |
| | CO2 | Make a Chart of insulator | 2 |
| III | CO3 | Make coils of different sizes and study their inductance | 2 |
| | CO3 | Make chart of different types of diode | 2 |
| | CO3 | Make chart of different types of batteries | 3 |
| | CO4 | Convert a given circuit into a solder side layout for PCB | 4 |

Skill Test

| Unit No | Course Outcome | Details | Marks |
|---------|----------------|---|-------|
| I | CO4 | Prepare a small PCB and perform soldering by placing components | 15 |

Examination/Assessment Scheme:

| Question | Q1 | | | | | Q2 | | Q3 | | Q4 | | Q5 | |
|---------------------|----|----|---|---|---|----|----|----|---|----|---|----|----|
| Sub-Question | A | b | C | d | E | a | b | A | B | a | B | a | B |

Course Name : Diploma in Electronics
Semester : I
Subject name : Electronics Workshop and Engineering Drawing
Subject Code : DE 1002

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | |
|---|----------|-----------------|--------|----------------------------------|----------------|--------------------------|---------------------|
| Theory | Tutorial | Practical (HRS) | Credit | Semester Exam Duration (PR)Hours | Internal Marks | Semester Exam Marks (PR) | Total Marks (TH/PR) |
| 0 | 0 | 8 | 4 | 2 | 50 | 50 | 100 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | |

Note :- (Make changes as per your subject requirement)

1. Only Practical Sessions of 120 minutes each
2. Minimum 40% marks are needed for passing in internal and semester examinations

3. Internal marks

| | |
|---------------------------|----------|
| Project based Assignments | 25 Marks |
| Practical Lab | 10 Marks |
| Practical Skill Test | 15 Marks |
| Total | 50 Marks |

4. Semester Examination (Practical)

practical semester examination includes a two-hour practical performance of individual student 50 marks.

5. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
6. It is mandatory to appear for semester practical examination and skill tests. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignment and Laboratory experiment will not be declared successful for that examination head.
7. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

Rationale:

Electronic workshop is a Foundation course and plays an important role in the field of electronics for technicians. This course is intended to teach the students the use of different tools, PCB making, simple household wiring etc. Students are also provided training of soldering and De-soldering of electronic components on printed circuit board along with it develop basic understanding, application of engineering drawing. It covers knowledge & application of drawing instruments to draw engineering drawing in electronic aspects. The curriculum aims at developing the ability to draw and read various drawings, used in electronic workshop.

Course Outcomes: On successful completion of course, students will be able to :

- 1 Draw different engineering curves and identify their applications
- 2 Draw Orthographic and Isometric Projection of different objects
- 3 Design and develop layout of PCB with fabrication.
- 4 Acquire hands-on experience in soldering.
- 5 Selection of material, Tools, & Equipment for the process of Cutting, Drilling, fitting job works
- 6 Prepare the job for confirming desired dimensions and shape

Learning Structure

| <u>For Electronics workshop (EW)</u> | |
|---|--|
| Application | Develop the electronic circuit on PCB. |
| Procedure | Circuit Drawing, cutting, Mounting and Soldering, Measurement and testing using multimeter |
| Principles | Manual, Pattern Transfer, Etching, Drilling, earthing, fitting, carpentry |
| Concept | Units/symbols, Multi meter, CRO, workshop tools |
| Facts | Resistors, capacitors, Inductors, PN junction diode, BJT transistor, Multi meter, CRO, Tools used in Electronics workshop. |

| <u>For Engineering Drawing (ED)</u> | |
|--|---|
| Application | visualization, interpretation and drawing of curves, Draw orthographic projections, and isometric views of simple objects. |
| Procedure | Read, understand, visualize, interpret and draw engineering Curves, orthographic and isometric views. |
| Principles | Orthographic projection by 1st angle method, Isometric Projections |
| Concept | Reference planes , projections, isometric axis & Scale, locus of points, convention of lines, polygon, Dimensioning, |
| Facts | Various objects, geometric entities, line, arc ,circle, drawing instruments |

Course Contents
Practical

| Unit | Chapter | Topic and Details | No. of hours |
|----------------------------|----------------|---|---------------------|
| ENGINEERING DRAWING | | | |
| I | 1. | Basic Concept of Engineering Drawing 1.1 Basic Graphical Techniques 1.2 Drawing Instruments and its Uses 1.3 Convention of lines and their applications 1.4 Dimensioning technique | 4 |
| | 2. | Engineering Curves 2.1 Conical Sections 2.1.1 Ellipse, parabola, Hyperbola 2.2 Cycloid Curves 2.2.1 Cycloids 2.2.2 Epicycloids 2.2.3 Hypo Cycloids | 6 |
| | 3. | Orthographic Projections 3.1 Introduction to Orthographic projections 3.2 Conversion of pictorial view into Orthographic Views (First Angle Projection Method Only) – elevation, plan and end view | 10 |
| | 4. | Isometric Projections 4.1 Isometric scale, comparison of true scale with isometric scale | 10 |

| | | | |
|-----------------------------|----|---|----|
| | | 4.2 Conversion of orthographic views into isometric View / projection | |
| ELECTRONICS WORKSHOP | | | |
| 2 | 5. | Measurement of AC and DC Quantities: 5.1 Current 5.2 Voltage 5.3 Resistance 5.4 Capacitance 5.5 Inductance 5.6 Amplitude 5.7 Frequency | 4 |
| | 6. | Circuit Drawing and Soldering 6.1 Drawing of simple regulated power Supply 6.2 Building the circuit on breadboard 6.3 Mounting and Soldering of Components on GPB 6.4 Testing of circuit using multimeter 6.5 PCB Fabrication Techniques Printing layout on board, photo etching and masking process | 22 |
| | 7. | Safety and Precautions 7.1 General Safety Measures 7.1.1 Safety Precautions for electronics 7.1.2 Earthing | 4 |
| WORKSHOP PRACTICE | | | |
| 3 | 8. | Workshop practice 8.1 Introduction to workshop 8.1.1 Sketch general workshop layout. 8.1.2 Follow preliminary safety rules in workshop 8.2 Fitting 8.2.1 Select appropriate fitting tools for the required application 8.2.2 Prepare the simple jobs as per specification using fitting tools 8.3 Carpentry 8.3.1 Select appropriate carpentry tool for the required application. 8.3.2 Prepare the simple job as per specification using carpentry tools | 60 |

PRACTICALS –LABORATORY WORK
ELECTRONIC WORKSHOP AND ENGINEERING DRAWING

| Sr. no | Course outcome | Laboratory Activities | No. of Hrs. assigned |
|-----------------------------|----------------|--|----------------------|
| ENGINEERING DRAWING | | | |
| 1 | CO1 | Geometrical Constructions draw the following figures with dimensions-Rectangle, circle, pentagon, hexagon | 4 |
| 2 | CO2 | Engineering curves To draw a cycloid, epicycloids, hypocycloid | 6 |
| 3 | CO2 | Two objects by first angle projection method | 10 |
| 4 | CO2 | Isometric views of two objects | 10 |
| ELECTRONICS WORKSHOP | | | |
| 5 | CO4 | Introduction to lab equipment General Safety Measures and Precautions. | 4 |
| 6 | CO3 | Measure AC & DC Voltage & Current and Resistor using Digital and Analog Multimeter | 4 |
| 7 | CO4 | Introduction and Demonstration of soldering and disordering tools like normal soldering gun, soldering metals, soldering flux, soldering pot, Disordering gun, disordering pump, disordering mesh. | 8 |
| 8 | CO3 | Fabricate the PCB by pattern transfer, etching, cleaning and drilling Mount & solder the components on PCB And Testing of soldered PCB for continuity using multimeter | 14 |
| WORKSHOP PRACTICE | | | |
| 9 | CO5 | Study of measuring instruments and gauges | 4 |
| 10 | CO5 | Demonstrate use of different Carpentry tools 1. Observe operation of different carpentry tools and different Wood working processes like sawing, planning, marking, Chiselling, grooving and wood turning. | 12 |
| 11 | CO6 | Job- Practice carpentry Prepare one simple job involving any one joint like mortise and Tenon, dovetail, bridle, half lap etc | 16 |
| 12 | CO5 | Demonstrate use of different fitting tools 1. Observe different fitting, power tools and drilling machine. 2. Observe different operations in fitting shop like chipping filing, making, drilling, cutting, tapping. | 12 |
| 13 | CO6 | Job- Practice fitting Prepare one simple job involving practice of chipping, filing, Drilling, tapping, cutting etc. | 16 |

PROJECT BASE ASSIGNMENTS

| Sr. No | Course outcome | Assignments | Marks |
|----------------------------|----------------|--|-------|
| ENGINEERING DRAWING | | | |
| 1. | CO1 | Geometrical Constructions and Engineering curves | 2 |
| 2. | CO2 | Orthographic projections | 2 |
| 3. | CO2 | Isometric projection | 2 |
| ELECTRONIC WORKSHOP | | | |
| 4 | CO3 | Study of Electrical Symbols and Electronic Circuit Symbols Are Used For Drawing Schematic Diagram. | 2 |
| 5 | CO3 | Procedure of Fabrication of PCB | 2 |
| 6 | CO4 | Mounting, Soldering and Testing on GPB | 3 |
| WORKSHOP PRACTICE | | | |
| 7 | CO5 | Assignment on different Carpentry Tools and Materials | 6 |
| 8 | CO6 | Assignment on different Fitting Tools and Materials | 6 |

SKILL TEST

| Sr. No | Course outcome | Topic | Marks |
|--------|----------------|---|-------|
| 1 | CO1,CO2 | geometrical constructions, orthographic, isometric view of given object | 4 |
| 2 | CO3,CO4 | Mounting, Soldering and Testing for a given circuit on Prepared PCB during practical session. | 4 |
| 3. | CO5,CO6 | Preparation of Box casing for Power supply | 7 |

Examination/Assessment Scheme:

TERM WORK AND FINAL PRACTICAL EXAM: - 100 MARKS

Total (Internal & External) Course Outcome Weight-age Scheme :

| S.No. | Practical Lab (10 Marks) | Project Based Assignments (25 Marks) | Skill Test (15 Marks) | Final PR exam | Weightage% (Total)x100 |
|-------|--------------------------|--------------------------------------|-----------------------|---------------|------------------------|
| C01 | 1 | 02 | 4 | 12 | 25 |
| CO2 | 2 | 04 | | | |
| CO3 | 1 | 04 | 4 | 13 | 27 |
| CO4 | 2 | 03 | | | |
| CO5 | 2 | 06 | 7 | 25 | 48 |
| CO6 | 2 | 06 | | | |
| Total | 10 | 25 | 15 | 50 | 100 |

***Note:** Number of assignments should match with the number of lectures/practical

- 1) Students can use the A3 size sketchbook for class works.
- 2) Use approximately 570mm×380mm size drawing sheet for term work

5. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
6. It is mandatory to appear for semester theory examination and skill tests. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignment and Laboratory experiment will not be declared successful for that examination head.
7. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

(Direct Second year admitted students need to complete only Term Work (TW) of 25 Marks i.e Project Based Assignments as per their eligibility)

1. Rationale:

Basic mathematics intends to teach students basic facts, concepts principle and procedure of mathematics as a tool to analyze engineering problems and as such it lays down foundation for the understanding of electronics subject. This subject also improves logical and analytical skills in students. The concept of logarithms helps to understand logarithmic functions and Exponential functions. This helps to solve problems in differentiation and integration. Binomial theorem is used to find expansions of algebraic expressions. This has uses in further study of mathematics as well as statistics. Determinants help to find solutions of simultaneous equations. This has wide applications in engineering. Trigonometry is the study of triangles, its sides and angles. It defines trigonometric functions which are widely used in calculus. This helps to understand Periodic functions. Co ordinate geometry is the study of geometry using co ordinate system. It is widely used in physics and engineering. It lays the foundation of discrete and computational geometry

3. Course Outcomes:

1. Apply properties of logarithms to simplify logarithmic functions.
2. Determine the binomial expansion of algebraic functions.
3. Assess trigonometric ratios of allied angles, compound angles, multiple and sub multiple angles
4. Solve simultaneous equations in three variables using Cramer's rule and matrix method.
5. Identify and formulate equations of straight lines and circles.

Learning Structure

| | |
|--------------------|--|
| Application | Apply equations and mathematical methods of Logarithms, Binomial theorem, Determinants, Matrices, Trigonometry and Co-ordinate Geometry to solve engineering problems |
| Procedure | Mathematical calculation using Logarithms, Technique of using Determinant and matrix method Finding the Approximate value using Binomial expansion Evaluation of trigonometric ratios of compound angles Finding the required equation of a line and circle using given conditions |

| | |
|------------------|--|
| Principle | Properties of logarithms, Common and natural logarithms, value of a determinant, Binomial expansion of algebraic expression Fundamental identities, compound angles, multiple and sub-multiple angles Angle between straight lines, parallel and perpendicular lines |
| Concept | Logarithm of a number, minor and co-factor of a determinant, algebra of matrices Meaning of combination, factorial notation Trigonometric ratios of all angles, Distance between points, general equation of a straight line and circle |
| Facts | Real number system, base and exponent of logarithms, Binomial expression Arrangement of numbers as determinant or matrix Angles, measurement of angles, Co-ordinate of a point in a plane, slope and intercept of a line, centre and radius |

Course Contents THEORY

| Unit | Chapter | Topic and Details | No. of Lectures |
|------|-----------|--|-----------------|
| I | 1 | 1.Logarithms 1.1 Definition 1.2 Laws of logarithms 1.3 Change of base 1.4 Common logarithm | 5 |
| | 2. | 2.Binomial Theorem 2.1: Binomial expansion 2.2: General and middle term in the binomial expansion 2.3 : Binomial theorem for fractional and negative indices 2.4 : Approximations | 7 |
| II | 3 | 3.Trigonometry: 3.1 Angles 3.2 Trigonometric ratio of any angle 3.3 Signs of trigonometric ratios 3.4 Fundamental identities 3.5 Trigonometric ratios of compound angles 3.6 Product formulae 3.7 Sum and difference formulae 3.8 Multiple and submultiples angles 3.9 Inverse trigonometric functions | 15 |
| III | 4 | 4.Determinants and Matrices: 4.1 Value of a determinant | 15 |

| | | | |
|--|---|---|----|
| | | 4.2 Second order and third order determinant 4.3 Solution of simultaneous equations using crammer's rule 4.4 Properties of determinants 4.5 Types of Matrices 4.6 Algebra Of Matrices 4.7 Multiplication of Matrices 4.8 Transpose of a Matrix 4.9 Adjoint of a matrix 4.10 solution of Simultaneous equations using inverse of a matrix | |
| | 5 | 5.Co ordinate Geometry: Straight line and circle 5.1 Distance formula 5.2 Section formula 5.3 Straight line-equations in various forms 5.4 Angle between two straight lines 5.5 Parallel and perpendicular lines. 5.6: Equation of a circle with given center and radius 5.7 General equation of a circle 5.8 Equations of tangent and normal to a circle. | 18 |

ASSIGNMENTS:-

| SR. NO | COURSE OUTCOME | ASSIGNMENTS | MARKS |
|--------|----------------|---|-------|
| 1 | CO1 | Calculate logarithms of given numbers using definition of logarithm Apply properties of logarithms to simplify the given function. Evaluate logarithms using change of base. | 5 |
| 2 | CO2 | Determine the given power of binomial expression using binomial theorem. Calculate the general term and middle term in a binomial expansion. Compute a term independent of x in a binomial expansion. Estimate the approximate value of given root of a number | 5 |
| 3 | CO3 | Evaluate the trigonometric ratios of given angles. Evaluate the trigonometric ratios of given compound angles. value of given trigonometric identities using product formulae, sum or difference formulae. Calculate the inverse trigonometric ratios of given angles | 5 |

| | | | |
|---|-----|---|---|
| 4 | CO4 | Compute the value of a third order determinant. Solve the given system of simultaneous equations in three variables using Cramer's rule. Evaluate the given determinant using properties of determinants | 5 |
| 5 | CO5 | Measure the distance between the given points Formulate equations of straight lines under the given conditions. Identify whether the given lines are parallel or perpendicular. Formulate the equation of a circle under the given conditions. Formulate equations of tangent and normal to a circle. | 5 |

SKILL TEST

| Sr. No | Course outcome | Topic | Marks |

Course Name : Diploma in Electronics

Semester : I

Subject name : Communication Skills- I

Subject Code : DE 1004

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | |
|---|----------|-----------|--------|--|-------------------|--------------------------------|------------------------|
| Theory | Tutorial | Practical | Credit | Semester Exam Duration (TH)Hours | Internal Marks | Semester Exam Marks (TH) | Total Marks (TH) |
| 3 | 1 | 0 | 4 | 2 | 50 | 50 | 100 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | |

Note :-(Make changes as per your subject requirement)

1. Theory period is of 60 minutes and Tutorial Sessions is of 60 minutes
2. Minimum 40% marks are needed for passing in internal and semester examinations
3. **Internal marks**

| | |
|----------------|----------|
| Assignments | 25 Marks |
| Open Book Test | 10 Marks |
| Skill Test | 15 Marks |
| Total | 50 Marks |

● **Semester Examination (Theory)**

Theory semester examination includes a two hour theory paper of 50 marks.

- Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
- It is mandatory to appear for semester theory examination and skill tests. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignment and Laboratory experiment will not be declared successful for that examination head. Also student has to failing which student will not
- Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

Rationale:

The most commonly used medium to express oneself is language. English, being a global language, is used in all the spheres of human life i.e., personal, professional and social. A diploma student is expected to be proficient in English language and pursue the existing course of study to handle the future jobs. The content of the text includes the aspects related to language skills.

Course Outcome: After completing semester I communication skills students will be able to

1. Implement the rules of grammar in writing
2. To develop listening and understanding the conversations in English.
3. To read and interpret the English context.

Learning Structure

| | |
|--------------------|---|
| Application | Students will be able to write articles, paragraphs, letters, and will do formal and informal written communication, they also will get fluency in spoken communication. |
| Procedure | Apply grammatical rules to form correct sentences so as to develop spoken and written communication. |
| Principle | Parts of Speech, Active and Passive Voice, Direct and Indirect sentences, Tenses, Transformation of Sentences: simple, compound and complex. |
| Concept | Grammatical rules to form correct sentence, Correct Prepositions as per context, phonology, Vocabulary Building- synonyms n antonyms, Conversation individual Presentation Group Discussion |
| Facts | Students will be able to draft letters and will do oral communication. |

Course Contents THEORY

| Unit | Chapter | Topic and Details | No. of Lectures/T U assigned |
|------|---------|--|------------------------------|
| I | 1 | 1. Writing Skills- grammar 1.1. Articles: Appropriate use of definite and indefinite Articles 1.2. Prepositions: To use correct Prepositions as per context 1.3. Conjunction: Coordinating and sub-coordinating Conjunctions 1.4. Tenses: Correct usages of past, present and future tenses | 10 |

| | | | |
|----|---|--|-------|
| | | <p>1.5. Active and Passive Voice: Use of Active and Passive voice</p> <p>1.6. Direct and Indirect sentences: Conversion of direct into indirect sentence and vice versa</p> <p>1.7. Transformation of Sentences: simple, compound and complex.</p> <p>1.8. Auxiliaries: can, shall, should, may, might</p> <p>1.9. Sentence: types, parts, clauses and infinitives</p> <p>1.10. Question type: 'Wh' and yes/no type</p> | |
| | <p>2. <u>Write-up</u></p> | <p>Write-up</p> <p>2.1. Paragraph Writing: Elaborate and expand the ideas with cohesion, coherence and use of correct punctuation marks. Importance of communication Merits of English Language Barriers in communication</p> <p>2.2. Types of Paragraph: Narrative, Descriptive, Technical, Comparison and Contrast.</p> <p>2.3. Dialogue Writing: Base on various situations.</p> <p>2.4. Speech Writing based on situations: Welcome Speech, Farewell Speech, Vote of Thanks and Introducing a Guest.</p> | 05 |
| II | 3 | <p>3 Reading Skills</p> <p>3.1. Articles: related engineering and technology.</p> <p>3.2. Comprehension Passages: Comprehending passages and writing the answers of the questions given.</p> <p>3.2.1. Words Often Confused.</p> <p>3.2.2. Collocation</p> <p>3.2.3. Prefix and Suffix</p> <p>3.2.4. Synonyms and Antonyms</p> <p>3.2.5. Root words Prefix suffix/meaning /words n term related electronics and technology with their meaning.</p> <p>3.2.6. Note taking and note making</p> | 05+10 |

| | | | |
|-----|---|---|----|
| III | 4 | 1.Speaking and Listening Skills 4.1.Conversation- day today and the on situations provided 4.2.Individual Presentation- on the given topic 4.3. Group Discussion- on current topic as well on topics related engineering. 4.4. Debate- on current topic as well on topics related engineering. (Contents: on the given current topics related to social, political, economical and subject related.) 4.5. Vowels n diphthongs in English, Reading/speaking English with proper accents and intonations. Full form of TOFEL and IELTS | 15 |
|-----|---|---|----|

TUTORIALS

| Sr. No | Course Outcome | Topic | Marks |
|--------|----------------|--|-------|
| 1 | CO1 | Enhance the topics. | 1 |
| 2 | CO1 | Develop the central idea | 1 |
| 3 | CO1 | Elaborate the phrases / idioms | 1 |
| 4 | CO1 | Summarising the passage | 1 |
| 5 | CO1 | Writing in formal letter | 1 |
| 6 | CO2 | Reading passages loudly | 1 |
| 7 | CO2 | Reading speeches for all | 1 |
| 8 | CO2 | Making enquiry by role play technique | 1 |
| 9 | CO2 | Placing an order in a restaurant | 1 |
| 10 | CO2 | Preparing responses for an interview | 1 |
| 11 | CO3 | Use technical word in written and spoken communication | 1 |
| 12 | CO3 | Writing engineering passage with its questions and answers | 1 |
| 13 | CO3 | Writing technical passage. | 1 |
| 14 | CO3 | Reading the cutting of electronics related article | 1 |
| 15 | CO3 | Writing synonyms and antonyms of routinely used words | 1 |

ASSIGNMENTS

| Unit No | Assignment No. | Details | Marks |
|---------|----------------|--|-------|
| I | CO1 | Write short notes on the topics given | 1 |
| | CO1 | Write an essay on the topics given. | 2 |
| | CO1 | Solve the mixed grammar exercise | 2 |
| II | CO2 | Write five reading comprehensive passages related to science, technology, electronics with their question and answers in Microsoft word. | 10 |
| III | CO3 | Practice listening to the phonetic sounds in English. | 2 |
| | CO3 | Practice listening to the comprehensive passages in English. | 2 |
| | CO3 | Speaking on social, economical, educational, political topics. | 3 |
| | CO3 | Making an inquiry, reply to inquiry, intro self and other situations. | 3 |

OPEN BOOK TEST

| Sr. No | Course outcome | Topic | Marks |
|--------|----------------|--|-------|
| 1 | CO1 | Do as directed mixed grammar exercise | 3 |
| 2 | CO2 | Giving conversational situations to practice. | 3 |
| 3 | CO3 | Reading texts and orally explaining the summary. | 4 |

SKILL TEST

| Sr. No | Course outcome | Topic | Marks |
|--------|----------------|---|-------|
| 1 | CO1 | Correct the sentences | 5 |
| 2 | CO2 | Making enquiries, replies to enquiry, greetings etc.. | 5 |
| 3 | CO3 | Reading passages with proper accents and intonations. | 5 |

Examination/Assessment Scheme:

| Question | Q1 | | | | | Q2 | | Q3 | | Q4 | | Q5 | |

Course Name : Diploma in Electronics

Semester : I

Subject name : Basic Science

Subject Code : DE 1005

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | |
|---|----------|-----------|--------|---|-------------------|--------------------------------------|---------------------------|
| Theory | Tutorial | Practical | Credit | Semester Exam Duration (TH/PR)Hours | Internal Marks | Semester Exam Marks (TH/PR/OR) | Total Marks (TH/PR) |
| 3 | 0 | 1 | 4 | 2 | 50 | 50 | 100 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | |

Note :-

1. Theory period is of 60 minutes and practical session is of 120 minutes.
2. Minimum 40% marks are needed for passing in internal and semester examinations.

3. Internal marks

| | |
|---------------------------|----------|
| Practical Lab | 10 Marks |
| Project based Assignments | 25 Marks |
| Practical Skill Test | 15 Marks |
| Total | 50 Marks |

4. Semester Examination (Theory)

Theory semester examination includes a two-hour theory paper of 50 marks.

5. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
6. It is mandatory to appear for semester theory examination and skill tests. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignment and Laboratory experiment will not be declared successful for that examination head.
7. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

Rationale:

The contents of this curriculum will provide knowledge of Basic science (Physics and Chemistry). The knowledge and processes used by Basic science have produced new and exciting technologies that are in everyday use. Almost any example of modern technology has its origins in mechanics, electronics, atomic structure, alloy, electrochemistry etc.

The content of the subject is designed such that the technical knowledge can be gained more effectively using concepts of Basic Science. The kind of knowledge that students receives in Basic science develops the students ability to grasp things quickly. Also they become more focused and improves their ability of problem solving.

Course Outcomes: On successful completion of course, student will be able to:

1. Measure various Physical quantities in different systems of units.
2. Apply basic concepts of Basic science for solving problems related to chemical analysis, basic electronics, etc.
3. Demonstrate application of various basic concepts/laws/principles of Basic Science in industry situations and those observed in nature.
4. Design, Construct/build , Draw, prepare& label various diagrams, tables, simple circuits, models etc.

Learning Structure:

| | |
|--------------------|--|
| Application | Apply the Acquired knowledge in the daily life i.e. related to friction , Apply the knowledge of Chemical ,Physical properties and processes in Engineering field. |
| Procedure | Effective resistance of various combination, formation of Electrovalent and Covalent Compounds, electrolysis, Faradays' Law, Classification of Alloys |
| Principles | Principal of Moment, static friction, kinetic friction etc. |
| Concept | Electric field, electric lines of force . Isotopes ,Isobars ,Valency, Electronic configuration, Electrolytic dissociation, Electrolyte, Electrodes, Properties of metals |
| Facts | Laws , definitions of electric lines of force , physical quantities, Atom ,Molecules Atomic number ,Atomic mass number, Cathode ,Anode , Cation , Anion, Metals ,Alloys. |

Course Contents:

THEORY

| Unit | Chapter | Topic and Details | No. of Lectures assigned |
|-------------|------------------------------------|---|---------------------------------|
| I | 1 | 1.Mechanics 1.1.1 Physical quantities and systems of units. 1.1.2 Scalar and vector. 1.1.3 Dimensions. 1.1.4 Errors. | 2 |
| | | 1.2 Force : 1.2.1 Resultant force and Triangle law of forces. 1.2.2 Parallelogram law of forces. 1.2.3 Resolution of forces. 1.2.4 Moment of force and law of moments of force. 1.2.5 Couple and moment of couple. | 4 |
| | | 1.3 Work power and energy: 1.3.1 Work, positive and negative work done. 1.3.2 Power. 1.3.3 Energy, kinetic and potential energy. Law of conservation of energy. | 3 |
| | | 1.4 Friction: 1.4.1 Static, kinetic and rolling friction. 1.4.2 Limiting friction and laws of limiting friction. 1.4.3 Angle of friction and angle of repose. 1.4.4 Application and disadvantage of friction. | 2 |
| | | 1.5 Circular motion: 1.5.1 Angular displacement and angular velocity. 1.5.2 Centripetal and centrifugal force. 1.5.3 Applications of centrifugal force. | 2 |
| | | 1.6 Surface tension: 1.6.1 Surface tension on the basis of molecular theory. 1.6.2 Angle of contact. 1.6.3 Capillarity. 1.6.4 Applications of surface tension. | 2 |
| II | 2 Electricity | 2.1 Static electricity: 2.1.1 Concept of charge. 2.1.2 Newton's inverse square Law of Electrostatics. 2.1.3 Electric field, potential and potential difference between two points. 2.1.4 Electric Lines of force, electric intensity at a point. | 4 |

| | | | |
|------------|---|---|----------|
| | | 2.2 Current electricity: 2.2.1 Electric current, Potential difference and electromotive force. 2.2.2 Ohm's law, Resistance, Specific resistance, Resistors in series and parallel. 2.2.3 Meter bridge and potentiometer and applications. | 6 |
| III | 3 Heat | 3.1 Heat transfer: 3.1.1 Different modes of heat transfer. 3.1.2 Steady state of temperature, thermal conductivity, coefficient of thermal conductivity, temperature gradient. | 3 |
| | | 3.2 Heat sink: 3.2.1 Heat sink, working of heat sink. 3.2.2 Computer heat sinks, selection of heat sink. | 2 |
| IV | 4 Atomic Structure And Valencies | 4.1 Atomic Structure: 4.1.1 Bohrs atomic model, characteristics of fundamental particles of atom. 4.1.2 Atomic number ,atomic mass number, , Isotopes and isobars. 4.1.3 s ,p, d, f orbitals. 4.1.4 Aufbaus principle, Hunds rule, orbital electronic configuration of elements. | 3 |
| | | 4.2 Valency: 4.2.1 valence electrons, valence, Electrovalence, positive and negative electrovalence. 4.2.2 Formation of some electrovalent and covalent compounds. | 2 |
| V | 5 Electro chemistry | 5.1 Basic concepts of electrolysis: 5.1.1 Electrolyte, types of electrolyte. 5.1.2 Ionization and electrolytic dissociation. 5.1.3 Arrhenius theory of electrolytic dissociation. 5.1.4 Degree of ionization, factors affecting it. 5.1.5 Significance of terms involved in electrolysis. | 2 |
| | | 5.2 Electrolysis: 5.2.1 Faradays law I and II and numerical. 5.2.2 Mechanism of electrolysis, electrolysis of CuSO ₄ solution using copper and platinum electrode. 5.2.3 Application of electrolysis , primary and secondary cells. | 3 |
| VI | 6 Metals and Alloys: | 6.1 Metals: 6.1.1 Introduction to metals. 6.1.2 Physical properties of metals and their application like Iron, cast iron ,Copper, Aluminium, Chromium, Nickel, Tin, Lead, Zinc, Cobalt, Tungsten. | 3 |

| | | | |
|--|--|--|----------|
| | | 6.2 Alloys: 6.2.1 Purpose of making alloys. 6.2.2 Classification of alloys. 6.2.3 Special alloys like steel alloy, heat resistant, magnetic steel, copper alloy, solder alloy. | 2 |
|--|--|--|----------|

PRACTICAL LAB ACTIVITIES:

| Sr. No | Course Outcome | Laboratory Activities | No. of Hrs assigned |
|--------|----------------|--|---------------------|
| 1 | C. O. 1 | Use Vernier Calliper to measure Surface area, Volume etc. Of different objects. | 2 |
| 2 | C. O. 1 | Use Screw Gauge to measure Surface Area, Volume etc. Of different objects. | 2 |
| 3 | C. O. 2 | Determine the Coefficient of Static Friction using the Laws of Friction. | 2 |
| 4 | C. O. 2 | Apply Ohm's law in different Circuits | 2 |
| 5 | C. O. 2 | Apply law of Series Combination / Parallel combination and hence to determine the Effective Resistance of the given combination. | 2 |
| 6 | C. O. 4 | Build the given circuit on Bread Board | 2 |
| 7 | C. O. 3 | Determine basic Radical (Metallic Ion) and Acidic Radical (Non Metallic Ion) by Qualitative Analysis. | 2 |
| 8 | C. O. 3 | Determine basic Radical (Metallic Ion) and Acidic Radical (Non Metallic Ion) by Qualitative Analysis. | 2 |
| 9 | C. O. 3 | Determine basic Radical (Metallic Ion) and Acidic Radical (Non Metallic Ion) by Qualitative Analysis. | 2 |
| 10 | C. O. 3 | Determine basic Radical (Metallic Ion) and Acidic Radical (Non Metallic Ion) by Qualitative Analysis. | 2 |

PROJECT BASED ASSIGNMENTS :

| Assignment No. | Course Outcome | Assignment | Marks |
|----------------|----------------|---|-------|
| 1 | CO 1 | Prepare a chart showing different systems of units | 5 |
| 2 | CO 2 | Obtain the desire value of resistor using various combinations of given resistors, also prove it practically. | 5 |

| | | | |
|---|------|--|---|
| 3 | CO 3 | Demonstrate / Prepare the chart, showing the law of conservation of energy in nature. | 5 |
| 4 | CO 3 | Collect the information regarding the different properties of metals due to which they are used in preparation of electronics devices. | 5 |
| 5 | CO4 | Draw suitable diagram explain the process of formation of electrovalent and covalent compound suggested by your teacher | 5 |

SKILL TEST:

| Skill Test No. | Course Outcome | Test | Marks |
|----------------|----------------|--|-------|
| 1 | CO 3 | Determine the coefficient of static friction between glass-glass using law of static friction. | 5 |
| 2 | CO 3 | Demonstrate the spotting of Cation /anion in given Salt solution | 5 |
| 3 | CO 4 | Build the given circuit on bread board and measure the current and P,D, across the each resistor and compare it with the calculated value. | 5 |

PRACTICAL LAB:

| Lab Test No. | Course Outcome | Practical lab Test | Marks |
|--------------|----------------|--|-------|
| 1 | CO1 | Measure the radius of the given sphere using vernier calipers / screw gauge | 2 |
| 2 | CO 1 | Use multi meter to determine the potential difference across the resistors connected in circuit and the current flowing through each branch of the circuit | 2 |
| 3 | CO 2 | Connect the circuit to determine the effective resistance of the series combination of three resistors. | 2 |
| 4 | CO 2 | Determine basic Radical (Metallic Ion) and Acidic Radical(Non Metallic Ion)by Qualitative Analysis | 2 |
| 5 | CO 4 | Build the given circuit on bread board. | 2 |

Examination/Assessment Scheme:

| Question | Q1 | | | | | Q2 | | Q3 | | Q4 | | Q5 | |
|---------------------|---------------------|---------------------|---|---|---|----|---------------------|---------------------|---|---------------------|---|----|---------------------|
| Sub-Question | A OR a | b OR B | c | d | e | a | b OR b | a OR a | B | a OR a | b | A | b OR B |

Course Name : Diploma in Electronics
Semester : I
Subject name : Development of Generic Skill
Subject Code : DE 1006

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | |
|---|----------|-----------|--------|---|-------------------|--------------------------------------|---------------------------|
| Theor y | Tutorial | Practical | Credit | Semester Exam Duration (TH/PR)Hours | Internal Marks | Semester Exam Marks (TH/PR/OR) | Total Marks (TH/PR) |
| 2 | 0 | 0 | 0 | 0 | 0 | NA | 0 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | |

Note :- (Make changes as per your subject requirement)

Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

Rationale:

Generic skills have emerged as an important component of employability skills, which enable an individual to become and remain employable over lifetime and to lead happy and prosperous life.. This aspect of Human Resource Development has become equally important in the era, when wage employment prospects have become meagre. Soft skills are required to be developed in diploma pass outs for enhancing their employability and self confidence

Course Outcomes: On successful completion of course, students will be able to:

1. Make team and Communicate between team members confidently to complete the given task
2. Self-management ,problem solving and time management for successful completion of given task

3. Main healthy and stress free environment in team/group
4. Consider all aspects of social values and ethics

Learning Structure

| | |
|-------------|---|
| Application | To become a successful team leader or member to perform electronics projects and day today task |
| Procedure | Preparing a team for project work understanding problem and time management. |
| Principals | Self management, time management, communication in group, task management, problem solving |
| Concepts | Self development, cooperation, task management |
| Facts | Communications, confidence, soft skills, leadership, health, time, personality |

Course Contents

Theory

| Unit | Chapter | Topic and Details | No. of Lectures |
|------|---------|--|-----------------|
| I | 1 | Introduction to Generic Skills Importance of Generic Skill Development (GSD) Global and Local Scenario of GSD Life Long Learning (LLL) and associated importance of GSD. | 04 |
| | 2 | Managing Self Knowing Self for Self Development Self-concept, personality, traits, multiple intelligence such as language intelligence, Numerical intelligence, psychological intelligence etc. Managing Self – Physical, Personal grooming, Health, Hygiene, Time Management Managing Self – Intellectual development Information Search: Sources of information Reading: Purpose of reading, different styles of reading, techniques of systematic reading. Note Taking: Importance of note taking, techniques of note taking Writing: Writing a rough draft, review and final draft. Managing Self – Psychological | 08 |

| | | | |
|-----|---|---|----|
| | | Stress, Emotions, Anxiety-concepts and significance Techniques to manage. | |
| II | 3 | 3. Managing in Team Team - definition, hierarchy, team dynamics Team related skills- sympathy, empathy, co-operation, concern, lead and negotiate, work well with people from culturally diverse background Communication in group - conversation and listening skills | 04 |
| | 4 | . Task Management Task Initiation, Task Planning, Task execution, Task close out ,Exercises/case studies on task planning towards development of skills for task management. | 03 |
| III | 5 | Problem Solving Prerequisites of problem solving- meaningful learning, ability to apply knowledge in problem solving Different approaches for problem solving. Steps followed in problem solving. Exercises/case studies on problem solving. | 06 |

Course Name : Diploma in Electronics

Semester : II

Subject name : Electrical Technology

Subject Code : DE 2001

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | |
|---|----------|-----------------|--------|-------------------------------------|----------------|--------------------------------|---------------------|
| Theory | Tutorial | Practical (HRS) | Credit | Semester Exam Duration (TH/PR)Hours | Internal Marks | Semester Exam Marks (TH/PR/OR) | Total Marks (TH/PR) |
| 3 | 0 | 2 | 4 | 2 | 50 | 50 | 100 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | |

Note :-(Make changes as per your subject requirement)

1. Theory period is of 60 minutes and Practical Sessions is of 120 minutes
2. Minimum 40% marks are needed for passing in internal and semester examinations

3. Internal marks

| | |
|---------------------------|----------|
| Practical Lab | 10 Marks |
| Project based Assignments | 25 Marks |
| Skill Test | 15 Marks |
| Total | 50 Marks |

4. Semester Examination (Theory)

Theory semester examination includes a two hour theory paper of 50 marks.

5. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
6. It is mandatory to appear for semester examination and skill tests. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignment and Laboratory experiment will not be declared successful for that examination head.
7. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

(Direct Second year admitted students need to complete only Term Work (TW) of 25 Marks i.e Project Based Assignments as per their eligibility)

Rationale: It provides the foundation for further studies in electrical engineering or related fields at post secondary level. The subject seeks to unlock the science and

technology that underpins the operation and control of lighting, power, security, communication systems etc for residential, and commercial and industrial applications. Students will learn, through a combination of theory lessons and hands-on practical training, principles and laws of electricity; electric circuits; appliances and systems. Students will also learn how to integrate and apply their knowledge to device solutions for real-life project electrical and control applications.

Course Outcomes: On successful completion course, students will be able to :

1. Understand the basic concept of electrical engineering.
2. Apply various network analysis theorems to analyze DC circuits.
3. Analyze basic single phase and three phase AC circuits.
4. Explain the working principle, construction, applications of DC machines, AC machines & Transformer.

Learning Structure:

| | |
|--------------------|--|
| Application | To analyze simple DC circuits, Single phase AC circuits and Three phase AC circuits. circuits, To select the appropriate electrical motor for a particular application, To Test transformers |
| Procedure | To solve D.C circuits by applying various network theorems .To solve single phase A.C. circuit A.C ,Operation and control of D.C. Motors Operation and control of A.C. motors Operation and control of F.H.P. Motors |
| Principle | Network theorems. Loop Current& node Voltage A.C.Series Circuit Method Construction and Working of D.C.Motor Construction and Working of A.C.Machines Construction and Working of F.H.P.Motors |
| Concept | Ideal and Practical I & V Sources, A. C.Fundamentals, Concept of D.C. Motor Concept of Transformer, Concept Of A.C.Motor, Concept Of F.H.P.Motors |
| Facts | Components in Electric circuit, Ohm's Law Kirchhoff's Laws, Parts of D.C.Machine, Parts of Transformer, Parts of 3 phaseA.C.Motors, Parts of F.H.P.Motors |

Course Contents:

THEORY

| Unit | Chapter No. | |
|------|-------------|--|
| | | |

| | | |
|-----|---|---|
| | | |
| I | 1 | 1 Units and Basic Concepts 1.1 Units, Circuit elements and parameters 1.2 Fundamental laws and theorems 1.3 Network terminology – active, passive, linear, non- linear bilateral, unilateral networks 1.4 Kickoff's laws, Statement and DC mesh and nodal analysis 1.5 Explanation and application of Superposition, Thevenin's, Norton's theorems and Maxim 1.6 Star Delta transformation (no derivation) |
| II | 2 | 2 A.C. Fundamentals 2.1 Difference between A.C. and D.C. quantity 2.2 Advantages of A.C. over D.C. waveform of sinusoidal A.C. cycle. 2.3 Definitions: instantaneous value, cycle, amplitude, time period, frequency, angular frequ algebra, representation of Phase angle, phase difference, concept of lagging and leading by waveforms, mathematical e 2.6 Pure resistance in A.C. circuit – waveforms, equations and vector diagram (no derivation) 2.7 Power in AC circuits, Power factor and its improvement, Power measurement methods 2.8 Non conventional sources of electrical energy generation. Basic concepts of Solar and wi |
| | 3 | 3 Transformers: 3.1 Construction and working principles 3.2 Emf equation 3.3 Equivalent circuits of single phase transformer 3.4 Efficiency and voltage regulation 3.5 Open circuit and short circuit tests |
| III | 4 | 4 DC Motors: 4.1 Construction and working principles 4.2 Back Emf and voltage equation, 4.3 Torque equation expression only (no derivation) 4.4 Types of D.C. motors: Series, shunt and compound motors and their basic characteristics 4.5 Starting and Speed control of DC motors |
| | 5 | 5 AC Motors: 5.1 Construction of Single phase induction motors |

| | | |
|--|--|--|
| | | 5.2 Torque production and starting of motor 5.3 Speed control methods: brief description of only Synchronous speed, slip speed, slip and 5.4 Fractional Horse Power (FHP) motors Choice of appropriate motors for specific engineering |
|--|--|--|

PRACTICALS

| Sr. No | Course outcome | Lab Activities | No. of Hrs assigned |
|--------|----------------|--|---------------------|
| 1. | CO1 | Finding the equivalent resistance of a resistive network | 2 |
| 2. | CO1 | Verification of Star- Delta transformation | 2 |
| 3. | CO1 | Verification of ohms law | 2 |
| 4. | CO1 | Verification of Delta- Star Transformation | 2 |
| 5. | CO2 | Verification of Kirchhoff's Current Law | 2 |
| 6. | CO2 | Verification of Kirchhoff's Voltage Law | 2 |
| 7. | CO2 | Verification of Superposition Theorem | 2 |
| 8. | CO2 | Verification of Thevenin's Theorem | 2 |
| 9. | CO2 | Verification of Norton's Theorem | 2 |
| 10. | CO3 | To study the principle of generation of electricity | 2 |
| 11. | CO3 | To Study the various methods of electricity generation | 2 |
| 12. | CO3 | Determination of various AC fundamentals from given AC waveform | 2 |
| 13. | CO3 | Verification of characteristics of Purely capacitive network | 2 |
| 14. | CO3 | Verification of characteristics of Purely resistive network | 2 |
| 15. | CO4 | To study the operating principle of DC machines | 2 |
| 16. | CO4 | To study the construction of DC machines | 2 |
| 17. | CO4 | To study the Types of DC motors | 2 |
| 18. | CO4 | To study the operating principle of Transformer | 2 |
| 19. | CO4 | To study the open circuit and Short circuit Test of single phase Transformer | 2 |
| 20. | CO4 | To study load Test of Transformer of single phase transformer | 2 |

Project Base Assignments

| Sr. No | Course outcome | Assignments | Marks |
|--------|----------------|---|-------|
| 1 | CO3 | Demonstration of principle of Electricity generation with suitable model | 5 |
| 2 | CO3 | Industrial visit to any electricity generation plant and submitting a detailed report | 5 |
| 3 | CO4 | Demonstration of operating principle of DC motor with suitable model | 5 |
| | CO4 | Demonstration of resonance in electrical circuits with suitable model | 5 |
| 4 | CO4 | Identifying and categorizing various electrical motors observed by the students at home and college | 5 |

Examination/Assessment Scheme:

| Question | Q.1 | | | | | Q.2 | | Q.3 | | Q.4 | | Q.5 | |
|---------------------|-----|---|---|---|---|-----|---|-----|---|-----|---|-----|---|
| Sub-Question | a | b | C | d | E | a | b | a | b | a | b | a | b |
| CO | 1 | 1 | 1 | 1 | 1 | 2 | 1 | 3 | 4 | 3 | 4 | 2 | 3 |
| Chapter | 1 | 2 | 2 | 2 | 2 | 1 | 1 | 2 | 4 | 2 | 3 | 1 | 2 |

| 2 | 0 | 4 | 4 | 2 | 50 | 50 | 100 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | |

Note :- (Make changes as per your subject requirement)

1. Theory period is of 60 minutes and Practical Sessions is of 120 minutes
2. Minimum 40% marks are needed for passing in internal and semester examinations

3. Internal marks

| | |
|---------------------------|----------|
| Practical Lab | 10 Marks |
| Project based Assignments | 25 Marks |
| Skill Test | 15 Marks |
| Total | 50 Marks |

4. Semester Examination (Theory)

Theory semester examination includes a two hour theory paper of 50 marks.

5. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
6. It is mandatory to appear for semester examination and skill tests. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignment and Laboratory experiment will not be declared successful for that examination head.
7. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

(Direct Second year admitted students need to complete only Term Work (TW) of 25 Marks i.e Project Based Assignments as per their eligibility)

Rationale: Computer Fundamental intends to learn the students about the different parts of computer and its connecting ports. The students will be able to decide the computer configuration as per requirements and develop the ability to assemble the computer system. C Programming is the universal core programming language. C programming is very essential for electronics applications and systems.

Course Outcomes: On successful completion course, students will be able to :

1. Decide optimal hardware configurations of a computer system for any given requirement.
2. Installation C Programming.
3. Use of different programming logics and data types to perform task.
4. Application of looping branching and user data functions for specific use.

Learning Structure:

| | |
|--------------------|---|
| Application | Assemble Computer system. Application of programming for given task |
| Procedure | Identification of Components and ports. Effective use of looping branching. Construct user defined function. |
| Principle | Principles of working of Computer and Hardware Components Programming, syntax and error handling. |
| Concept | Computer resources, input output and storage. Concept of programming, arithmetic and logical operations, functions arrays. |
| Facts | Computer Components, programming, execution. |

Course Contents:

| Unit | Chapter | Topic and Contents | Hours |
|--------|---------|--|-------|
| Unit-1 | 1 | 1. PC Architecture 1.1 Trends in Technology 1.2 Defining Computer Architecture 1.3 Functional units and their interconnections, types of buses, bus architecture. 1.4 Input device (Keyboard, Image scanner, Microphone Pointing device: (Graphics tablet, Joystick, Light pen, Mouse, Optical, Pointing stick) Touchpad, Touch screen, Trackball, Webcam) 1.5 Output devices (Monitor, Printer, Plotter, Speaker, Head phone) | 13 |

PRACTICAL-

| Sr. No | Course outcome | Lab Activities | No. of Hrs assigned |
|--------|----------------|--|---------------------|
| 1. | CO1 | Introduction of Assembled Working Computer. Demonstrate and introduce use of all input output peripheral devices of computer. | 2 |
| 2. | CO1 | Demonstrate computer cabinet, SMPS, different parts and ports of Computer. | 2 |
| 3. | CO1 | Verify motherboard compatibility with processor. | 2 |
| 4. | CO2 | Sequence the assembling steps of computer and assemble a Computer System | 2 |
| 5. | CO2 | Installation of Turbo C Programming Compiler | 2 |
| 6. | CO2 | Program for execution of small program to display messages | 2 |
| 7. | CO2 | Programming on use of different key works for display messages in different format | 2 |
| 8. | CO2 | Programming on accepting input from keyboard | 2 |
| 9. | CO2 | Different compilers of C-Programming | 2 |
| 10. | CO2 | Study of Structure of C-Programming | 2 |
| 11. | CO3 | Programming using of different data types in C | 2 |
| 12. | CO3 | Program on Arithmetic operations. | 2 |
| 13. | CO3 | Programming on Logical operations. | 2 |
| 14. | CO3 | Programming on use of Switch case statement. | 2 |
| 15. | CO4 | Understanding Looping and branching | 2 |
| 16. | CO4 | Programming using If else –if | 2 |
| 17. | CO4 | Programming on Do-While and While loop | 2 |
| 18. | CO4 | Programming of For –Next loop to perform iterations | 2 |
| 19. | CO4 | Programming on nested If-Else loop | 2 |
| 20. | CO4 | Programming on nested for-next loop | 2 |
| 21. | CO4 | Distinguish between conditional and non-conditional loops | 2 |

| | | | |
|-----|-----|---|---|
| 22. | CO4 | Programming on switch case statement | 2 |
| 23. | CO4 | Programming on arithmetic operation using int float data | 2 |
| 24. | CO4 | Programming character string | 2 |
| 25. | CO4 | Define user defined functions | 2 |
| 26. | CO4 | Calling user defined function in main programming. | 2 |
| 27. | CO4 | Different types of user defined function in C Programming language | 2 |
| 28. | CO4 | Simple program using function. | 2 |
| 29. | CO4 | Programming using different types of user defined functions | 2 |
| 30. | CO4 | Programming by calling multiple user defined function in main program | 2 |

PROJECT BASE ASSIGNMENTS

| Sr. No | Course outcome | Assignments | Marks |
|--------|----------------|--|-------|
| 1. | CO1 | Note down minimum two computers specification from the any one department of college. Evaluate cost of computer parts and branded computer/ laptops. Bring minimum two quotations for each of the configuration. | 5 |
| 2. | CO1 | Compare difference between desktop computer, notebook computers, net books, and tablets. Evaluate their performances and use. | 5 |
| 3. | CO2 | Installation of Turbo C Programming Language. | 5 |
| 4. | CO2 | Execution of program Debugging and error correction. | 5 |
| 5. | CO3 | Write program to calculate the net salary of an employees | 5 |

SKILL TEST

| Sr. No | Course outcome | Topic | Marks |
|--------|----------------|---|-------|
| 1 | CO4 | Write a program to display the result of student with percentage and class using user defined function. | 15 |

Course Name : Diploma in Electronics

Semester : II

Subject name : Applied Mathematics

Subject Code : DE 2003

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | |
|---|----------|-----------|--------|--|-------------------|--------------------------------|------------------------|
| Theory | Tutorial | Practical | Credit | Semester Exam Duration (TH)Hours | Internal Marks | Semester Exam Marks (TH) | Total Marks (TH) |
| 3 | 1 | 0 | 4 | 2 | 50 | 50 | 100 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | |

Note :-(Make changes as per your subject requirement)

1. Theory period is of 60 minutes and Tutorial Sessions is of 60 minutes
2. Minimum 40% marks are needed for passing in internal and semester examinations

3. Internal marks

| | |
|----------------|----------|
| Assignments | 25 Marks |
| Open Book Test | 10 Marks |
| Skill Test | 15 Marks |
| Total | 50 Marks |

4. Semester Examination (Theory)

Theory semester examination includes a two hour theory paper of 50 marks.

5. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
6. It is mandatory to appear for semester theory examination and skill tests. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignment and Laboratory experiment will not be declared successful for that examination head.
7. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

(Direct Second year admitted students need to complete only Term Work (TW) of 25 Marks i.e Project Based Assignments as per their eligibility)

Rationale:

Engineering is the practical application of math's and science to solve problems. Engineering mathematics paves the way to understand and solve problems in all technical areas. All mathematics is the ultimate form of logical rigor. This is certainly a quality required of engineers.

Functions and limits provide a rigorous foundation for calculus. Calculus can be called as a collection of techniques for manipulating certain limits.

Differential calculus studies the behavior and rate on how different quantities change. Concepts of calculus are used in motion, electricity, heat, light etc. Signal processing has its roots in calculus for analysis of circuits. Applications of differential calculus include computations involving velocity and acceleration, the slope of a curve, Fourier series etc.

Complex numbers are used in signal analysis and other fields for a convenient description for periodically varying signals. Control theory also makes use of complex numbers. In order to analyze AC circuits, it became necessary to represent multi dimensional quantities. For this complex numbers are used.

Course Outcome: After completing semester II of Engineering Mathematics students will be able to

1. Transform a given complex number in the polar form.
2. Distinguish different types of functions and determine the value of a function.
3. Evaluate limits of functions.
4. Determine the derivative of functions.
5. Assess the maxima and minima of functions.

Learning Structure

| | |
|--------------------|---|
| Application | Apply methods of differentiation and knowledge of complex numbers to solve problems in various engineering areas |
| Procedure | <ul style="list-style-type: none">• Separate a complex number in to real and imaginary parts. Apply De-Moivre's theorem to find root of a complex number• Find value of a function. Find inverse functions• Evaluate limit of a function. Find continuity of a function |

| | |
|------------------|--|

● **Semester Examination (Theory)**

Theory semester examination includes a two hour theory paper of 50 marks.

- Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
- It is mandatory to appear for semester theory examination and skill tests. A student remaining absent in any of the examination/test or fails to complete prescribed

number of assignment and Laboratory experiment will not be declared successful for that examination head. Also student has to failing which student will not

- Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

Rationale:

The most commonly used medium to express oneself is language. English, being a global language, is used in all the spheres of human life i.e., personal, professional and social. A diploma student is expected to be proficient in English language and pursue the existing course of study to handle the future jobs. The content of the text includes the aspects related to language skills.

Course Outcome: After completing semester II language in communication skill-II students will be able to

1. Make draft on various situations.
2. Responds to professional spoken communication accurately.
3. Interpret the English context and understands engineering and technology concepts and dictions.

Learning Structure

| | |
|--------------------|---|
| Application | ferent types of communication like graphical, body language to overcome different barriers in formal and informal communication. Drafting office notice memo, resume, business correspondence and presentation. Can participate in debate and group discussion confidently. |
| Procedure | Identify the principles and barriers in the communication process. Effective use of body language and nonverbal codes. View and interpret graphical information precisely. |
| Principle | Formal, informal, verbal, non-verbal, vertical, horizontal, diagonal. Principles Barriers of communication, ethnical jargons, pronunciation and allusions. Graphical communication |
| Concept | Artefacts Communication ,Body language |
| Facts | Letters, documents ,Communication and body language Tabulation of data and its bar graphs and pie charts |

Course Contents
THEORY

| Unit | Chapter | Topic and Details | No. of Lectures/TU assigned | %Weightage |
|------|---------|---|-----------------------------|------------|
| I | 1 | Writing Skill: Introduction to communication 1.1. Definition of communication 1.2. Process of communication 1.3. Types of communication- 1.4. Formal, informal, verbal, non-verbal, vertical, horizontal, diagonal 1.5 Barriers in Communication: Physical Barrier Mechanical: Machine oriented Psychological barriers and Language. | 05 | 11 |
| | 2 | Non-verbal and Graphical communication 2.1 Non-verbal codes: Artefacts 2.2 Aspects of body language Facial expression, eye contact, vocalic, Para language, gesture, posture, dress and appearance. 2.3 Graphical communication Advantages and disadvantages of graphical communication Tabulation of data and its depiction in the form of bar graphs and pie charts. | 05 | |
| | 3 | Formal Written Communication 3.1. Office Drafting: Notice, memo, memorandum, drafting brochure and user manual, repair estimate, e-mail, job application and resume. 3.2. Business Correspondence: Inquiry letter, order letter, complaint letter of collection and settlement and sales letter | 10 | 22 |

| | | | | |
|----|---|---|----|----|
| | | 3.3. Report writing: investigation report, project report, progress reports and industrial visit report. 3.4 Describing objects and giving instructions | | |
| 2. | 4 | Speaking and Listening Skills 2.1. Conversation: telephonic, responding to query, seeking advice, suggesting alternative, methods of handling tasks, responding to business related oral communication, seeking clarification, giving instructions, introducing speaker, vote of thanks. 2.2. Individual Presentation 2.3. Group Discussion 2.4. Debate and interview- practicing interview responses. | 15 | 33 |
| 3. | 5 | Reading Skills 1. Introduction to LSRW and its Importance. 2. Importance of soft skills 3. Comprehensive passages- related engineering, technology and current affairs. | 05 | 11 |
| | 6 | Vocabulary Building: 1. Engineering and technological words and terms and their meanings 2. Homonyms 3. Root words Prefix suffix | 05 | 11 |

TUTORIALS

| Sr. No | Course outcome | Topic | Marks |
|--------|----------------|---|-------|
| 1 | CO1 | Writing letter to the principal asking for permission | 1 |
| 2 | CO1 | Writing letter to the principal requesting him to appear for semester exam as attendance is below 70% | 1 |
| 3 | CO1 | Writing a letter of enquiry for the electronics components required for students practical's | 1 |

| | | | |
|----|-----|--|---|
| 4 | CO1 | Write letter for placing an order | 1 |
| 5 | CO1 | Writing application for a job and prepare resume | 1 |
| 6 | CO2 | Telephonic conversation with a boss | 1 |
| 7 | CO2 | Conversation with a stranger at railway/airport | 1 |
| 8 | CO2 | Techniques of Active participation in group discussion | 1 |
| 9 | CO2 | How to face an interview?- techniques | 1 |
| 10 | CO2 | How to prepare and present a technical report. | 1 |
| 11 | CO3 | Writing routinely used technical words and their meanings | 1 |
| 12 | CO3 | Writing engineering passage with its questions and answers | 1 |
| 13 | CO3 | Writing technical passage with its questions and answers | 1 |
| 14 | CO3 | Reading the cutting of electronics related article to enhance the vocabulary | 1 |
| 15 | CO3 | Writing meaning of homonyms / homophones and forming single sentence by making the use of both | 1 |

ASSIGNMENTS

| Unit No | Assignment No. | Details | Marks |
|---------|----------------|--|-------|
| I | CO1 | Draw the diagram of communication cycle. | 1 |
| | CO1 | Draw suitable bar-graph and pie-charts by using the given data | 2 |
| | CO1 | Draft the letters on the ten different situations given | 2 |
| II | CO2 | Practice listening the reading with proper accents and pronunciation | 2 |
| | CO2 | Practice listening the comprehensive passages in English | 2 |
| | CO2 | Speaking on social, economical, educational, political topics. | 2 |

| | | | |
|-----|-----|--|----|
| | CO2 | Making inquiry, reply to inquiry, intro self and other situations like role-play. | 4 |
| III | CO3 | Write five comprehensive passages related to science, technology, electronics with their question and answers. | 10 |

OPEN BOOK TEST

| Sr. No | Course outcome | Topic | Marks |
|--------|----------------|---|-------|
| 1 | CO1 | Writing formal and informal letters | 3 |
| 2 | CO2 | Reading the dialogues by using the role play method | 3 |
| 3 | CO3 | Reading the comprehension passages and orally explaining the summary. | 4 |

SKILL TEST

| Sr. No | Course outcome | Topic | Marks |
|--------|----------------|--|-------|
| 1 | CO1 | Writing Speeches on given situation (Introduction of speaker /Vote of Thanks) | 5 |
| 2 | CO2 | Conversations on given situations (Inquires/Interviews) | 5 |
| 3 | CO3 | Comprehending text ,articles and writing the answers of the questions asked.x | 5 |

Course Name : Diploma in Electronics
Semester : II
Subject name : Applied Science
Subject Code : DE 2005

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | |
|---|----------|-----------|--------|---|-------------------|--------------------------------------|---------------------------|
| Theory | Tutorial | Practical | Credit | Semester Exam Duration (TH/PR)Hours | Internal Marks | Semester Exam Marks (TH/PR/OR) | Total Marks (TH/PR) |
| 3 | 0 | 1 | 4 | 2 | 50 | 50 | 100 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | |

Note :-

1. Theory period is of 60 minutes and practical session is of 120 minutes.
2. Minimum 40% marks are needed for passing in internal and semester examinations.

3. Internal marks

| | |
|---------------------------|----------|
| Practical Lab | 10 Marks |
| Project based Assignments | 25 Marks |
| Practical Skill Test | 15 Marks |
| Total | 50 Marks |

4. Semester Examination (Theory)

Theory semester examination includes a two-hour theory paper of 50 marks.

5. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
6. It is mandatory to appear for semester theory examination and skill tests. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignment and Laboratory experiment will not be declared successful for that examination head.
7. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

Rationale:

The contents of this curriculum will provide knowledge of Applied Science (Physics and Chemistry). The knowledge and processes used by Applied science have produced new and exciting technologies that are in everyday use. The content of the subject is designed

such that the technical knowledge can be gained more effectively using concepts of Applied Science. Employers value the kind of knowledge that student received in Applied science. Also they become more focused and improves their ability of problem solving.

Course Outcomes:

After completion of the course students will be able to

1. Identify, formulate, differentiate & select various entities in different situations
2. Design and Demonstrate operating principles &/or reaction mechanism of various chemical phenomena/ physical phenomena
3. Apply concepts of applied science for solving problems in daily life/ industrial situation
4. Perform , evaluate & interpret various chemical/physical tests & results

Learning Structure:

| | |
|---------------------------|--|
| Application | Apply the knowledge of Chemical , Physical properties and processes in Engineering field, Total internal reflection, resonance, ultra sonic, photoelectric effect, heating effect of electric current, applications of ultra violet waves, X-rays. |
| Procedure | Vulcanization of Rubber, Polymerization of Rubber, Identification of cause of corrosion and protection, production of stationary waves, velocity of sound using resonance tube, |
| Concept/principles | Thermosetting ,thermo softening plastic, Elasticity, Effect of environment of metals, sound effect in building , image formation by lens/mirror. |
| Facts | Plastic ,Rubber, Insulator, Corrosion, electromagnetic waves, properties of electromagnetic waves, reflection of light, refraction of light, wave motion and its properties |

Course Contents: THEORY

| UNIT | CHAPTER | Topic and Details | No. of Lectures assigned |
|------|------------|---|--------------------------|
| I | 1 SOUND | 1.1 Wave Motion: 1.1.1 Wave motion, properties of wave motion and different types of waves. 1.1.2 Longitudinal and transverse waves. | 2 |

| | | |
|---|--|----------|
| | 1.2 Stationary Waves: 1.2.1 Natural, forced and damped vibrations, resonance, stationary waves. 1.2.2 Formation of stationary waves in an pipe closed at one end, resonance tube. 1.2.3 Applications of resonance. | 3 |
| | 1.3 Acoustics And Ultrasonics: 1.3.1 Reflection of sound, Echo, reverberation. 1.3.2 Conditions for good acoustics, the factors to be considered in acoustic planning of building. 1.3.3 Ultrasonic, production of ultrasonic waves, uses of ultrasonic waves. | 5 |
| II 2 OPTICS | 2.1 Electromagnetic Waves: 2.1.1 Electromagnetic spectrum. 2.1.2 Production, properties and applications of: Infra red rays, visible spectrum, ultra violet rays and X-rays. | 2 |
| | 2.2 Reflection, Refraction And Total Internal Reflection: 2.2.1 Reflection of light, laws of reflection, regular and irregular reflection, total internal reflection and its applications. 2.2.2 Reflection at curve surfaces, concave mirror and convex mirror. 2.2.3 Refraction of light, laws of refraction, refractive index of medium. 2.2.4 Lenses, image formation by concave and convex lens. | 5 |
| | 2.3 Prism And Dispersion Of Light: 2.3.1 Refraction through prism, angle of minimum deviation, prism formula. 2.3.2 Dispersion, dispersive power, expression for dispersive power. | 3 |
| III 3 APPLIED PHYSICS | 3.1 Thermoelectricity: 3.1.1 Thermocouple, seeback effect, factors affecting the thermo emf 3.1.2 Thermoelectric series. 3.1.3 Applications. | 3 |
| | 3.2 Photoelectric Effect: 3.2.1 Photo electric effect. 3.2.2 Characteristics of photoelectric effect and applications. | 3 |
| | 3.3 Heating Effect Of Electric Current: 3.3.1 Joule's law , Joule's calorimeter, determination of J by electric method. 3.3.2 Electric power, relation between K.W.h. and joule. 3.3.3 Expression for electric energy consumed, numerical. | 4 |
| IV 4 NON METALIC ENGINEERING MATERIALS | 4.1 Plastics: 4.1.1 Definition of polymerization, addition and condensation polymerization. 4.1.2 Thermosetting and thermo softening plastics. 4.1.3 Properties and application of plastics. | 3 |
| | 4.2 Rubber: | 2 |

| | | |
|----------|--|----------|
| | 4.2.1 Natural rubber, draw backs, vulcanization, synthetic rubber. | 3 |
| | 4.2.2 Properties and application of rubber. | |
| | 4.3 Electrical Insulators: 4.3.1 Preparation, of electrical insulators like thermo coal, glass wool, cellulose, plastic glass, ceramic, silicone. 4.3.2 Properties and applications of electrical insulators. | |
| V | 5 CORROSION 5.1 Corrosion: 5.1.1 Introduction, mechanism and types of corrosion. 5.1.2 Factors affecting rate of corrosion. 5.1.3 Methods of protection of corrosion, like proper design and material selection, galvanizing, tinning, sherardising, cladding, paints. | 7 |

PRACTICAL LAB ACTIVITIES:

| Sr. No | Course Outcome | Laboratory Activities | No. of Hrs assigned |
|--------|----------------|---|---------------------|
| 1 | CO 2 | Demonstrate the phenomena of Resonance using Resonance Tube and hence determine the Velocity of Sound at room temperature | 2 |
| 2 | CO 2 | Using Plane Mirror , verify the Laws of reflection. | 2 |
| 3 | CO 2 | Determine the angle of Minimum Deviation for the given Prism | 2 |
| 4 | CO 2 | Determine the Refractive Index of the material of glass slab using Law of Refraction. | 2 |
| 5 | CO 3 | Using U-V method determine the Focal Length of the Convex Lens | 2 |
| 6 | CO 4 | Volumetric Analysis.(Weak acid/weak base) | 2 |
| 7 | CO 4 | Volumetric Analysis.(Strong acid/ strong base) | 2 |
| 8 | CO 4 | Volumetric Analysis.(Strong acid/weak base) | 2 |
| 9 | CO 4 | Gravimetric Analysis(Precipitation of nickel sulphate) | 2 |
| 10 | CO 4 | To prepare Phenol Formaldehyde resin used in manufacturing of Bakelite Plastic | 2 |

PROJECT BASED ASSIGNMENTS:

| Assignment No. | Course Outcome | Assignment | Marks |
|----------------|----------------|--|-------|
| 1 | CO 1 | Identify various applications of resonance, ultrasonic in industry and electronics | 5 |
| 2 | CO 1 | Name any Five electronic devices where Plastic materials are used. Differentiate the plastic used along with its properties | 5 |
| 3 | CO 2 | Demonstrate dispersion of light with simple experiments . | 5 |
| 4 | CO 3 | List total number of electric appliances in your home and learn the calculation of electric bill | 5 |
| 5 | CO4 | Observe the process of corrosion of given Aluminum Strip in acidic and basic medium and find relation between decrease in weight due to corrosion and time | 5 |

SKILL TEST:

| Skill Test No. | Course Outcome | Test | Marks |
|----------------|----------------|---|-------|
| 1 | CO 2 | Demonstrate and verify third law of reflection using plane mirror | 5 |
| 2 | CO 3 | Using U-V method determine the focal length of the convex lens | 5 |
| 3 | CO 4 | Determine strength of given acid | 5 |

PRACTICAL LAB:

| Lab Test No. | Course Outcome | Practical lab Test | Marks |
|--------------|----------------|--|-------|
| 1 | CO 2 | Demonstrate the refraction through glass slab | 2 |
| 2 | CO 2 | Demonstrate the angle of deviation for the given angle of incidence of prism | 2 |
| 3 | CO 3 | Find the angle of reflection for the given angle of incidence | 2 |
| 4 | CO 4 | Volumetric Analysis. | 2 |

| | | | |
|---|------|-----------------------|---|
| 5 | CO 4 | Gravimetric Analysis. | 2 |
|---|------|-----------------------|---|

Examination/Assessment Scheme:

| Question | Q1 | | | | | Q2 | | Q3 | | Q4 | | Q5 | |
|---------------------|--------------|--------------|---|---|---|----|--------------|--------------|---|--------------|---|----|--------------|
| Sub-Question | a OR A | B OR B | c | d | e | A | b OR b | a OR a | b | a OR a | b | a | b OR b |
| CO | 1 | 1 | 1 | 3 | 3 | 3 | 4 | 1 | 1 | 4 | 3 | 3 | 1 |
| Chapter | 1 | 1 | 2 | 2 | 3 | 3 | 2 | 1 | 2 | 4 | 3 | 5 | 4 & 5 |
| Marks | 2 | 2 | 2 | 2 | 2 | 6 | 4 | 6 | 4 | 6 | 4 | 6 | 4 |
| Level of Competence | C | C | C | U | U | U | A | U | A | A | A | A | A |

Final Examination Chapter Weight-age Scheme:

| Chapter | Marks | |
|---------|------------|-------------|
| | Compulsory | With option |
| 1 | 10 | 20 |
| 2 | 12 | 16 |
| 3 | 12 | 12 |
| 4 | 8 | 16 |
| 5 | 8 | 10 |
| Total | 50 | 74 |

Final Theory Examination Course Outcome Weight-age Scheme :

| Course Outcome | Que No. | Marks | Total | Weightage% (Total/50)x100 |
|----------------|---------|-------|-------|------------------------------|
| C01 | 1(a) | 2 | 20 | 12% |
| | 1(b) | 2 | | |
| | 1(c) | 2 | | |
| | 3 (a) | 6 | | |
| | 3 (b) | 4 | | |
| | 5 (b) | 4 | | |
| CO2 | - | - | - | 00 % |
| CO3 | 1(d) | 2 | 20 | 16% |
| | 1(e) | 2 | | |
| | 2 (a) | 6 | | |
| | 4 (b) | 4 | | |
| | 5 (a) | 6 | | |
| CO4 | 2 (b) | 4 | 10 | 20% |

| | | | | |

Course Name : Diploma in Electronics

Semester : II

Subject name : Basic Electronics

Subject Code : DE 2006

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | |
|---|----------|-----------|------------|---|-------------------|--------------------------------------|---------------------------|
| Theor y | Tutorial | Practical | Credi t | Semester Exam Duration (TH/PR)Hours | Internal Marks | Semester Exam Marks (TH/PR/OR) | Total Marks (TH/PR) |
| 3 | 0 | 1 | 4 | 2 | 50 | 50 | 100 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | |

Note :- (Make changes as per your subject requirement)

1. Theory period is of 60 minutes and Practical Sessions is of 120 minutes
2. Minimum 40% marks are needed for passing in internal and semester examinations for theory and practical

3. Internal marks

| | |
|---------------------------|----------|
| Practical Lab | 10 Marks |
| Project based Assignments | 15 Marks |
| Skill Test | 25 Marks |
| Total | 50 Marks |

4. Semester Examination (Theory)

Theory semester examination includes a two hour theory paper of 50 marks.

5. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
6. It is mandatory to appear for semester examination and skill tests. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignment and Laboratory experiment will not be declared successful for that examination head.
7. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

(Direct Second year admitted students need to complete only Term Work (TW) of 25 Marks i.e Project Based Assignments as per their eligibility)

Rationale: The increasing uses of Electronics in human life have increased the growth area for entrepreneurship and job possibilities in the field. In each and every field electronic systems are used. The subject “Basic Electronics” is base of all advance analog and digital electronics. It starts with semiconductor PN junction which makes the student to follow the functioning of all semiconductor based electronics. This is a core group subject and it develops cognitive and psychomotor skills.

Course Outcomes: On successful completion course, students will be able to :

1. Compare construction and characteristic behavior and test various diodes and transistors.
2. Design various wave shaping circuits as clipper, clamper, multiplier, filter, rectifier and logic gates
3. Design a linear power supply, amplifier and oscillator with given specifications.

Learning Structure:

| | |
|--------------------|--|
| Application | Wave shaping circuits, Linear power supply, Discrete component amplifier, oscillator |
| Procedure | Identification testing and use of following Passive devices:- Switching diodes, rectifier diodes and special purpose diodes Active Devices:- bipolar transistor (BJT), field effect transistor (FET) and Metal oxide FET Components and ports. Design Procedure of Unregulated power supply, Linear power supply, Discrete component amplifier |
| Principle | Characteristic of Passive devices :- Switching diodes, rectifier diodes and special purpose diodes Active Devices :- bipolar transistor (BJT), field effect transistor (FET) and Metal oxide FET Principle of Rectification, Regulation, wave shaping and filtering, amplification and oscillation Operation of Switch Mode Power Supply and Uninterrupted Power Supply |
| Concept | Construction and specifications of Passive devices :- Switching diodes, rectifier diodes and special purpose diodes Active Devices :- bipolar transistor (BJT), field effect transistor (FET) and Metal oxide FET Concept of Biasing and stability Power supplies Linear , switch mode and universal power supply |

| | |
|--------------|---|
| Facts | Extrinsic semiconductor, PN junction, Resistor, Inductor, Capacitor, transformers. Power supplies |
|--------------|---|

Course Contents:

| Unit | Chapter | Topic and Contents | Hours |
|----------|----------|---|-----------|
| 1 | 1 | 1. Diode 1.1 Semiconductor Physics Insulator, Conductor and semiconductors energy bar diagrams Basic concepts, Intrinsic and extrinsic semiconductors, diffusion and drift currents 1.2 General purpose Diode P-N junction under open-circuit, reverse bias and forward-bias conditions, p-n junction in the breakdown region, Ideal diode, Characteristics and Parameters, static and dynamic resistance of a diode, Diode approximations, Rectifying diode Review of P-type and N-type semiconductor Junction of P-type & N-type i.e. PN junction Barrier voltage , depletion region ,Junction Capacitance Forward biased & reversed biased junction Diode symbol , circuit diagram for characteristics (forward & reversed) 1.3 Special Purpose Diode Zener diodes, construction (reference to doping level) Symbol , circuit diagram for characteristics (forward & reversed) Avalanche & zener breakdown Specifications:- Zener voltage , power dissipation , break over current, dynamic resistance & maximum reverse | 13 |
| 2 | 2 | 2. Transistors 2.1 Bipolar Junction Transistor Basic concept Types of transistors, symbols Transistor structure, operation Conventional current flow , relation between different currents in transistor, Unbiased PNP and NPN Principal of Operation of a PNP Transistor, Principle of Operation of an NPN Transistor , Transistor Voltages and Currents Amplification, Transistor parameters- input resistance, output resistance, α , β & relation between them. | 15 |

| | | | |
|--|----------|--|-----------|
| | | 2.2 Field Effect Transistor Junction Field Effect Transistor : Physical structure, principle of operation, current-voltage characteristics, JFET configuration as CS, CD & CG, UJT. | |
| | 3 | 3. Wave Shapers 3.1 Circuit analysis Definition of instantaneous, peak, root mean square and average value of sinusoidal voltage and current, half wave and full wave, voltage current relationship in resistor, inductor and capacitor, power in ac circuits, average power, active power and reactive power 3.2 Diode Circuits Clippers, Clampers, Multipliers, Rectifiers, Filters | 19 |
| | 4 | 4. Power Supply 4.1 Linear Power Supply L, C, LC, CLC filter concept and design, Circuit operation, dc output voltage, ripple factor (formula), ripple frequency, Line and Load regulation, Dependence of ripple factor on load, Input/output waveforms, limitations & advantages, Unregulated power supply block diagram and design 4.2 Regulated power Supply | 13 |

PRACTICAL LAB

| Sr.No | Course outcome | Lab Activities | No. of Hrs assigned |
|-------|----------------|--|---------------------|
| 1 | CO1 | Testing of rectifier diode, switching diode, zener diode, germanium diode, LED, photodiode using Analog, digital multi-meter, curve tracer of CR | 2 |
| 2 | CO1 | Forward and reverse characteristic of diode | 2 |
| 3 | CO1 | Forward and reverse characteristic of ZENER diode | 2 |
| 4 | CO1 | O/P Characteristic and Load line of CE- NPN transistor | 2 |
| 5 | CO1 | Characteristic of CS- FET | 2 |
| 6 | CO 1 | Characteristic of UJT | 2 |
| 7 | CO2 | Load regulation of Half Wave Rectifier | 2 |
| 8 | CO2 | Load regulation of full centre tap Wave rectifier | 2 |
| 9 | CO2 | Load regulation of full wave bridge Wave rectifier | 2 |

| | | | |
|----|-----|---|---|
| 10 | CO2 | Positive and Negative clipper | 2 |
| 11 | CO2 | Positive and Negative clamper | 2 |
| 12 | CO2 | Voltage doubler | 2 |
| 13 | CO3 | Design of Zener voltage regulator | 2 |
| 14 | CO3 | Design of three terminal IC voltage regulator | 2 |
| 15 | CO3 | Design of variable voltage series regulator | 2 |

PROJECT BASE ASSIGNMENTS

| Sr. No | Course outcome | Assignments | Marks |
|--------|----------------|---|-------|
| 1. | CO1 | Note down minimum two eliminator/ battery charger specifications. | 5 |
| 2. | CO1 | Note down minimum two eliminator/ battery charger specifications. | 5 |
| 3. | CO1 | Compare specifications of any of the two Zener diodes | 5 |
| 4. | CO1 | Compare specifications of any of the two photo diodes | 5 |
| 5. | CO1 | Compare specifications of any of the two light emitting diodes | 5 |
| 6. | CO1 | Compare specifications of any of the two NPN transistors | 5 |
| 7. | CO 1 | Compare specifications of any of the two FETs | 5 |
| 8. | CO 1 | Compare specifications of any two MOSFETs | 5 |
| 9 | CO 1 | Prepare a detailed report on semiconductor devices available in electronics department | 5 |
| 10. | CO 2 | Write detailed description of clipper uses in electronics measuring instruments | 5 |
| 11 | CO 2 | Write detailed description of clamper uses in electronics measuring instruments | 5 |
| 12. | CO 2 | Write down detailed description of voltage multipliers in electronic gadgets. | 5 |
| 13. | CO 2 | Prepare Comparative report of T filter and π filter uses in electronics power supplies | 5 |
| 14. | CO 2 | Prepare a specification chart for full wave rectifier with bridge circuit | 5 |
| 15. | CO 2 | Design a unregulated power supply to charge a battery of 6 volt which requires charging current of 1 Ampere | 5 |
| 16. | CO 2 | Prepare Comparative report of logic families used in making logic gates. | 5 |
| 17 | CO3 | Prepare a report on SMPS used in desktop computer | 5 |
| 18 | CO3 | Prepare a report on SMPS used in laptop computer | 5 |
| 19 | CO3 | Prepare a report on SMPS used in microcontroller kit | 5 |
| 20 | CO3 | Prepare a report on amplifier used in Public Address System | 5 |
| 21 | CO3 | Prepare a report on amplifier used in sound amplification system of desktop/laptop computer | 5 |
| 22 | CO3 | Prepare a report on oscillator used in digital systems | 5 |

Note:- At least three project based assignments should be performed in a semester covering at least one assignment from each CO

SKILL TEST

| Sr. No | Course outcome | Topic | Marks |
|--------|----------------|--|-------|
| 1 | CO3 | Make a linear power supply for an electronics laboratory that fixed dual voltage regulated power supply for 15 - 0 -15 @ 150 mA | 10 |
| 2 | CO3 | Make a linear power supply for an electronics laboratory that fixed dual voltage regulated power supply for 15 - 0 -15 @ 150 mA | 10 |
| 3 | CO3 | Make a variable voltage regulator that gives output from 0 – 25 volt @ 150 mA using regulator IC | 10 |
| 4 | CO 3 | Make a variable voltage regulator that gives output from 0 – 25 volt @ 150 mA using discrete components | 10 |
| 5 | CO3 | Make a pulse amplitude modulator that uses discrete component amplifier circuit | 5 |
| 6 | CO3 | Make a pulse width modulator circuit using transistor as comparator | 5 |
| 7 | CO 3 | Make a circuit that depicts the operation of BJT as switch and variable resistor | 5 |

Note:- At least three skill tests should be performed in a semester.

Examination/Assessment Scheme:

| Question | Q1 | | | | | Q2 | | Q3 | | Q4 | | Q5 | |
|---------------------|--------------|--------------|---|---|---|----|--------------|--------------|---|--------------|---|----|--------------|
| Sub-Question | a OR a | b OR b | c | D | E | a | b OR b | a OR a | b | a OR a | b | a | b OR B |
| CO | 1 | 2 | 3 | 3 | 2 | 2 | 3 | 1 | 1 | 2 | 1 | 3 | 3 |

CARRICULUM
SECOND YEAR DIPLOMA IN ELECTRONICS

Course Name : Diploma in Electronics
Semester : III
Subject name : ELECTRIC CIRCUITS AND NETWORKS
Subject Code : DE 3001

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | | |
|--|--------------------|-------------------------|--------|----------------------------------|-------------------|----|-------------------|----|-------------|
| | | | | Semester Exam Duration (hrs.) | Internal Marks | | Semester Marks | | Total Marks |
| Theor y (hrs.) | Tutorial (hrs.) | Practica l (hrs.) | Credit | TH/PR | TW | PR | TH | PR | (TW+TH+PR) |
| 3 | 0 | 2 | 4 | 2 | 50 | 25 | 50 | 25 | 150 |
| Abbreviations: TW-Term Work ,TH-Theory, TU- Tutorial, PR-Practical | | | | | | | | | |

Examination Scheme:

1. Minimum 40% marks are needed for passing in all the internal assessments and semester examinations.
2. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
3. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignments and laboratory experiments will not be declared successful for that examination head.

4. Internal Marks.

- Term Work (TW)

| | |
|---------------------------|----------|
| Project based Assignments | 50 Marks |
|---------------------------|----------|
- Practical Internal (25 Marks)

| | |
|-------------------------|----------|
| 1. Practical Lab | 10 Marks |
| 2. Practical Skill Test | 15 Marks |

5. Semester Examination Marks:

- Theory Paper(TH) 50 Marks
- Practical /Viva(PR/V) 25 Marks

Rationale:

Electrical Circuits and Networks is a course where students are introduced to simple electrical circuit concepts, principles, and analysis to have visualization of electrical engineering applications.

Course Outcomes:

On successful completion of course, students will be able to:

1. Apply fundamental concepts in solving and analysing different Electrical networks.
2. Evaluate the parameters for series, parallel resonant circuits and coupled circuits.
3. Infer and evaluate transient response, Steady state response of network functions.

Prerequisites:

Students should know

1. Fundamentals of electrical Circuit Networks.
2. Use of Basic Electrical Laws like Ohm's Law, KCL, KVL.
3. Use of mesh/loop/nodal Analysis for different electrical networks.
4. Use of Network Theorem's.

Learning Structure

| | |
|--------------------|--|
| Application | To analyse different two port networks, network functions resonant circuit and coupled circuits. Evaluate the transient and steady state response and decides the stability of electric network functions. |
| Procedure | To solve different two port networks, network functions, resonant circuits, coupled circuits and transient response by applying various network theorems, mesh and node analysis. |
| Principle | Network theorems, Mesh Analysis, Node Analysis, Source Transformation |
| Concept | Ohm's Law, KVL, KCL, Voltage Divider rule, Current Division Rule |
| Facts | Passive Components in Electric circuit, Different types of Current & Voltage Sources |

Course Contents

THEORY

| Unit | Chapter | Topic and Details | No. of Lectures assigned | Weight age in % |
|-------------|-----------------------------|--|---------------------------------|------------------------|
| I | 1. Two Port Networks | 1.1 Introduction 1.2 Open Circuit Impedance Parameters (Z-Parameters) 1.3 Short-Circuit Admittance (Y-Parameters) 1.4 Transmission Parameters (ABCD Parameters) 1.5 Inverse Transmission Parameters (A'B'C'D' Parameters) 1.6 Hybrid Parameters (h-Parameters) 1.7 Inverse Hybrid Parameters (g-Parameters) 1.8 Interrelations between Parameters | 10 | 20 |
| II | 2. Network Functions | 2.1 Introduction 2.2 Driving Point Functions | 10 | 30 |

| | | | | |
|------------|-----------------------------|--|----|----|
| | | 2.3 Transfer Functions 2.4 Poles and Zeros of Network Function 2.5 Restrictions on Pole-Zero Locations for Driving Point Functions 2.6 Restrictions on Pole-Zero Locations for Transfer Functions 2.7 Time-Domain Behaviour from Pole-Zero Plot. | | |
| | 3.Resonance | 3.1 Introduction 3.2 Series Resonance 3.3 Parallel Resonance 3.4 Comparison of Series and Parallel Resonant Circuits | 05 | 10 |
| III | 4.Coupled Circuits | 4.1 Self-Inductance 4.2 Mutual Inductance 4.3 Coefficient of Coupling 4.4 Inductance in series 4.5 Inductances in Parallel 4.6 Dot Convention 4.7 Coupled Circuits 4.8 Tuned Circuits | 10 | 20 |
| | 5.Transient Analysis | 5.1 Introduction 5.2 Initial Conditions 5.3 Resistor-Inductor Circuit 5.4 Resistor-Capacitor Circuit 5.5 Resistor-Inductor-Capacitor Circuit | 10 | 20 |

PRACTICALS

| Sr. No | Course Outcome | Laboratory Activities | No. of Hrs assigned | Weight age in % |
|--------|----------------|---|---------------------|-----------------|
| 01 | CO1 | Determine Open Circuit (Z) Parameters for given Network. | 02 | 10 |
| 02 | CO1 | Determine short Circuit (Y) Parameters for given Network. | 02 | 10 |
| 03 | CO1 | Determine transmission Parameters (ABCD) for given Network. | 02 | 10 |
| 04 | CO1 | Determine inverse transmission Parameters (A'B'C'D') for given Network. | 02 | 10 |
| 05 | CO1 | Determine Hybrid Parameters (h) for given Network. | 02 | 10 |

| | | | | |
|----|-----|---|----|----|
| 06 | CO2 | To study the resonance in given R-L-C circuit by varying L and C or by using variable frequency supply. | 02 | 10 |
| 07 | CO3 | Introduction to Sci-LAB part-I | 02 | 10 |
| 08 | CO3 | Introduction to Sci-LAB part-II | 02 | 10 |
| 09 | CO3 | To Plot a graph for a given network function | 02 | 10 |
| 10 | CO3 | To Plot a pole-zero plot for a given network function. | 02 | 10 |

PROJECT BASED ASSIGNMENTS

| Sr. No | Course Outcome | Details Sample Assignments | Marks |
|--------|----------------|--|-------|
| 1 | CO2 | Build the coupled circuit for understanding the concept of mutual inductance or Resonance. | 10 |
| 2 | CO3 | Use of Sci-Lab to interpret Circuit response for given expression. | 10 |
| 3 | CO3 | To plot a pole-zero plot for a given network function using Sci-lab | 10 |
| 4 | CO1 | Write a code to find Z / Y / h or g for a given network using Sci-lab | 10 |
| 5 | CO1 | Write a code to convert Z-Parameters to Y -parameters for a given network using Sci-lab | 10 |

Skill Test

| Sr No | Course Outcome | Details Sample Questions | Marks |
|-------|----------------|---|-------|
| 1 | CO1 | To find parameters for given two port network. (Mathematical Analysis) | 4 |
| 2 | CO3 | Determine Driving point / transfer function of given network.(Mathematical Analysis) | 4 |
| 3 | CO2 | Draw Time-domain equivalent circuit for given coupled circuit.(Mathematical Derivation/ Graphical Representation) | 2 |
| 4 | CO2 | Derive the formula for resonant frequency for given various combinations or series and parallel R-L-C circuits. (Mathematical Analysis) | 2 |
| 5 | CO3 | To find transient response of given R-L-C circuit. | 3 |

Examination/Assessment Scheme:

| Question | Q1 | | Q2 | | Q3 | | Q4 | | Q5 | |
|--------------|----|--------------|----|--------------|--------------|---|--------------|---|----|--------------|
| Sub-Question | A | B OR B | A | B OR B | A OR A | B | A OR A | B | A | B OR B |

| | | | | | | | | | | |
|----------------------------|------|-------|-----|-------|-------|------|-------|-----|-----|-------|
| Marks | 05 | 05/05 | 05 | 05/05 | 05/05 | 05 | 05/05 | 05 | 05 | 05/05 |
| CO | CO 3 | CO 1 | CO2 | CO3 | CO2 | CO 2 | CO3 | CO3 | CO1 | CO3 |
| Chapter | 5 | 1 | 4 | 2 | 4 | 3 | 5 | 2 | 1 | 2 |
| Level of Competence | R | A | R | U | A | U | A | R | R | A |

Final Examination Chapter Weight-age Scheme:

| Chapter | Marks | |
|----------------|-------------------|--------------------|
| | Compulsory | With Option |
| 1 | 10 | 15 |
| 2 | 15 | 25 |
| 3 | 5 | 00 |
| 4 | 10 | 15 |
| 5 | 10 | 15 |
| Total | 50 | 70 |

Final Theory Examination Course Outcome Weight-age Scheme:

| Course Outcome | Que No. | Marks | Total | Weightage% (Total/50)x100 |
|-----------------------|----------------|--------------|--------------|--------------------------------------|
| C01 | 1(b) | 05 | 10 | 20 |
| | 1(b) | 05 | | |
| | 5(a) | 05 | | |
| CO2 | 2(a) | 05 | 15 | 30 |
| | 3(a) | 05 | | |
| | 3(b) | 05 | | |
| CO3 | 1(a) | 05 | 25 | 50 |
| | 2(b) | 05 | | |
| | 2(b) | 05 | | |
| | 4(a) | 05 | | |
| | 4(a) | 05 | | |
| | 4(b) | 05 | | |
| | 5(b) | 05 | | |

Course Name : Diploma in Electronics
Semester : III
Subject name : PRINCIPLE OF ELECTRONIC CIRCUITS
Subject Code : DE 3002

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | | |
|--|--------------------|-------------------------|--------|----------------------------------|-------------------|----|-------------------|----|-------------|
| | | | | Semester Exam Duration (hrs.) | Internal Marks | | Semester Marks | | Total Marks |
| Theor y (hrs.) | Tutorial (hrs.) | Practica l (hrs.) | Credit | TH/PR | TW | PR | TH | PR | (TW+TH+PR) |
| 3 | 0 | 2 | 4 | 2 | 50 | 25 | 50 | 25 | 150 |
| Abbreviations: TW-Term Work ,TH-Theory, TU- Tutorial, PR-Practical | | | | | | | | | |

Examination Scheme:

6. Minimum 40% marks are needed for passing in all the internal assessments and semester examinations.
7. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
8. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignments and laboratory experiments will not be declared successful for that examination head.

9. Internal Marks.

- Term Work (TW)
 - Project based Assignments 50 Marks
- Practical Internal (25 Marks)
 - 3. Practical Lab 10 Marks
 - 4. Practical Skill Test 15 Marks

10. Semester Examination Marks:

- Theory Paper(TH) 50 Marks
- Practical /Viva(PR/V) 25 Marks

Rationale:

The course will develop the fundamental understanding of electronic circuits viz amplifiers, oscillators and multivibrators using discrete and integrated devices. Testing and troubleshooting of circuits will enhance deeper learning

Perquisites:

Students should know

1. The basic structure and working of semiconductor devices(Diodes ,BJT,FET)
2. Basic circuits theorems and concepts.

Course Outcomes:

On successful completion course, students will be able to:

1. Understand the basic principles and working of electronic circuits.
2. Measure key parameters of basic electronic circuits specified in the curriculum.
3. Design basic electronic circuits for a given circuit parameters.
4. Analyze performance characteristics of discrete components of basic electronics.

Learning Structure:

| | |
|--------------------|---|
| Application | Discrete component Wave shapers |
| Procedure | Study circuits and learn design procedure of Power Amplifiers, FET Amplifier and Tuned Amplifier, Time Base Generator |
| Principle | Power/ FET/Tuned Amplifiers Feedback Amplifiers, Time Based Generators Multivibrators & Oscillator |
| Concept | Operating point, phase shift, cascading, multi staging, Bark hausen |
| Facts | Resistor, capacitor, indicator, diode, bipolar junction transistor, field effect transistor, |

Course Contents:

THEORY

| Unit | Chapter | Topic and Contents | Hours |
|------|---------|---|-------|
| 1 | 1 | Introduction to Amplifier 1.1 Operating point, Biasing of amplifier 1.2 Amplifier characteristics Input resistance, voltage gain, current gain, output resistance, power gain, voltage gain . 1.3 Equivalent circuit Models Input resistance, output resistance, inverting and non inverting amplifications, multistage amplifiers, inter stage loading | 10 |

| | | | |
|---|---|---|----|
| 2 | 2 | Transistor Amplifiers, 2.1 Voltage amplifier, current amplifier, trans-conductance amplifier and trans-resistance amplifier 2.2 Classification Of Amplifiers according to biasing, types of devices used unipolar and bipolar supply and frequency range. 2.3 Power Amplification: DC Analysis, Load Line Analysis, Class B push pull amplifier. Need of heat sink, Need of multi stage amplifier, gain bandwidth product, multistage amplifiers and its types 2.4 Amplifiers Efficiency, Mode Of Operations, Efficiency Of Class A, Class B And Class C Amplifiers, 2.5 Feedback Amplifier: Feedback Concept, Effect of Feedback On Amplification, Frequency response & Stability, 2.6 Types of negative feedback – voltage shunt, voltage series, current shunt & current series. 2.7 Advantages of negative feedback on voltage gain, bandwidth, input impedance, output impedance, stability, noise, distortion in amplifier. | 17 |
| | 3 | Field Effect Transistors. 4.1 MOSFETs, CS, CD & CG Amplifiers, 4.2 Amplifier Characteristics, 4.3 Amplifier analysis | 7 |
| | 4 | Oscillators: 4.1 Introduction To Oscillators, 4.2 Concept of positive feedback , Barkhausen Criteria, Wien Bridge Oscillators, RC Phase Shift Oscillators using BJT, 4.3 Crystal Oscillators, Hartley Oscillators, Colpitt Oscillators, Voltage Controlled Oscillators. 4.4 Multivibrators Transistor as switch. Definition & graphical representation of different time periods. Multivibrator classification, circuit working & frequency with specific application. MMV , AMV , BMV & Schmitt trigger | 11 |
| | | | |

PRACTICAL LAB

| Sr. No | Course outcome | Lab Activities | No. of Hrs assigned |
|--------|----------------|---|---------------------|
| 1 | C01 /CO2 | To study biasing techniques of CE amplifier | 2 |
| 2 | C01 | To study characteristics of a CE amplifier | 2 |
| 3 | CO1 | To study characteristics of a CB / CC | 2 |

| | | | |
|----|-----------------|--|---|
| 4 | CO2/CO3 | To study frequency response of CE amplifier | 2 |
| 5 | CO2/CO3 /CO4 | To study Multistage Amplifiers, RC coupled BJT Amplifiers / direct coupled BJT amplifiers | 2 |
| 6 | CO2/CO3 /CO4 | To study Power Amplifiers: Amplifier classes and efficiency, Class A, B, AB, C Amplifiers Push Pull Amplifier, Distortion in Push-Pull Amplifier | 2 |
| 7 | CO2/CO3 /CO4 | To study Power Amplifiers: Amplifier classes and efficiency, Class A, B, AB, C Amplifiers Push Pull Amplifier, Distortion in Push-Pull Amplifier | 2 |
| 8 | CO 1 | To study MOSFET CS amplifier characteristics | 2 |
| 9 | CO2 | To study the Multistage Amplifiers, Direct couple FET Amplifier | 2 |
| 10 | CO2/CO3 /CO4 | Study and implementation of Wien Bridge / RC phase shift Oscillator | 2 |
| 11 | CO2/CO3 /CO4 | Study and implementation of Colpitts / Hartley oscillator | 2 |

PROJECT BASED ASSIGNMENTS

| Sr. No | Course outcome | Assignments (SAMPLE ASSIGNMENTS) | Marks |
|--------|-----------------|--|-------|
| 1. | CO1,CO2,CO3,CO4 | Design and implementation of any four electronics circuits specific to curriculum. | 50 |

SKILL TEST

| Sr. No | Course outcome | Topic | Marks |
|--------|----------------|---|-------|
| 1 | CO 3,CO4 | Design ,analysis and Troubleshooting of any circuit specified in curriculum | 15 |

Examination/Assessment Scheme:

| Question | Q1 | | | | | Q2 | | Q3 | | Q4 | | Q5 | |

Course Name : Diploma in Electronics
Semester : III
Subject name : DIGITAL CIRCUITS AND FUNDAMENTALS OF MICROPROCESSORS
Subject Code : DE 3003

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | | |
|--|-----------------|-------------------|--------|-------------------------------|----------------|----|----------------|----|-------------|
| | | | | Semester Exam Duration (hrs.) | Internal Marks | | Semester Marks | | Total Marks |
| Theor y (hrs.) | Tutorial (hrs.) | Practica l (hrs.) | Credit | TH/PR | TW | PR | TH | PR | (TW+TH+PR) |
| 3 | 0 | 2 | 4 | 2 | 50 | 25 | 50 | 25 | 150 |
| Abbreviations: TW-Term Work ,TH-Theory, TU- Tutorial, PR-Practical | | | | | | | | | |

Examination Scheme:

11. Minimum 40% marks are needed for passing in all the internal assessments and semester examinations.
12. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
13. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignments and laboratory experiments will not be declared successful for that examination head.

14. Internal Marks.

- Term Work (TW)
 - Project based Assignments 50 Marks
- Practical Internal (25 Marks)
 - 5. Practical Lab 10 Marks
 - 6. Practical Skill Test 15 Marks

15. Semester Examination Marks:

- Theory Paper(TH) 50 Marks
- Practical /Viva(PR/V) 25 Marks

Rationale:

The subject will help the students to learn facts, concepts, principle and procedure of digital electronics. These techniques can be used for designing sequential and combinational circuits which forms the basis of any digital electronic system. Also, this subject is designed to give clear idea about working principles of 8085 microprocessor and peripherals.

Course Outcomes:

On successful completion of course, students will be able to :

1. Understand the fundamental concepts and techniques used in digital circuits
2. Analyze and design basic combinational and sequential digital circuits.
3. Understand working of Microprocessor 8085
4. Perform simple Arithmetic and logical assembly programs

Prerequisites:

Students should know

1. Basic of computer architecture.
2. Basics of fundamental programming concepts like instructions algorithm and flowcharts.
3. Logical thinking to implement the loops and branching.
4. Execution of program and debug error.
5. Concept of electronics active components.

Learning Structure

| | |
|-------------|--|
| Application | To apply principles of digital system design in Microprocessors, Controllers and computers, Enabling students to develop assembly language programs using instruction set, Procedures and macros |
| Procedure | Procedure for conversion of number systems and binary codes, Procedure to design digital systems , Microprocessor operation, coding and program execution |
| Principle | Different number systems & codes , Combinational & sequential circuits, Principle of digital design and principle of writing programs |
| Concepts | Combinational and Sequential digital circuits, Number systems, Binary codes, Logic families, Flip-flop, Register, Counter, Hardware, assembler, linker, debugger, Addressing modes, instructions and logic development |
| Facts | Number systems, codes, Microprocessors, Buses, Registers, Stack , Memory, keyboard display. |

Course Contents

THEORY

| Unit | Chapter | Topic and Details | No. of Lectures assigned | Weight age in % |
|------|---------|---|--------------------------|-----------------|
| I | 1 | Number systems and logic families. | 06 | 10 |

| | | | | |
|-----|---|---|----|----|
| | | <p>Decimal, binary, octal and hexadecimal number systems. Conversion from one system to another, Binary arithmetic, signed numbers. Codes-BCD, Excess-3, Gray, alphanumeric, Concept of parity and error detection and correction.</p> <p>Logic Families and Circuits</p> <p>TTL, Logic Family, NAND Gates ,7400 and 5400 series of IC logic families: RTL, DCTL, DTL, TTL, MOS and CMOS; their characteristics and circuit configuration, tri-state logic.</p> | | |
| | 2 | <p>Logic Gates and Boolean Algebra</p> <p>Definitions, symbols and truth table of NOT, OR, AND, NAND, NOR, XOR, XNOR gates, Basic laws of Boolean algebra, De Morgan's theorems; Realization of basic gates using universal gates; Realization of simple Boolean equations using universal gates, Karnaugh-map</p> | 06 | 10 |
| 2 | 3 | <p>Combinational logic Design</p> <p>Design of Adder and Subtractor, Block diagram, Truth table, logical expression and logical diagram of Multiplexers and De-multiplexers, Design of digital combinational circuits</p> | 06 | 20 |
| | 4 | <p>Flip Flops And Sequential Logic Design</p> <p>One bit memory cell, Symbol, Logic diagram using NAND gates, Working, Truth table and Timing diagram of R-S,J-K, D and T flip flop, Block diagram and working of Master- Slave flip-flop. Concept of Registers, Types of shift registers, Working of different types of shift registers, Concept, Modulus, working, truth table and Timing Diagram of a counter, Design of mod N-counter: Working, truth table and timing diagram, Digital memories, RAM, ROM, PROM, EPROM and EEPROM</p> | 09 | 20 |
| III | 5 | <p>Microprocessors</p> <p>Evaluation of microprocessors, microcomputer organization: 8-bit, microprocessor-Intel 8085 architecture buses, flags and register organization, timing signals, instruction sets, addressing modes. Programming in machine and assembly language Memory interfacing.</p> | 12 | 30 |

| | | | | |
|----|---|---|----|----|
| IV | 6 | Interfacing memory and I/O devices -address space partitioning, different data transfer schemes, | 06 | 10 |
|----|---|---|----|----|

PRACTICALS

| Sr. No | Course Outcome | Laboratory Activities | No. of Hrs assigned | Marks |
|--------|----------------|--|---------------------|-------|
| 01 | CO1 | Verification of static characteristics of logic gates. | 02 | .5 |
| 02 | CO1 | Verification of Demerger's theorems | 02 | .5 |
| 03 | CO1 | Synthesis of gate using NAND and NOR gates. | 02 | .5 |
| 04 | CO1 | Reducing given logical function using K-Map and implementing the obtained logical expression using logic gates | 02 | .5 |
| 05 | CO2 | To Verify the operations of SR and JK Flip-flops | 02 | .5 |
| 06 | CO2 | To verify the operation of 4 bit Shift registers using IC | 02 | .5 |
| 07 | CO2 | To implement 3 bit synchronous counter and verify its operation | 02 | 1 |
| 08 | CO3 | Write an ALP using data transfer instruction. | 02 | 1 |
| 09 | CO3 | Write an ALP using Arithmetic instruction. | 02 | 1 |
| 10 | CO4 | Write an ALP using Logical instruction. | 02 | .5 |
| 11 | CO4 | Write an ALP using branch instruction. | 02 | .5 |
| 12 | CO4 | Write an ALP to find smallest/ largest number from array of n numbers. | 02 | .5 |
| 13 | CO4 | Write an ALP to arrange numbers in array in ascending/ descending order. | 02 | 5 |

PROJECT BASED ASSIGNMENTS

| Sr. No | Course outcome | Assignments (SAMPLE ASSIGNMENTS) | Marks |
|--------|---------------------|---|-------|
| 1. | CO1,CO2,C O3,CO4 | Design and implementation of any three application based digital electronics circuits and one assignment on microprocessor as per specific to curriculum. | 50 |

SKILL TEST:

| Unit No | Course Outcome | Details | Marks |
|---------|----------------|---|-------|
| I | CO2 & CO4 | Design of a digital circuit and write an ALP to perform a particular task in Microprocessor | 15 |

Examination/Assessment Scheme:

| Question | Q1 | | | | | Q2 | | Q3 | | Q4 | | Q5 | |
|---------------------|--------------|--------------|-----|-----|-----|-----|--------------|--------------|-----|--------------|-----|-----|--------------|
| Sub-Question | A OR A | b OR b | C | D | E | A | b OR b | A OR A | b | A OR A | B | a | b OR b |
| CO | CO1 | CO3 | CO2 | CO4 | CO4 | CO1 | CO2 | CO2 | CO2 | CO3 | CO4 | CO3 | CO4 |
| Chapter | 1 | 5 | 2 | 7 | 6 | 3 | 4 | 4 | 3 | 5 | 6 | 6 | 7 |
| Marks | 2 | 2 | 2 | 2 | 2 | 4 | 6 | 4 | 6 | 4 | 6 | 4 | 6 |
| Level of Competence | U | R | U | R | U | U | A | A | A | U | A | U | A |

Final Examination Chapter Weight-age Scheme:

| Chapter | Marks | |
|--------------|------------|-------------|
| | Compulsory | With option |
| 1 | 2 | 4 |
| 2 | 2 | 2 |
| 3 | 10 | 10 |
| 4 | 10 | 20 |
| 5 | 6 | 12 |
| 6 | 12 | 12 |
| 7 | 8 | 14 |
| Total | 50 | 74 |

Final Theory Examination Course Outcome Weight-age Scheme :

| Course Outcome | Que. No. | Marks | Total | Weightage% (Total/50)x100 |
|----------------|----------|-------|-------|------------------------------|
| C01 | 1(a) | 2 | 6 | 12 |
| | 2(a) | 4 | | |

| | | | | |
|-----|------|---|----|----|
| CO2 | 1(c) | 2 | 18 | 36 |
| | 2(b) | 6 | | |
| | 3(a) | 4 | | |
| | 3(b) | 6 | | |
| CO3 | 1(b) | 2 | 10 | 20 |
| | 4(a) | 4 | | |
| | 5(a) | 4 | | |
| CO4 | 1(d) | 2 | 16 | 32 |
| | 1(e) | 2 | | |
| | 4(b) | 6 | | |
| | 5(b) | 6 | | |

Total (Internal & External) Course Outcome Weight-age Scheme :

| Sr.No. | Practical Lab (10 Marks) | Project Based Assignments (25 Marks) | Skill Test [15 Marks) | Final Theory exam | Weightage% (Total)x100 |
|--------|-----------------------------|--|-----------------------------|-------------------------|---------------------------|
| CO1 | 2 | 5 | | 6 | 13 |
| CO2 | 2 | 7 | 7 | 18 | 34 |
| CO3 | 2 | 6 | | 10 | 18 |
| CO4 | 4 | 7 | 8 | 16 | 35 |
| Total | | | | | 100% |

Course Name : Diploma in Electronics

Semester : III

Subject name : Electronic Measurements and Instrumentation

Subject Code : DE 3004

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | | |
|----------------------|--------------------|-------------------------|--------|----------------------------------|-------------------|----|-------------------|----|-------------|
| | | | | Semester Exam Duration (hrs.) | Internal Marks | | Semester Marks | | Total Marks |
| Theor y (hrs.) | Tutorial (hrs.) | Practica l (hrs.) | Credit | TH/PR | TW | PR | TH | PR | (TW+TH+PR) |
| 3 | 0 | 2 | 4 | 2 | 50 | 25 | 50 | 25 | 150 |

Abbreviations: TW-Term Work ,TH-Theory, TU- Tutorial, PR-Practical

Examination Scheme:

16. Minimum 40% marks are needed for passing in all the internal assessments and semester examinations.
17. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
18. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignments and laboratory experiments will not be declared successful for that examination head.

19. Internal Marks.

- Term Work (TW)
 - Project based Assignments 50 Marks
- Practical Internal (25 Marks)
 - 7. Practical Lab 10 Marks
 - 8. Practical Skill Test 15 Marks

20. Semester Examination Marks:

- Theory Paper (TH) 50 Marks
- Practical /Viva (PR/V) 25 Marks

Rationale:

Instrumentation is an emerging field used in data detection, acquisition, analysis and control in industrial applications. Analog instruments are mainly used to determine different process parameters. These instruments present desired information in visual indication either in analog or digital form. This subject presumes that the students are familiar with basic utilization of measuring instruments. The era of this subject consists of the information about concepts, principles and procedures of analog and digital electronic measuring instruments and Controlling of Instrumentation Systems.

Course Outcomes:

On successful completion of course, students will be able to:

1. Analyse the different electronic parameters, signals and errors in measurement.
2. Calibrate an electronic instrument.
3. Use and operate Signal Generator, Oscilloscope and signal analysis instruments.
4. Understand basics of data acquisition system and select as per application.
5. Use the principles of electronic and instrumentation to maintain electronic instruments and systems.

Prerequisites: -

Students should know

1. Fundamental concepts of electrical Parameters and its measurement.
2. Basic concepts of physical Parameters.
3. Basics of electronic components, analog and digital circuits.

Learning Structure

| | |
|--------------------|---|
| Application | Measure different electrical quantities using various instruments and Controlling of instrumentation Systems. |
| Procedure | Selection of proper instruments for measurement of respective quantity, measurement with selected analog or digital instruments |

| | |
|------------------|--|
| Principle | Working Principle & operation of multimeter, CRO & Signal generator, ADC, Principle & operation of, DSO, Wave Analysers |
| Concepts | Analog Instruments: Ammeter, Voltmeter, Signal generator, Oscilloscope, ADC, Digital Instruments: DSO, Wave generator |
| Facts | Units of measurement, characteristics of instruments, Different types of Transducers, electronic measurement of electrical / physical parameters, measuring instruments & system |

Course Contents

THEORY

| Unit | Chapter | Topic and Details | No. of Lectures assigned | Weight age in % |
|------------------|---|--|--------------------------|-----------------|
| I | 1. Industrial Measurement Fundamentals | 1.1 Need of Measurement & Generalized block diagram of Instrumentation. 1.2 Static Performance Characteristics: Accuracy, Precision, Linearity, precision, Dead band 1.3 Errors in measurement. 1.4 Units, standards and Calibration 1.5 Classification of transducers on the basis of physical parameters like pressure, temperature, level, Light intensity displacement, photoelectric, piezoelectric, resistive and capacitive parameters 1.6 Selection Criteria of Instrument and Transducer | 8 | 12 |
| Unit – II | 2.Current & Voltage Measurements | 2.1 PMMC Meter, Construction, Principle of operation and its Working 2.2 DC Ammeter and Multi-range Ammeter 2.3 DC Voltmeter and Multi-range Voltmeter 2.4 Digital Voltmeter and its types like Ramp Type, Single slope ADC, Dual slope ADC, SAR 2.5 Different types of DAC R-2R and Binary Weighted Type | 8 | 16 |

| | | | | |
|----------------------|--|---|----|----|
| Unit –III | 3.Signal Generation | 3.1 Standard Signal Generator 3.2 Classification of Signal Generators 3.3 Audio Frequency Signal Generator 3.4 RF Generator 3.5 Function Generator 3.6 Pulse Generator | 05 | 12 |
| Unit –IV | 4.Oscilloscope | 4.1 Oscilloscope block diagram 4.2 Vertical Deflection System 4.3 Horizontal Deflection System 4.4 Delay line, 4.5 CRO Probes 4.6 DSO 4.7 Frequency and Phase measurement using CRO. 4.8 Frequency Counter 4.9 Period Measurement | 12 | 30 |
| Unit –V | 5.Wave Analysers | 5.1 Basics of Wave Analyser 5.2 Types of Wave Analyser 5.3 Frequency Selective Wave Analyser 5.4 Heterodyne Wave Analyser 5.5 Spectrum Analyser 5.6 Logic Analyser 5.7 Comparison of CRO and Wave Analyser | 6 | 15 |
| Unit –VI | 6.Data Acquisition System | 6.1 Data Acquisition System 6.2 Single Channel DAS 6.3 Multichannel DAS 6.4 Application of DAS 6.5 Signal Conditioning and Instrumentation Amplifier | 6 | 15 |

PRACTICALS

| Sr. No | Course Outcome | Laboratory Activities | No. of Hrs assigned | Weight age in % |
|-------------------|---------------------------|---|--------------------------------|----------------------------|
| 01 | CO1 | To measure accuracy of analog and digital multimeter for voltage measurement. | 02 | 10 |

| | | | | |
|----|------|---|----|----|
| 02 | CO3 | To study the front panel control of Function Generator | 02 | 10 |
| 03 | CO3 | To study the front panel control of Cathode Ray Oscilloscope. | 02 | 10 |
| 04 | CO3 | To measure frequency of unknown signal using Lissajous pattern. | 02 | 10 |
| 05 | CO3 | To measure phase of unknown signal using Lissajous pattern. | 02 | 10 |
| 06 | CO2 | To convert given permanent magnet moving coil (PMMC) movement (1mA, 50Ω) into multi range DC voltmeter. | 02 | 10 |
| 07 | CO2 | To design and Verify R-2R DAC. | 02 | 10 |
| 08 | CO 4 | To test Temperature controller circuit using PT100. | 02 | 10 |
| 09 | CO1 | To measure the displacement using LVDT. | 02 | 10 |
| 10 | CO5 | To calculate gain of designed Instrumentation amplifier. | 02 | 10 |

PROJECT BASED ASSIGNMENTS

| Sr. No. | Course Outcome | Details | Marks |
|---------|----------------|--|-------|
| 1 | CO3 | Test various active and passive components and CRO Probe using CRO. | 10 |
| 2 | CO2 | To Calibrate Analog Multimeter for Voltage | 10 |
| 3 | CO5 | To design various transducer circuits systems for measuring different non-electrical quantities. | 10 |
| 4 | CO4 | To design 3-Bit Binary Weighted DAC. | 10 |
| 5 | CO1 | To build object detector using IR sensor | 10 |

SKILL TEST

| Unit No | Course Outcome | Details | Marks |
|---------|----------------|---|-------|
| IV | CO 3 | Identify the different components by observing the patterns on CRO and comment on its working status. | 3 |
| IV | CO 3 | To measure unknown frequency by Lissajous pattern using DSO. Store displayed pattern and print it. | 3 |
| III | CO 1 | To generate different test signals and measure its electrical parameters DSO and Comment on your result. | 3 |
| IV | CO 4 | Verify resistive transducers using instrumentation amplifier to generate control signal | 3 |
| IV | CO 5 | A network engineer wants to maintain the temperature of server room at 20 ⁰ C So, help him to design instrumentation system by selecting different types of transducer, signal conditioning system and output device with its specifications. | 3 |

Examination/Assessment Scheme:

| Question | Q1 | | Q2 | | Q3 | | Q4 | | Q5 | |
|---------------------|------|--------------|------|--------------|--------------|------|--------------|------|-----|--------------|
| Sub-Question | A | B OR B | A | B OR B | A OR A | B | A OR A | B | A | B OR B |
| Marks | 05 | 05/05 | 05 | 05/05 | 05/05 | 05 | 05/05 | 05 | 05 | 05/05 |
| CO | CO 3 | CO 4 | CO 4 | CO3 | CO3 | CO 2 | CO2 | CO 3 | CO3 | CO1 |
| Unit | 4 | 6 | 6 | 3 | 5 | 2 | 2 | 4 | 5 | 1 |
| Level of Competence | R | A | R | A | U | R | A | R | U | R |

Final Examination Chapter Weight-age Scheme:

| Chapter | Marks | |
|--------------|------------|-------------|
| | Compulsory | With Option |
| 1 | 05 | 05 |
| 2 | 10 | 15 |
| 3 | 05 | 10 |
| 4 | 10 | 15 |
| 5 | 10 | 15 |
| 6 | 10 | 15 |
| Total | 50 | 75 |

Final Theory Examination Course Outcome Weight-age Scheme:

| Course Outcome | Que No. | Marks | Total | Weightage% (Total/50)x100 |
|----------------|---------|-------|-------|------------------------------|
| C01 | 5(b) | 5 | 5 | 10 |
| CO2 | 3(b) | 5 | 10 | 20 |
| | 4(a) | 5 | | |
| | 4(a) | 5 | | |

Course Name : Diploma in Electronics
Semester : III
Subject name : ENGINEERING MATHEMATICS-I
Subject Code : DE3005

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | | |
|---|----------|-----------|--------|-----------------------------------|------|------------------------------|---------------------------|------|------------------------|
| Theory | Tutorial | Practical | Credit | Semester Duration (TH)Hours | Exam | Internal Marks (TH+TW) | Semester Marks (TH) | Exam | Total Marks (TH) |
| 3 | 1 | 0 | 4 | 2 | | 50 | 50 | | 100 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | | | |

Examination Scheme:

1. Minimum 40% marks are needed for passing in all the internal assessments and semester examinations.
2. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
3. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignments will not be declared successful for that examination head

1. Internal marks

| | |
|----------------|----------|
| Assignments | 25 Marks |
| Open Book Test | 10 Marks |
| Skill Test | 15 Marks |
| Total | 50 Marks |

Rationale:

Students entering engineering and engineering technology courses are expected to be competent in mathematics. This is due to the fact that mathematics including calculus is a primary gateway to an engineering technology career. Calculating voltage or current through capacitor require both integral and differential calculus. Integral calculus calculates the area under the curve. Differential equations are the basis of power flow problems, control systems and machines.

Course Outcomes:

1. Analyze different methods of integration and apply appropriate method to integrate various functions.
2. Evaluate a definite integral within a given range.
3. Apply methods of integration to calculate area under a curve, mean value of a function and R.M.S value of a function.
4. Identify various types of differential equation with its order and degree and use appropriate method to evaluate the general solution and particular solution .
5. Apply methods of differential equations to find current, voltage etc. in simple RL,RC circuits with given initial conditions

Prerequisites:

1. Adequate knowledge of algebraic operations
2. Concept of differentiation.
3. Methods of finding derivative of a function.

Learning Structure

| | |
|--------------------|---|
| Application | Apply methods of integration to find area under a curve, mean value and R.M.S. value of a function. Use solution of differential equation to find current and voltage in a circuit. |
| Procedure | Integration using substitution, Integration by parts, Integration using partial fraction, Various methods of solution of differential equations |
| Principle | Integration as summation, Solution of a differential equation |
| Concept | Various methods of integration, Definite integrals, Formation of differential equation, Categories of differential equations |
| Facts | Integration as reverse process of differentiation, standard integrals, Ordinary differential equations, Order and degree |

Course Contents

THEORY

| Unit | Chapter | Topic and Details | No. of Lectures/TU assigned | Weightage (%) |
|------|---------|---|-----------------------------|---------------|
| I | 1 | Integral Calculus 1.1: Rules of integration 1.2 standard integrals | 25 | 40 |

| | | | | |
|-----|----|--|----|----|
| | | 1.3 Integration of algebraic rational functions 1.4 Integration of trigonometric functions 1.5 Integration by substitution 1.6 Standard integrals involving radicals 1.7 Integration by parts 1.8 Integration using partial fractions | | |
| II | 2. | Application of Integration 2.1 Definite integrals 2.2 properties of definite integrals 2.3 Area under a curve 2.4 Mean value 2.5 Root mean square value | 10 | 20 |
| III | 3. | Differential equations 3.1 Order and degree of a differential equation 3.2 Formation of differential equation 3.3 Solution of differential equation 3.4 Variable separable 3.5 Homogeneous equations 3.6 Non homogeneous differential equations 3.7 Linear differential equations 3.8 Bernoulli's equations 3.9 Exact differential equations | 20 | 30 |
| | IV | Applications of differential equations 4.1 Applications of differential equations to simple RL-RC circuits | 5 | 10 |

ASSIGNMENTS

| Sr. No | Course outcome | Assignments | Marks |
|--------|----------------|---|-------|
| 1. | CO1 | Evaluate the given integral using appropriate method of integration, Evaluate the given integral using integration by parts , partial fraction | 10 |
| 2. | CO2 | Evaluate the given definite integral | 5 |
| 4. | CO4 | Identify the order and degree of the given differential equation, Formulate a differential equation from its solution | 5 |

| | | | |
|----|-----|--|---|
| 5. | CO5 | Identify the given differential equation and evaluate the general solution and particular solution | 5 |
|----|-----|--|---|

OPEN BOOK TEST

| Sr. No. | Course outcome | Topics | Marks |
|---------|----------------|---|-------|
| 1 | CO 1 | Evaluate the given integral using appropriate method of integration, Evaluate the given integral using integration by parts , partial fraction | 5 |
| 2 | CO4 | Identify the given differential equation and evaluate the general solution and particular solution | 5 |

SKILL TEST

| Sr. No | Course outcome | Topic | Marks |
|--------|----------------|---|-------|
| 1 | CO1 | Evaluate the given integral using appropriate method of integration | 5 |
| 2 | CO3 | Calculate the area under a curve, mean value of a function, R.M.S value of a function | 5 |
| 3 | CO4 | Find the general solution and particular solution of the given differential equation | 5 |
| | | | |

Examination/Assessment Scheme:

Course Name : Diploma in Electronics
Semester : III
Subject name : ENVIRONMENTAL STUDIES
Subject Code : DE3006

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | |
|---|----------|-----------|--------|--|-------------------|--------------------------------|---------------------------|--|
| Theory | Tutorial | Practical | Credit | Semester Exam Duration (TH)Hours | Internal Marks | Semester Exam Marks (TH) | Total Marks (TH/PR) | |
| 4 | 0 | 0 | 4 | 2 | 50 | 50 | 100 | |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | | |

Examination Scheme:

Minimum 40% marks are needed for passing in internal and semester examinations

1. Internal marks

Project based Assignments 50 Marks
Total 50 Marks

2. Semester Examination (Theory) :

Theory exam of 50 marks will be conducted

Rationale:

This course shall create awareness about the importance of environment, the effect of technology on the environment and ecological balance. It will make them sensitive to the environmental problems in their professional endeavor .

Course Outcomes:

On successful completion of course, students will be able to:

1. Understand the role of a human being in maintaining a clean environment
2. Maintain ecological balance and preserve bio-diversity.
3. E-waste management.

Prerequisite:

1. Different natural resources on earth.
2. Pollution ,types , causes and consequences

Learning Structure

| | |
|-------------|--|
| Application | Different natural resources and their importance for better life on earth. |
| Procedure | Control of pollution and waste management ,disaster management, wild life protection |
| Principles | Environment ,Ecosystem and Bio diversity, waste |
| Concepts | Importance of Natural resources, exploitation, deforestation , habitat loss |
| Facts | Pollution, natural resources ,ponds forests, rivers, sea ,genetic species, E-waste, disaster |

Course Contents

Theory

| Unit | Chapter | Topic and Details | No. of Lectures | Weight age in % |
|------|----------|---|-----------------|-----------------|
| I | 1 | 1. ENVIRONMENT, ECOSYSTEMS AND BIODIVERSITY 1.1. Definition, scope and importance of environment. 1.2. Need for public awareness 1.3. Concept of an ecosystem 1.4. Structure and function of an ecosystem 1.5. Producers, consumers and decomposers 1.6. Energy flow in the ecosystem 1.7. Ecological succession 1.8. Food chains, food webs and ecological pyramids | 8 | |
| | 2 | 2. ENVIRONMENTAL POLLUTION 2.1. Definition causes, effects and control measures of: <ul style="list-style-type: none"> ● Air pollution ● Water pollution ● Soil pollution ● Marine pollution ● Noise pollution ● Thermal pollution ● Light pollution ● Nuclear hazards 2.2. Solid waste management: | 10 | |

| | | | | |
|----|----------|--|----|--|
| | | <p>Causes, effects and control measures of municipal solid wastes, role of an individual in prevention of pollution</p> <p>2.3 Impact of Disaster on environment : floods, tsunami ,earthquake, cyclones, wildfires and landslides etc.</p> | | |
| II | 3 | <p>3. NATURAL RESOURCES</p> <p>3.1 Forest resources: Use and over-exploitation, deforestation, case studies- timber extraction, mining, dams and their effects on forests and tribal people.</p> <p>3.2 Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems</p> <p>3.3 Mineral resources: Use and exploitation, Environmental effects of extracting and using Mineral resources.</p> <p>3.4 Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, hazards of chemical fertilizers and pesticides, water logging, salinity.</p> <p>3.5 Energy resources: Growing energy needs, renewable and non-renewable energy resources, use of alternate energy resources.</p> <p>3.6 Land resources: Land as a resource, land degradation, man induced landslides, soil erosion and desertification role of an individual in conservation of natural resources</p> | 8 | |
| | 4 | <p>4. SOCIAL ISSUES AND THE ENVIRONMENT</p> <p>4.1 From unsustainable to sustainable development</p> <p>4.2 Urban problems related to energy mismanagement.</p> <p>4.3 Water conservation, rain water harvesting, watershed management, drip water irrigation ,use of check dams.</p> <p>4.4 Resettlement and rehabilitation of people; its problems and concerns, case studies</p> <p>4.5 Role of non-governmental organization.</p> <p>4.6 Environmental ethics: Issues and possible solutions</p> | 10 | |

| | | | | |
|-----|---|--|----|--|
| | | <p>4.7 Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust, case studies.</p> <p>4.8 Wasteland reclamation Consumerism and waste products</p> <p>4.9 The Environmental protection act: The Air (Prevention and Control of Pollution) act, The Water (Prevention and control of Pollution) act ,The Wildlife protection act and The Forest conservation act .</p> <p>4.10 Enforcement machinery involved in environmental legislation.</p> <p>4.4 Central and state pollution control boards</p> <p>4.5 Public awareness.</p> | | |
| III | 5 | <p>5. ELECTRONICS AND ITS IMPACT ON ENERGY AND ENVIRONMENT:</p> <p>5.1 Green Electronics council</p> <p>5.2 EPEAT tools and standards ,environmental impact,</p> <p>5.3 Bio-Degradable Electronics.</p> <p>5.4 Sustainable Electronics</p> <p>5.5 Photovoltaic and solid state lighting.</p> | 6 | |
| | 6 | <p>6. E-WASTE MANAGEMENT</p> <p>Pollutant like ,Liquid crystal Lithium – Mercury Nickel PCBs (poly chlorinated biphenyls) Transformers, capacitors, softening agents for paints, glue, plastic Selenium Silver, Zinc, arsenic, barium Brominated flame proofing agent, lead cobalt ,copper and use of many such electronics material and their effect on environment.</p> <p>E-waste management policies form clean and safe environment in India and abroad.</p> <p>Methodology for the calculation of sales, e-waste generated, and stocks. Classifications for E-waste, Measuring Framework of E-waste Statistics, E-Waste Stocks, E Waste standards.'</p> | 18 | |

| | | | | |
|--|--|----------------------------------|--|--|
| | | Disposal and recycle of E-Waste. | | |
|--|--|----------------------------------|--|--|

PROJECT BASED ASSIGNMENTS

| CO | Assignment No. | Details(Samples) | Marks |
|-----|----------------|---|-------|
| I | 1 | Field study of local polluted site – Urban / Rural / Industrial / Agricultural. | 10 |
| | 2 | Effects of industries on natural Resources-case study | 10 |
| | 3 | Documentary/short film on Social issues and environment- | 10 |
| II | 1 | Field study of common plants, insects, bird's parks. | 10 |
| III | 1 | Role of information technology in environment and human health – Case studies | 05 |
| | 2 | E-Waste and its Management in India | 05 |

Examination/Assessment Scheme:

| Question | Q1 | | | | | Q2 | | Q3 | | Q4 | | Q5 | |

CURRICULUM

FOURTH SEMESTER DIPLOMA IN ELECTRONICS

Course Name : Diploma in Electronics
Semester : IV
Subject name : ANALOG TECHNIQUES
Subject Code : DE4001

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | | |
|-----------------|-----------------|-------------------|--------|-------------------------------|----------------|----|----------------|----|-------------|
| | | | | Semester Exam Duration (hrs.) | Internal Marks | | Semester Marks | | Total Marks |
| Theor y (hrs.) | Tutorial (hrs.) | Practica l (hrs.) | Credit | TH/PR | TW | PR | TH | PR | (TW+TH+PR) |
| 3 | 0 | 2 | 4 | 2 | 50 | 25 | 50 | 25 | 150 |

Abbreviations: TW-Term Work ,TH-Theory, TU- Tutorial, PR-Practical

Examination Scheme:

21. Minimum 40% marks are needed for passing in all the internal assessments and semester examinations.
22. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
23. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignments and laboratory experiments will not be declared successful for that examination head.

24. Internal Marks.

- Term Work (TW)

| | |
|---------------------------|----------|
| Project based Assignments | 50 Marks |
|---------------------------|----------|
- Practical Internal (25 Marks)

| | |
|--------------------------|----------|
| 9. Practical Lab | 10 Marks |
| 10. Practical Skill Test | 15 Marks |

25. Semester Examination Marks:

- Theory Paper(TH) 50 Marks
- Practical /Viva(PR/V) 25 Marks

Rationale:

Integrated circuits are basis of high density electronics circuits enabled to reduce size, weight and cost of equipments. This subject will make students familiar with general analog principles and design methodologies using integrated circuit for system design.

Course Outcomes:

On successful completion of course, students will be able to:

1. Understand various linear and non linear applications of Op-Amp
2. Apply op-amps fundamentals in design and analysis of different applications circuits.
3. Selection of appropriate Op-Amp for given applications.

Prerequisites:

1. Amplifier fundamentals
2. Feedback concepts
3. Network theory

Learning Structure

| | |
|-------------|--|
| Application | Op-Amp applications in linear and non-linear circuits like Timer circuits, voltage regulators, VCOs PLLs, function generator. |
| Procedure | Prototyping , Visual inspection, Measuring and Plotting of characteristics etc |
| Principle | Virtual ground node ,very small or zero bias currents ,very large voltage gain and input impedance , large gain –bandwidth product etc |
| Concepts | Operational Amplifier parameter slew rate ,CMRR, PSRR, Linear Circuits and non-linear circuits |
| Facts | Amplifier, timers, filters, Multivibrator and Oscillator |

Course Contents

THEORY

*Note: Number of units should be equal to number of credits

| Unit | Chapter | Topic and Details | No. of Lectures | Weight age in % |
|--------|----------------|---|-----------------|-----------------|
| I & II | 1 | Introduction to Operational Amplifier: 1.1 Basic terms and definition ,block diagram, pin configuration ,application, schematic symbol, internal circuit diagram Equivalent circuit of an op amp ,ideal voltage transfer curve, electrical Characteristics of an ideal Op-Amp, linear/digital IC | 6 | 15 |
| | 2&3 | Op-amps in Linear and Non -Linear Analog Systems: | 12 | 27 |

| | | | | |
|-----|---|--|---|----|
| | | The basic inverting and non-inverting amplifier, differential amplifier, instrumentation amplifier, differentiator, integrator, logarithmic and exponential amplifier, analog multiplier, analog comparator and its applications, VIC, IVC, DAC, ADC, S/H circuits | | |
| III | 4 | The Integrated Circuit Timer IC-555: Basic structure, Principle of Operation and waveform application as astable monostable and bistable multivibrator, applications in industry, designing of circuits using IC-555. | 6 | 12 |
| | 5 | The Monolithic VCO-IC 566: Basic Schematic Structure, Principle of operation and waveforms, extension to positive and negative ramp and pulse generation, frequency modulation and other applications On usage | 6 | 12 |
| IV | 6 | The Monolithic Function Generator-IC 8038 & XR 2206: Basic Schematic structure, Principles of operation and wave-forms, practical circuit for Function generation, Remarks on usage. | 6 | 12 |
| | 7 | Special ICs: 7217, LF398, CD 4046, & their applications, Active Filters and Sinusoidal oscillators. | 9 | 22 |

PRACTICALS

| Sr. No | Course Outcome | Laboratory Activities | No. of Hrs assigned |
|--------|----------------|--|---------------------|
| 01 | CO1 | Study of Op amp parameters | 1 |
| 02 | CO1 | Determine the gain of Inverting Amplifier | 1 |
| 03,04 | CO1 | Determine the gain of Non-Inverting Amplifier and Voltage Follower | 1 |
| 05 | CO2 | Verify the operation of summing Amplifier | 1 |
| 06 | CO2 | Verify the working principal of Zero crossing detector (Comparator) | 1 |
| 07 | CO2 | Verify the working principal of Inverting /Non Inverting Comparator. | 1 |
| 08 | CO1 | Verify the operation of Differentiator Circuit | 1 |
| 09 | CO2 | Study of Precision Rectifier Circuit | 1 |

| | | | |
|----|-----|---|---|
| 10 | CO3 | Assemble 555 Astable / Monostable Multivibrator circuit and determine frequency of oscillation and duty cycle | 1 |
| 11 | CO3 | Assemble 555 Monostable Multivibrator circuit and determine frequency of oscillation and duty cycle | 1 |
| 12 | CO3 | Study of PLL IC 565, CD4046 PLL and determine capture range , lock range and free running frequency | 1 |
| 13 | CO3 | Study of VCO IC 566 and determine control voltage and Nominal frequency F0. | 1 |
| 14 | CO3 | Study of IC XR 2206 Monolithic function generator ,8038 Precision function generator | 1 |
| 15 | CO3 | Study of IC 7217 four digit pre settable up/down counter ,LF398 Sample and Hold amplifier | 1 |

PROJECT BASED ASSIGNMENTS

| Unit No | Course Outcome | Details | Marks |
|---------|----------------|--|-------|
| I | CO1 | Determine the Closed loop Inverting / Non-Inverting Amplifier gain and other parameters. | 10 |
| II | CO2 | Derive the expression for Summing Amplifier, scaling and averaging amplifier | 10 |
| | CO2 | Understand Comparators and compare operation of Inverting and Zero crossing detector. | 10 |
| III | CO3 | Design timer circuit & determine its parameters | 10 |
| | CO3 | Design PLL circuit & Find out free running frequency | 10 |

Skill Test

| Unit No | Course Outcome | Details | Marks |
|---------|----------------|--|-------|
| I | CO1,CO2,CO3 | Prepare a small mini project using 741 OR 555 and trouble shoot the same Interpret the waveforms. Find faults in Circuits Testing and Measurement. | 15 |

Examination/Assessment Scheme:

| Question | Q1 | | | | | Q2 | | Q3 | | Q4 | | Q5 | |
|--------------|----|----|---|---|---|----|----|----|---|----|---|----|----|
| Sub-Question | A | b | C | d | E | A | b | A | B | a | B | a | B |

Examination Scheme:

26. Minimum 40% marks are needed for passing in all the internal assessments and semester examinations.
27. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
28. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignments and laboratory experiments will not be declared successful for that examination head.

29. Internal Marks.

- Term Work (TW)
 - Project based Assignments 50 Marks
- Practical Internal (25 Marks)
 - 11. Practical Lab 10 Marks
 - 12. Practical Skill Test 15 Marks

30. Semester Examination Marks:

- Theory Paper(TH) 50 Marks
- Practical /Viva(PR/V) 25 Marks

Rationale:

Communication plays vital role in our lives. Development in communication technology have increased its applications in allied fields of electronics including satellite, mobile, RADAR, telephony, telegraphy, industrial controls, etc. Communication technologies have undergone radical changes, especially due to convergence of computers and communication.. This subject will enable the student to comprehend facts, concept and working principles of analog and digital communication systems. The Knowledge acquired by student will help them to apply in various modern communication systems.

Course Outcomes:

On successful completion course, students will be able to:

1. Explain the basic principles of electronic communication and wave propagation.
2. Compare analog and digital modulation techniques.
3. Design circuits and make measurements for modulation and demodulation.

Prerequisites:

1. Basics properties of signals.
2. Difference between analog and digital signal

Learning Structure:

| | |
|--------------------|--|
| Application | Analog & Digital Communication System, mobile communication, satellite communication, |
| Procedure | Generation of analog and digital modulating and demodulating waves. Calculation of modulation index. Troubleshooting and Servicing of AM and FM radio receiver and TV receiver. |
| Principle | Transmission Lines and Wave propagation, super heterodyne radio receiver .Antenna radiation and reception . |
| Concept | TEM Wave, Polarization, Propagation, Characteristic impedance, SWR, Radiation Pattern , Carrier Signal modulating signal, modulation, modulation index, Sampling, Quantization, coding and decoding. |
| Facts | Signal ,Information ,Data ,Channel, Noise, Bandwidth, Wavelength, , Amplitude, Phase and frequency, transmitter ,receiver. |

Course Contents:

THEORY

| Unit | Chapter | Topic and Contents | Hours |
|-------------|----------------|---------------------------|--------------|
|-------------|----------------|---------------------------|--------------|

| | | | |
|-----------|----------|--|-----------|
| | | | |
| I | 1 | <p>1.1 Transmission lines</p> <p>1.1.1 Fundamentals of transmission line, Equivalent circuit of transmission line, General equivalent circuit, RF equivalent circuit</p> <p>1.1.2 Characteristics impedance, methods of calculations & simple numerical, Losses in transmission line,</p> <p>1.1.3 Standing wave SWR, VSWR, Reflection coefficient, simple numerical.</p> <p>1.1.4 Quarter wave & half wavelength line, Impedance inversion by quarter wavelength line, Quarter wave transformer & impedance matching, Properties of line of various lengths, Impedance matching, Stubs single & double, Baluns</p> <p>1.2 Wave Propagation</p> <p>1.2.1 Fundamental of electromagnetic wave, Transverse electromagnetic wave, polarization, Ground wave, Ionosphere,</p> <p>1.2.2 Sky wave propagation Concept of actual height and virtual height, Definition – critical frequency, max. useable frequency, skip distance, fading, Space wave propagation, Duct propagation, Troposphere scatter propagation</p> | 10 |
| II | 2 | <p>2.1 Introduction to electronic communication</p> <p>2.1.1 Importance, Block diagram of communication system, Modulation, Need for modulation,</p> <p>2.1.2 Types of Electronics communications, Simplex, Duplex Full & Half, Digital, Analog , Applications of communication,</p> <p>2.1.3 The electromagnetic spectrum (different bands & their frequencies), Concept of Transmission bandwidth, Types of Modulation</p> <p>2.2 Analog Modulation</p> <p>2.2.1 Amplitude modulation & Phase modulation, Definition, Modulation index, its effect on modulated signal, simple numerical,</p> <p>2.2.2 Mathematical representation of amplitude modulated wave &</p> | 14 |

| | | | |
|------------|----------|--|-----------|
| | | <p>its meaning, concept of sidebands, Bandwidth requirement, Representation of AM signal in time & frequency domain, Power relation in AM wave, simple numerical, circuit diagram, Frequency modulation, Deviation ratio, max. Deviation ratio,</p> <p>2.2.3 Mathematical representation of frequency modulation and its meaning, Representation of frequency modulated signal in time domain and frequency domain, Bandwidth requirement simple numerical,</p> <p>2.2.4 FM signal generation using reactance modulator circuit (transistorized), Concept with graph-pre emphasis and de-emphasis, Block diagram of FM transmitter explanation with waveform</p> | |
| III | 3 | <p>3.1 Digital Communication</p> <p>3.1.1 Define Digital Communication, communication channel, element of Digital Communication,</p> <p>3.1.2 Compare analog with digital communication Contents, block diagram, Communication channel types and their Characteristics (bit rate, bandwidth, repeater distance) applications, and Channel modelling, channel noise,</p> <p>3.1.3 Introduction. Block diagram of basic digital communication system. Measure of information, Amount of information, Average information, Information rate, Channel capacity – Definition and Expression, Hartley's laws related to channel capacity, Shannon & Hartley theorem, Problems on above topics</p> <p>3.1.4 Channel noise and its effect, Multilevel systems, Comparison with binary coding system, Communication efficiency</p> <p>3.2 Digital Pulse Modulation Techniques.</p> <p>3.2.1 PULSE COMMUNICATIONS: Pulse modulation, Comparison with CW modulation, Advantages, Classification of Pulse modulation Sampling theorem and its importance</p> <p>3.2.2 Analog Pulse modulations: PAM, PWM & PPM Pulse Amplitude modulation (PAM) – Definition, Waveforms, Types - Single and Double Polarity type, Flat top and natural</p> | 10 |

| | | | |
|-----------|---|---|-----------|
| | | <p>PAM, Generation of PAM, Pulse Width modulation (PWM) Definition, waveforms, Description, Symmetrical PWM, leading edge and trailing edge. PWM, Generation of PWM, Pulse Position Modulation (PPM) Definition, waveforms, description, Generation of PPM from PWM; Block diagram of PPM transmitter Relative advantages and disadvantages of PAM, PWM & PPM systems,</p> <p>3.2.3 Digital Pulse Modulation Pulse Code Modulation (PCM) Definition, Waveforms, Principles of PCM Quantization of signal for PCM and Quantization error, Block diagram of 5 channel and 10 channel PCM transmitter, Companding, Demodulation of PCM Block diagram of PCM receiver, Delta Modulation - working principle</p> | |
| IV | 4 | <p>4.0 BINARY MODULATION TECHNIQUES: Digital CW modulation techniques,</p> <p>4.1 AMPLITUDE SHIFT KEYING (ASK) :Definition, description, waveforms, ASK modulator, ASK receiver, Advantages, disadvantages and applications, ASK modulator circuit</p> <p>4.2 FREQUENCY SHIFT KEYING (FSK) : Definition, description, waveforms, FSK modulator circuit, FSK receiver (PLL type), Advantages, disadvantages and applications,</p> <p>4.3 PHASE-SHIFT KEYING (PSK):Definition, description, waveforms of BPSK signal, BPSK transmitter - Circuit diagram study using Ring Modulator, BPSK receiver, QPSK- definition, waveforms, constellation diagram, QPSK - transmitter and receiver systems, QAM – definition, constellation diagram, types, QAM transmitter</p> | 11 |

PRACTICAL LAB

| Sr.No | Course Outcome | Lab Activities | No. of Hrs assigned |
|-------|----------------|--------------------------------|---------------------|
| 1 | C01 | Principle of transmission line | 2 |
| 2 | C01 | Electronic Wave propagation | 2 |

| | | | |
|----|------------|-----------------------------|----|
| 3 | CO2 | Amplitude Modulation | 2 |
| 4 | CO2 | Amplitude demodulation | 2 |
| 5 | CO2 | Frequency modulation | 2 |
| 6 | CO2 | Frequency demodulation | .2 |
| 7 | CO2 | ASK modulation demodulation | .2 |
| 8 | CO2 | FSK modulation demodulation | 2 |
| 9 | CO3 | PSK modulation demodulation | 2 |
| 10 | CO3 | Sampling | 2 |
| 11 | CO3 | PAM modulation | 2 |
| 12 | CO3 | PWM modulation | 2 |
| 13 | CO3 | PPM modulation | 2 |
| 14 | CO2 CO3 | PCM modulation | 2 |

PROJECT BASE ASSIGNMENTS

| Sr. No | Course outcome | Sample Assignments | Marks |
|--------|----------------|--|-------|
| 1. | CO1 | Write a report on use of wave propagation for an application on his own blog (Topics will be given by subject expert). | 5 |
| 2. | CO1 | Describe operation of communication system in EPBAX | 5 |
| 3. | CO1 | Any one assignment as per subject teachers understanding | 5 |
| 4. | CO 2 | Compare FM transmission with AM transmission of radio | 5 |
| 5 | CO 2 | Compare ASK with FSK for an application | 5 |
| 6. | CO 2 | Compare analog telephony with mobile communication | 5 |
| 7 | CO3 | Identify the block in radio communication and draw block diagram on a chart | 10 |
| 8 | CO3 | Identify the block in TV communication and draw block diagram on a chart | 10 |

SKILL TEST

| Sr. No | Course outcome | Sample topic | Marks |
|--------|----------------|--------------|-------|
|--------|----------------|--------------|-------|

| | | | |
|---|---------|--|----|
| 1 | CO2,CO3 | Use of ASK/FSK in a small project on digital modulation and Prepare a report on practical use of analog communication and digital communication system | 15 |
|---|---------|--|----|

Examination/Assessment Scheme:

| Question | Q1 | | | | | Q2 | | Q3 | | Q4 | | Q5 | |
|---------------------|--------------|--------------|---|---|---|----|--------------|--------------|---|--------------|----|----|--------------|
| Sub-Question | A OR a | B OR B | c | D | E | A | b OR b | a OR a | b | a OR a | b | a | b OR B |
| CO | 1 | 2 | 3 | 3 | 2 | 2 | 3 | 1 | 1 | 2 | 1 | 3 | 3 |
| Chapter | 1 | 2 | 4 | 3 | 3 | 3 | 4 | 2 | 1 | 3 | 2 | 1 | 4 |
| Marks | 2 | 2 | 2 | 2 | 2 | 6 | 4 | 6 | 4 | 6 | 4 | 6 | 4 |
| Level of Competence | R | U | U | U | U | R | A2 | A1 | R | E | A1 | A2 | U |

R remember - 12, U understand - 12, A1 Apply - 10, A2 Analyze - 10, E evaluate - 6, C create - 0

Final Examination Chapter Weight-age Scheme:

| Chapter | Marks | |
|---------|------------|-------------|
| | Compulsory | With option |
| 1 | 12 | 14 |
| 2 | 12 | 20 |
| 3 | 16 | 22 |
| 4 | 10 | 18 |
| Total | 50 | 74 |

Final Theory Examination Course Outcome Weight-age Scheme :

| Course Outcome | Que No. | Marks | Total | Weightage% (Total/50)x100 |
|----------------|---------|-------|-------|------------------------------|
| CO1 | 1(a) | 2 | 16 | 32% |
| | 3(a) | 6 | | |
| | 3(b) | 4 | | |
| | 4(b) | 4 | | |
| CO2 | 1(b) | 2 | 16 | 32% |
| | 1(e) | 2 | | |
| | 2(a) | 6 | | |
| | 4(a) | 6 | | |
| CO3 | 1(c) | 2 | 18 | 36% |
| | 1(d) | 2 | | |
| | 2(b) | 4 | | |
| | 5(a) | 6 | | |
| | 5(b) | 4 | | |

Total (Internal & External) Course Outcome Weight-age Scheme :

| Sr.No. | Practical Lab (10 Marks) | Project Based Assignments (15 Marks) | Skill Test [15 Marks) | Final Theory exam | Weightage% (Total)x100 |
|--------|-----------------------------|--|-----------------------------|-------------------------|---------------------------|
| CO1 | 3 | 5 | 5 | 16 | 29% |
| CO2 | 3 or 4 | 5 | 10 | 16 | 34% or 35% |
| CO3 | 4 or 3 | 5 | 10 | 18 | 37 % or 36% |
| Total | 10 | 15 | 25 | 50 | 100% |

Course Name : Diploma in Electronics
Semester : IV
Subject name : ELECTRONICS PROJECT –(MINOR)
Subject Code : DE4003

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | |
|---|----------|-----------|--------|--|-------------------|--------------------------------|---------------------|
| Theory | Tutorial | Practical | Credit | Semester Exam Duration (PR)Hours | Internal Marks | Semester Exam Marks (PR) | Total Marks (PR) |
| 0 | 0 | 8 | 4 | 0 | 75 | 75 | 150 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | |

Examination Scheme:

1. Minimum 40% marks are needed for passing in all the internal assessments and semester examinations.
2. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
3. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignments and laboratory experiments will not be declared successful for that examination head.

Internal marks

| | |
|---------------------------|----------|
| Project based Assignments | 50 Marks |
| Practical Lab | 15 Marks |
| Viva | 10 Marks |
| Total | 75 Marks |

Rationale:

Electronics Project intends to teach students about the programming skills in single board computing systems, PCB design and project documentation for minor project developments in electronics field. The students will enhance programming skills and PCB schematic and design. They will understand the programming concepts and get the ability to develop own program and PCB design skills.

Course Outcomes:

On successful completion of course, students will be able to :

1. Program single board computing system.
2. Build a customized Printed Circuit Board (PCB) for single board computing system.
3. Prepare Project report.

Prerequisites:

1. Basics of computers
2. Working of basic electronics components.
3. Programming C.
4. Digital and Microprocessor fundamentals.

Learning Structure

| | |
|-------------|--|
| Application | Develop customized single board computing systems with technical report. |
| Procedure | Develop programming using logical thinking and technical skills. |
| Principle | Development flow and Algorithm |
| Concepts | Programming and design concepts |
| Facts | Open source software's, Electronics Components,..etc |

Course Contents

PRACTICALS

| Sr. No | Course Outcome | Laboratory Activities | No. of Hrs assigned | Weight age in % |
|--------|----------------|--|---------------------|-----------------|
| 01 | CO1 | Digital Input & Digital Output Experiments on digital input and digital output on single board computing systems and using LED and Buzzer. | 6 | 5 |
| 02 | CO1 | Analog Input & Analog Input Experiments on analog input and analog output on single board computing systems using PWM. Different outputs on LED. | 6 | 5 |
| 03 | CO1 | LCD, Seven segment and LED Matrix Display Experiment on LCD, Seven segment and LED Matrix display:-Print numbers, Name, Time etc. | 6 | 5 |
| 04 | CO1 | Serial Port | 6 | 5 |

| | | | | |
|----|-----|---|---|-----|
| | | Serial Communication between single board computing systems and PC:-character send and received, Read and display voltage | | |
| 05 | CO1 | DC Motor Control Experiments on DC Motor to control motor speed and direction of rotation | 6 | 5 |
| 06 | CO1 | Servo Motor Control Experiments on servo Motor to rotate servo motor. | 6 | 5 |
| 07 | CO1 | Stepper Motor Control Experiments on Stepper Motor to rotate bidirectional. | 6 | 5 |
| 08 | CO1 | TV Remote Experiments on TV Remote with LCD. | 6 | 5 |
| 09 | CO1 | Timer Experiments with Timer:-play tones, time interval measurement etc. | 6 | 5 |
| 10 | CO1 | Ethernet Experiment on Ethernet with web page static IP | 6 | 5 |
| 11 | CO1 | Bluetooth & Wi-Fi Experiments on Blue tooth and Wi-Fi | 6 | 5 |
| 12 | CO2 | Schematic Getting started with Tools The Capture work environment Starting a project Setting up your project | 8 | 7 |
| 13 | CO2 | Design structure Placing, editing, and connecting parts and electrical symbols | 6 | 5 |
| 14 | CO2 | Adding and editing graphics and text Changing your view of a schematic page About libraries and parts Creating and editing parts | 6 | 5 |
| 15 | CO2 | About the processing tools Preparing to create a net list | 4 | 3.5 |

| | | | | |
|----|-----|--|---|-----|
| 16 | CO2 | Creating a net list Creating reports Exporting and importing schematic data | 4 | 3.5 |
| 17 | CO2 | PCB DESIGN Footprint , Importing Parts placement Mechanically defined components | 6 | 5 |
| 18 | CO2 | PCB Construction (Power and Ground Plane) Routing guidelines Copper Pour DRC Checking form Layout to production | 6 | 5 |
| 19 | CO3 | Project Management Process. | 6 | 5 |
| 20 | CO3 | Project documentation and its importance | 8 | 7 |

PROJECT BASED ASSIGNMENTS

| Unit No | Course Outcome | Detail | Marks |

Examination Scheme:

31. Minimum 40% marks are needed for passing in all the internal assessments and semester examinations.
32. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
33. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignments and laboratory experiments will not be declared successful for that examination head.

34. Internal Marks.

- Term Work (TW)
 - Project based Assignments 50 Marks
- Practical Internal (25 Marks)
 - 13. Practical Lab 10 Marks
 - 14. Practical Skill Test 15 Marks

35. Semester Examination Marks:

- Theory Paper(TH) 50 Marks
- Practical /Viva(PR/V) 25 Marks

➤ **Rationale:**

the course covers architecture and programming of typical 8051 microcontroller using assembly as well as C programming environment to control peripheral devices.. The course will cover 8-bit Microcontroller in detail with sufficient exposure to design an automated system.

➤ **Course Outcomes:** On successful completion of course, students will be able to:

1. Understand architecture and features of microcontroller .
2. Able to write and execute ASM and C language program for given application.

3. Interface different peripheral to 8051 microcontrollers.
4. Understand the principles of working of present day microcontroller systems in various fields.

Prerequisites:

1. Fundamentals of Microprocessor and digital circuits.
2. C programming concepts .

Learning Structure

| | |
|-------------|---|
| Application | Microcontroller based systems. |
| Procedure | Steps for writing assembling and executing assembly language program for 8051. Procedural steps for interfacing peripherals to 8051. |
| Principle | Principles of assembly / C language programming. Principles of interrupt, timer, and serial communication. Principles of memory, ports and device interfacing. |
| Concepts | Microcontroller 8051 microcontroller architecture. Microprocessor and Micro-computer |
| Facts | Memory, Latches, buffers, Registers Counters, tri-state devices decoders, ALU, Boolean algebra, logic operations, MUX, DE-MUX |

Course Contents

THEORY

| Unit | Chapter | Topic and Details | No. of Lectures assigned | Weight age in % |
|----------|---------------------------------------|--|--------------------------|-----------------|
| I | 1. Introduction of Microcontroller | 1.1 Microcontrollers and embedded processors 1.2 Overview of the 8051 Family 1.3 8051 block diagram 1.4 8051 architecture 1.5 8051 pin diagram | 3 | 7% |
| | 2. 8051 Assembly Language Programming | 2.1 Introduction to 8051 assembly programming 2.2 overview of 8051 instructions 2.3 8051 Flags, Registers, register bank and stack 2.4 8051 data types and directives | 8 | 18% |

| | | | | |
|------------|--|---|---|-----|
| | | 2.5 8051 addressing modes | | |
| II | 3.I/O Port Programming | 3.1 Overview of 8051 I/O programming 3.2 Introduction I/O bit manipulation Programming 3.3 I/O programming in 8051 in C language 3.4 Data types, time delay in 8051 C 3.5 Logic operations, data conversion programs in 8051 C | 8 | 18% |
| III | 4.Timer and Serial Port Programming | 4.1 Introduction to Programming 8051 timers 4.2 overview of counter programming 4.3 Programming of timer 0 and 1 in 8051 C 4.4 Introduction to serial Communication 4.5 overview of 8051 connection with RS232 4.6 overview of serial port programming 4.7 Serial port programming in C | 9 | 20% |
| | 5.8051 Interrupts Programming | 5.1 Introduction to 8051 Interrupts 5.2 Interrupt priority in 8051 5.3 Programming of timer Interrupts 5.4 Programming of external hardware interrupts 5.5 Programming of serial communication interrupt | 8 | 18% |
| IV | 6.Interfacing of External Peripheral Devices | 6.1 Interfacing of LCD, 7 Segment 6.2 Key board interfacing 6.3 ADC interfacing 6.4 analog and digital sensor interfacing | 9 | 20% |

| | | | | |
|--|--|-------------------------------|--|--|

Course Name : Diploma in Electronics
Semester : IV
Subject name : ENGINEERING MATHEMATICS-II
Subject Code : DE4005

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | | |
|---|----------|-----------|--------|-----------------------------------|------|-------------------|---------------------------|------|------------------------|
| Theory | Tutorial | Practical | Credit | Semester Duration (TH)Hours | Exam | Internal Marks | Semester Marks (TH) | Exam | Total Marks (TH) |
| 3 | 1 | 0 | 4 | 2 | | 50 | 50 | | 100 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | | | |

Note :- (Make changes as per your subject requirement)

1. Theory period is of 60 minutes and Tutorial Sessions is of 60 minutes
2. Minimum 40% marks are needed for passing in internal and semester examinations

3. Internal marks

| | |
|----------------|----------|
| Assignments | 25 Marks |
| Open Book Test | 10 Marks |
| Skill Test | 15 Marks |
| Total | 50 Marks |

4. Semester Examination (Theory)

Theory semester examination includes a two hour theory paper of 50 marks.

5. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
6. It is mandatory to appear for semester theory examination and skill tests. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignment and Laboratory experiment will not be declared successful for that examination head. Also student has to failing which student will not
7. Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

Rationale

Engineering mathematics uses principles of advanced mathematics to examine problems in related areas like engineering. Many of the phenomena studied in engineering and science are periodic in nature. For example, the current and voltage in an alternating circuit. Fourier methods gives us a set of powerful tools for representing any periodic function as a sum of sines and cosines. Fourier methods are used in all areas of signal processing. Laplace transform is an integral transform which

takes a function of a real variable t to a function of a complex variable s and the inverse Laplace transform takes a function of a complex variable s and gives a function of a real variable t . Laplace transform is widely used by electronics engineers to quickly solve differential equations occurring in the analysis of electronic circuits. Approximately we can say that vectors are numbers with direction. Knowledge of vectors are important because many quantities used in science are vectors. Vector algebra was invented in order to solve two dimensional and three dimensional problems without the use of geometry. Partial derivatives are the basic operation of multivariable calculus. Statistics helps you to effectively conduct research. Most technical journals contain some statistics. An understanding of basic statistics will provide students with fundamental skills necessary to read and evaluate results in research. Quality control and process control use statistics as a tool to manage conformance to specifications of manufacturing processes and the products.

Course Outcomes:

1. Transform a given function into a Fourier series
2. Evaluate Laplace transform, inverse Laplace transform, and hence determine solution of a differential equation with given initial conditions
3. Evaluate the sum and product of vectors and determine the work done by a force .
4. Evaluate higher order partial derivatives and total derivative
5. Analyse data using averages and measures of dispersion.

Prerequisites: Students should know :

1. Adequate knowledge of algebraic operations.
2. Concept of integration
3. Methods to evaluate general integral and definite integral of a function.

Learning Structure

| | |
|--------------------|--|
| Application | Apply Euler's formula to find Fourier expansion of odd and even functions, apply Laplace transform method to find solution of differential equations, apply dot product to find the work done by a force , compare data using dispersion |
| Procedure | Fourier expansion using Euler's formula, Inverse Laplace transform of a function, product of vectors, Total derivative, measures of dispersion |
| Principle | Euler's formula, Laplace transforms of derivatives, position vector of a point, Euler's theorem on homogeneous functions, averages |
| Concept | Conditions for Fourier expansion, Laplace transforms of elementary functions, addition and subtraction of vectors, partial derivatives , organization of data |

| | |
|--------------|---|
| Facts | Periodic and continuous functions ,odd and even functions, definite integrals, Functions of two or three variables, scalars and vectors, Statistical data |
|--------------|---|

Course Contents

THEORY

| Unit | Chapter | Topic and Details | No. of Lectures and tutorials assigned |
|------|---------|--|--|
| 1 | 1 | Fourier Series: 1.1 Euler's formula 1.2 Fourier expansion of functions having some points of discontinuity 1.3 change of interval 1.4 Fourier expansion of odd and even periodic functions 1.5 Half range Fourier series | 11 |
| | 2. | Laplace transforms 2.1 Laplace transforms of elementary functions 2.2 Properties of Laplace transforms 2.3 First shifting property 2.4 Laplace transforms of derivatives 2.5 Inverse Laplace transforms 2.6 Solution of differential equations using Laplace transforms | 15 |
| 2 | 3 | Vector Algebra 3.1 Vectors and scalars 3.2 Addition of vectors 3.3 Position vector of a point 3.4 Co-ordinates of a point in space 3.5 scalar product of vectors 3.6 Application of dot product 3.7 Vector product | 15 |

| | | | |
|---|---|---|----|
| | 4 | Partial Differentiation: 4.1 Partial derivatives 4.2 Partial derivatives of higher order 4.3 Euler's theorem on homogeneous functions 4.4 Total derivative | 5 |
| 3 | 5 | Statistics 5.1 Statistical data 5.2 Arithmetic mean 5.3 Median 5.4 Mode 5.5 Graphical representation 5.6 Range and mean deviation 5.7 Standard deviation and coefficient of variation | 14 |

ASSIGNMENTS:-

| SR. NO | COURSE OUTCOME | ASSIGNMENTS | MARKS |
|--------|----------------|---|-------|
| 1 | CO1 | Determine the Fourier expansion of certain standard functions, functions having some points of discontinuity, odd and even functions, half range functions. | 5 |
| 2 | CO2 | Determine the Laplace transform and inverse Laplace transform. Solve differential equations using Laplace transform method. | 5 |
| 3 | CO3 | Evaluate dot product and cross product of vectors. Evaluate work done by a force using dot product | 5 |
| 4 | CO4 | Determine the partial derivative and total derivative of functions. | 5 |
| 5 | CO5 | Calculate arithmetic mean, median, mode, mean deviation and standard deviation of frequency distribution. Compare variability of data | 5 |

SKILL TEST

| Sr. No | Course outcome | Topic | Marks |
|--------|----------------|--------------------|-------|
| 1 | CO 1 | Fourier series | 5 |
| 2 | CO 2 | Laplace transforms | 5 |

Course Name : Diploma in Electronics
Semester : IV
Subject name : ENGINEERING PROFESSIONAL PRACTICES
Subject Code : DE4006

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | |
|---|----------|---------------|------------|--------------------------------------|---------------------------|---|---------------------------|--|
| Theor y | Tutorial | Practica l | Credi t | Semester Duration (TH/PR)Hours | Exam Internal Marks | Semester Exam Marks (TH/PR/OR) | Total Marks (TH/PR) | |
| 4 | 0 | 0 | 4 | 2 | 50 | 50 | 100 | |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | | |

Examination Scheme:

1. Theory period is of 60 minutes and Practical Sessions is of 120 minutes
2. Minimum 40% marks are needed for passing in internal and semester examinations
3. Theory semester examination includes a two-hour theory paper of 50 marks.

Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms. It is mandatory to appear for semester theory examination and skill tests. A student remaining absent in any of the examination/test or fails to complete prescribed number of assignment and Laboratory experiment will not be declared successful for that examination head.

4. Internal marks :

1. Project based Assignments 50 Marks
2. Total 50 Marks

5. Semester Examination Marks:

- Theory Paper(TH) 50 Marks

Rationale:

The purpose of introducing professional practices is to provide opportunity to students to undergo activities which will enable them to develop confidence for their In plant training in the next semester i.e semester V .

Course Outcomes: On successful completion of course ,students will be able to :

1. Interpret the data acquired from different sources.
2. Prepare and present reports for given topic.
3. Interact with peers to share thoughts and face interviews.
4. Demonstrate the professional ethics in industry environment.

Learning Structure:

| | |
|--------------------|--|
| Application | . To make effective use of knowledge & information for presentation, building confidence, stage daring & working in team to execute the task |
| Procedure | Use reading techniques and information search engines to prepare notes for presentation of content in soft and hard copy. Possesses good moral and ethic to maintain industry |
| Principle | Principles of Effective and efficient Reading and information search. Rules of formal communication and body language for effective communication. Group formation, Expressing views & ideas. Use of feedback, appropriate styles & skills. |
| Concept | Collecting information & organizing into reports, substantiate innovative ideas into application. Analyze & improve perception |
| Facts | Formal communication, industrial ethics, discipline, time management, reports. |

Course Contents:

THEORY

| Unit | Chapter | Topic and Contents | Hours |
|-------------|----------------|---|--------------|
| 1 | 1 | Information Search: (Any Two) Form a group of 2 students. Information should be collected from various resources like Internet, books, journals etc. on the following allocated topics or any other suitable topic suggested by teacher. Prepare Individual technical report on selected topics of 8-10 pages & deliver seminar on at least one i) Electronic rolling display ii) Electronic systems used in Multiplex iii) Electronic traffic control system iv) Any other suitable topic | 15 |
| | 2 | Industry Visit : (At least One) Industry visit should be arranged and each student should submit the technical report individually as a part of term work. Visits can be arranged in any industry which focuses on computer automation, data processing, computer network and computer control machine. | 15 |

| | | | |
|----|---|---|----|
| 2 | 3 | Prepare Individual technical report on selected topics of 8-10 pages & deliver seminar on at least one i) Electronic rolling display ii) Electronic systems used in Multiplex iii) Electronic traffic control system iv) Any other suitable topic | 15 |
| 33 | 4 | Prepare Yourself : Professional ethics, Integrity, honesty , empathy etc Personal grooming: Dressing sense, overall appearance and body gesture during in industry environment and during interview. Preparing for interview: CV , Preparation for Interview, prepare for important questions to be asked in interview, (Mock interview) | 15 |

PROJECT BASED ASSIGNMENTS

| Unit No | Course Outcome | Details | Marks |
|---------|----------------|---|-------|
| 1 | CO1 | Collect the information/data on any topic given by teacher using different resources | 10 |
| | CO1 | Prepare the report on the industry visit | 10 |
| 2 | CO 2 | Prepare the technical report on any topic related to electronics of minimum 8-10 pages. | 10 |
| | CO 2 | Deliver the prepared report on any topic related to electronics in front of the class and note the feedback given for betterment in future. | 10 |
| 3 | CO 3 | Demonstrate the interview techniques through a small act with your class mates. | 10 |

Course Name : Diploma in Electronics
Semester : V
Subject name : INPLANT TRAINING-I
Subject Code : DE 5001

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | |
|---|----------|------------------|--------|---|---------------------------|-------------------|--------------------------------------|---------------------------|
| Theory | Tutorial | Practical Hr. | Credit | Semester Exam Duration (TH/PR)Hours | Term Work Mark s | Internal Marks | Semester Exam Marks (TH/PR/OR) | Total Marks (TH/PR) |
| 0 | 0 | 24 Weeks | 8 | 0 | 50 | 50 | 100 | 200 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | | |

Note:-

Minimum 40% marks are needed for passing in internal and semester examinations.

College will assign two mini projects to be performed in during in plant training in industry to achieve hands on practice and skill to be developed under industrial facilities to ensure all the perquisites of higher semester.

1. Internal Marks

Term work

| | |
|-------------------|----------|
| Log Book | 40 Marks |
| Mini Projects (2) | 10 Marks |

| | |
|---------------------------------|-----------|
| In plant Training Industry Viva | 50 Marks |
| Total | 100 Marks |

2. Semester Examination

Semester examination includes

| | |
|----------------------------------|-----------|
| Final Practical viva/voce | 50 Marks. |
| In plant training report writing | 50 Marks |
| Total | 100 Marks |

Rationale:

An In plant Training is an opportunity offered to students, to work in the Industry for the period of 24 weeks. Industry allocation will be done based on the job roles opted by the students and availability of the industry catering to that specific job role. Trainees will prepare a report on the work done during the In-plant training and maintain a log book of daily work. In-Plant Training Certificate will be awarded by the industry after successful completion of training. Students may opt to appear for job role specific examination conducted by sector skill council.

Scope:

In plant Training provides a real time exposure for the students on the latest and trending technologies in the core companies. Below are some of the job roles in Electronics Industry.

- Calibration Engineer,
- Solar Panel Installation Technician, solar and LED Technician
- LED Light Design Engineer
- PCB Assembly Operator
- Through Hole Assembly Operator
- PCB Designer

- Programming & debugging

Course Outcomes: On successful completion of course, students will be able to demonstrate

1. Job role specific skills
2. Work and interact effectively with superiors and colleagues
3. Follow safety procedures

□ List of Industries

Students are being sent to the industries in Mumbai and Thane.

Below are the names of industries where our students are regularly placed for In-plant training.

- | | |
|---|--|
| 1. Tata Institute of Fundamental Research (<u>TIFR</u>) | 11. Western Regional Instrumentation Centre (WRIC) |
| 2. Bhabha Atomic Research Centre (<u>BARC</u>) | 12. Larsen & Toubro Ltd. |
| 3. Aditya Solutions (website) | 13. APLAB Ltd. (<u>website</u>) |
| 4. Ashida Electronics Pvt. Ltd. (<u>website</u>) | 14. Systems Creator |
| 5. Dipel Electronics (<u>website</u>) | 15. Quality Logger |
| 6. Electrolab India Pvt. Ltd. | 16. Simtek Medico Systems Ltd |
| 7. Electronics Regional Testing Laboratory (ERTL) | 17. Radix Electrosystems Pvt Ltd |
| 8. Industrial Design Centre, IIT-Bombay | 18. Artemis Pvt Ltd |

Course Name : Diploma in Electronics
Semester : VI
Subject name : POWER ELECTRONICS
Subject Code : DE6001

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | |
|---|---------------|----------------|--------|-------------------------------------|--------------------------|--------------------------|--------------------------|---------------------|
| Theory Hrs. | Tutorial Hrs. | Practical Hrs. | Credit | Semester Exam Duration (TH/PR)Hours | Internal Marks (TH + PR) | Semester Exam Marks (TH) | Semester Exam Marks (PR) | Total Marks (TH/PR) |
| 3 | 0 | 2 | 4 | 2 | 75 | 50 | 25 | 150 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | | |

Note:-

1. Minimum 40% marks are needed for passing in internal and semester examinations for theory and practical

2. Internal marks

| | |
|---------------------------|----------|
| Project Based Assignments | 50 Marks |
| Practical Lab | 10 Marks |
| Skill Test | 15 Marks |
| Total | 75 Marks |

3. Semester Examination (Theory)

Theory semester examination includes a two hour theory paper of 50 marks and practical/viva-voce examination of 25 marks.

- Progressive evaluation is to be done by the subject teacher as per the prevailing curriculum implementation and assessment norms.

- It is mandatory to appear for semester examination and skill tests. A student remaining absent in any of the examination/test or fails to complete the prescribed number of assignments and Laboratory experiment will not be declared successful for that examination head.

Rationale:

The power electronic devices and converters employing power electronics devices are now widely used in domestic applications as well as in industrial applications like Electrical Drives, Power Systems, Renewable Energy based power generation, heating applications etc. The course is aimed to act as a foundation block and to provide exposure about various aspects (construction, characteristics, operation, ratings etc.) of power electronic devices. It also covers power electronic converters such as chopper, inverters, with its application

Course Outcomes: On successful completion course, students will be able to:

| CO | CO Statement | Marks % Weightage |
|-----|---|----------------------|
| CO1 | Understand construction and operating principle of power devices | 20 |
| CO2 | Implement triggering / gate drive circuit for a power device | 21 |
| CO3 | Study construction and operation of controlled rectifiers, choppers & inverters | 37 |
| CO4 | Understand industrial and power applications | 22 |

Prerequisite

Basic Electronics & Microcontrollers

Learning Structure:

| | |
|-------------|--|
| Application | Applications of Power Devices used in Industrial Electronics, Different Industrial Control Circuits, and Choppers, Inverters, , Battery charger, Light dimmer circuit. |
| Procedure | Operation of Power Devices & their Turn ON-Off, Operation Of Controlled Rectifiers, Operation of Choppers and Inverters, Operation of Industrial Control circuits |
| Principle | V-I Characteristics of Power Devices, Operating principles of Rectifiers, Choppers and Inverters. |
| Concept | Power Electronic Devices, Control Rectifiers, Choppers, Inverters and Control Circuits |
| Facts | Power Devices, Triggering Circuits, Turn OFF Circuits, Control, Rectifiers, Choppers, Inverters and Converters etc. |

Course Contents:**THEORY**

| Unit | Chapter | Topic and Contents | Hours | % Weightage |
|------|--------------------------------|---|-------|----------------|
| I | Introduction to Thyristors and | 1.1. Basic difference between normal electronic devices and power devices | 10 | 26% |

| | | | | |
|-----|---|---|----|-----|
| | other power electronics devices | <p>1.2. Characteristics and symbolic representation of SCR, ,GTO, SUS, LASCR,SCS,SBC</p> <p>1.3. DIAC / TRIAC – construction and operating Principle, specifications, Applications.</p> <p>1.4. Power MOSFET: PMOSFET, Construction, Operation, Static characteristics, switching characteristics, forward and reverse bias, safe Operating Area, Parallel operation;</p> <p>1.5. IGBT: Construction, Operation, Steady state characteristics, Switching characteristics, Safe operating area</p> | | |
| II | 2. Gate triggering circuits | <p>2.1. Firing of thyristors ,pulse transformer, optical isolators</p> <p>2.2. Gate Drive/Triggering circuits: R trigger, RC trigger,</p> <p>2.3. UJT and PUT as an oscillator and triggering circuit</p> | 06 | 18% |
| III | 3. Phase Controlled (AC to DC) Converters | <p>3.1. Principle of phase controlled converter</p> <p>3.2. Operation of 1-phase half wave converter with R, RL load; Significance of free-wheeling diode ;</p> <p>3.3. 1-phase full wave converter : Center-tapped and Bridge configuration; Operation with R,RL load</p> | 08 | 12% |

| | | | | |
|----|-----------------------------------|--|----|-----|
| IV | 4. DC to DC Converters | 4.1. Basic principle of DC chopper, Classification of DC choppers, Control strategies 4.2. operation of Step-down (Buck), Step-up (Boost), Step up/down (Buck-Boost), Continuous conduction and Discontinuous conduction operation 4.3. Chopper configurations: Voltage Commutated, Current Commutated, Load Commutated Chopper 4.4. Application of DC to DC converters | 08 | 12% |
| V | 5. Inverters | 5.1. Classifications of inverters, 5.2. Single phase bridge inverters, 5.3. Series and parallel inverters | 06 | 12% |
| VI | 6. Power electronics applications | 5.4. RF heating, 5.5. battery charge controller, 5.6. Time delay circuit 5.7. BLDC motors 5.8. Power Application Controller ICs PAC5523, PAC52XX (introduction) | 07 | 20% |

PRACTICAL LAB

| Sr. No | Course outcome | Lab Activities | No. of Hrs. assigned |
|--------|----------------|--------------------------|----------------------|
| 1 | CO1 | Testing of power devices | 2 |

| | | | |
|----|-----|--|----|
| 2 | CO2 | Study of UJT relaxation oscillator | 2. |
| 3 | CO2 | Study of PUT relaxation oscillator | 2 |
| 4 | CO3 | Step up chopper | 2 |
| 5 | CO3 | Step down chopper | 2 |
| 6 | CO1 | DIAC switching characteristic | 2. |
| 7 | CO3 | Study Of AC Power Control Using TRIAC & DIAC lamp dimmer | 2 |
| 8 | CO3 | Sequential timer using IC 555 | 2 |
| 9 | CO3 | Study of inverters | 2 |
| 10 | CO4 | Study of RF heating | 2 |

SAMPLE PROJECT BASED ASSIGNMENTS

| Unit No | Course Outcome | Details | Marks |
|--------------|----------------|--|-------|
| I, | CO1 | Testing of available power devices | 10 |
| II | CO2 | Triggering of power devices using microcontroller | 5 |
| | CO2 | Thyristors phase angle control using microcontroller | 5 |
| III,IV, V | CO3 | Testing of inverter circuits | 5 |
| | CO3 | Testing of choppers circuits | 5 |
| | CO3 | Testing of Phase control rectifiers circuits | 5 |
| | CO3 | Buck converter using microcontroller | 5 |

| | | | |
|----|-----|---|---|
| VI | CO4 | Light intensity control,/fan regulator | 5 |
| | CO4 | Speed control of dc motor using microcontroller | 5 |

Note: - It is expected to build one mini project in a group of two students covering all the course outcomes. The entire mini project will be divided into five assignments.

SKILL TEST

| UNIT | Course outcome | Topic | Marks 15 |
|---------|------------------|---|----------|
| I TO VI | CO1 to CO4 | Identify different power devices and its specification Triggering of given power device Identify and test chopper /inverter circuit Prepare and test one power electronics application | 15 |

Note: - At least three skill tests should be performed in a semester.

Examination/Assessment Scheme:

| Question | Q1 | | Q2 | | Q3 | | Q4 | | Q5 | |
|--------------|-----|--------------|-----|-----|-----|-----|--------------|--------------|--------------|--------------|
| Sub-Question | A | B OR B | A | B | A | B | A OR A | B OR B | A OR A | B OR B |
| Marks | 05 | 05/05 | 04 | 06 | 04 | 06 | 04/04 | 06/06 | 04/04 | 06/06 |
| CO | CO2 | CO1 | CO4 | CO3 | CO2 | CO4 | CO1 | CO3 | CO1 | CO3 |

| | | | | | | | | | | |
|---------------------|---|---|---|---|---|---|---|---|---|---|
| Unit | 2 | 1 | 6 | 5 | 2 | 6 | 1 | 4 | 1 | 3 |
| Level of Competence | R | U | A | A | U | R | A | R | U | R |

Final Examination Chapter Weight-age Scheme:

| Chapter | Marks | |
|---------|------------|-------------|
| | Compulsory | With option |
| 1 | 13 | 26 |
| 2 | 09 | 09 |
| 3 | 06 | 12 |
| 4 | 06 | 12 |
| 5 | 06 | 06 |
| 6 | 10 | 10 |
| Total | 50 | 75 |

Final Theory Examination Course Outcome Weight-age Scheme :

| Course Outcome | Que No. | Marks | Total | Weightage% (Total/50)x100 |
|----------------|---------|-------|-------|------------------------------|
|----------------|---------|-------|-------|------------------------------|

| | | | | |
|-----|-------|---|----|-----|
| CO1 | Q1(B) | 5 | 13 | 26% |
| | Q1(B) | 5 | | |
| | Q4(A) | 4 | | |
| | Q4(A) | 4 | | |
| | Q5(A) | 4 | | |
| | Q5(A) | 4 | | |
| CO2 | Q1(A) | 5 | 09 | 18% |
| | Q3(A) | 4 | | |
| CO3 | Q2(B) | 6 | 18 | 36% |
| | Q4(B) | 6 | | |
| | Q4(B) | 6 | | |
| | Q5(B) | 6 | | |
| | Q5(B) | 6 | | |
| CO4 | Q2(A) | 4 | 10 | 20% |
| | Q3(B) | 6 | | |

Total (Internal & External) Course Outcome Weight-age Scheme :

| Sr. No. | Project Based Assignments (50 Marks) | Skill Test (15 Marks) | Practical Lab (10 Marks) | Final Practical exam (25 Marks) | Final Theory exam (50marks) | Weightage% (Total)x100 |
|---------|--|--------------------------|-----------------------------|--|--------------------------------------|---------------------------|
| CO1 | 10 | 0 | 2 | 5 | 13 | 20 |

| | | | | | | |
|-------|----|----|----|----|----|------|
| CO2 | 10 | 5 | 2 | 6 | 9 | 21 |
| CO3 | 20 | 5 | 5 | 7 | 18 | 37 |
| CO4 | 10 | 5 | 1 | 7 | 10 | 22 |
| Total | 50 | 15 | 10 | 25 | 50 | 100% |

| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | | | |

Note:-

1. Minimum 40% marks are needed for passing in internal and semester examinations for theory and practical

2. **Internal marks**

| | |
|---------------------------|----------|
| Project Based Assignments | 50 Marks |
| Practical Lab | 10 Marks |
| Skill Test | 15 Marks |

Total

75 Marks

3. **Semester Examination (Theory)**

Theory semester examination includes a two hour theory paper of 50 marks and practical/viva-voce examination of 25 marks.

- Progressive evaluation is to be done by the subject teacher as per the prevailing curriculum implementation and assessment norms.
- It is mandatory to appear for semester examination and skill tests. A student remaining absent in any of the examination/test or fails to complete the prescribed number of assignments and Laboratory experiment will not be declared successful for that examination head.

Rationale:

Students need to learn basic concepts of digital circuits and systems which leads to the design of complex digital systems such as microprocessors. The students need to know combinational and sequential circuits using digital logic fundamentals. The students will learn the design of combinational and sequential circuits. This is the course by which students get exposure to the digital electronics world.

Course Outcome: On successful completion course, students will be able

| CO | CO statement | Marks % weightage |
|-----|--|----------------------|
| CO1 | Understand the features of embedded systems, architecture of ARM7 and applications | 10 |
| CO2 | Analyze and understand the development tools of ARM | 10 |
| CO3 | Analyze and understand the programming of ARM | 20 |
| CO4 | Understand the exception, interrupts and interrupt handling schemes | 10 |
| CO5 | Understand the architectural features of LPC2148 microcontrollers | 10 |

| | | |
|------|---|----|
| CO 6 | Understand the hardware and interfacing peripheral devices to LPC2148 | 30 |
|------|---|----|

Prerequisite

Knowledge of 8051 microcontroller, C Programming language, Embedded C programming.

Learning Structure

| | |
|-------------|---|
| Application | Interrupts and interrupt handling schemes |
| Procedure | Circuit design, interfacing peripheral devices such as LED, LCD, Keypad |
| Principle | ARM structure, development tools of ARM |
| Concept | Basic programing concepts, features of embedded systems, architecture of ARM7 |
| Facts | Electronic components, features of microcontrollers |

Course Contents

Theory

| Unit | Chapter | Topic and Details | No. of Lecture s assigne d | Marks Weigh tage in % |
|------|---|---|--|--------------------------------|
| I | INTRODUCTI ON TO ARM PROCESSOR | 1.1. Introduction to embedded system and ARM Processor. 1.2. ARM related Companies and its opportunities. 1.3. ARM processor family. 1.4. Application of ARM Processor. 1.5. Compiler. 1.6. Emulation and Debugging. 1.7. Difference between RISC & CISC | 02 | 05 |
| II | Introduction to ARM LPC 2148 Controller | 2.1. LPC2148 ARM 7 microcontroller. 2.2. Features of LPC2148. 2.3. Block diagram of LPC2148. 2.4. Pin diagram of LPC2148. 2.5. Architectural overview. 2.6. On-chip flash program memory. | 06 | 10 |

| | | | | |
|-----|--------------------------|---|----|----|
| | | 2.7. On-chip static RAM | | |
| III | SYSTEM CONTROL | 3.1. Crystal Oscillator 3.2. PLL 3.3. Reset and Wake-up Timer 3.4. Brownout detector 3.5. Code Security 3.6. External Interrupt input 3.7. Memory Mapping Control 3.8. Power Control, VPB. 3.9. Pin Connect Block 3.9.1.1.1. General Purpose Parallel I/O 3.9.1.1.2. 8 Bit LED's and switches 3.9.1.1.3. Relay and Buzzer 3.9.1.1.4. Keypad 3.9.1.1.5. LCD | 12 | 20 |
| IV | TIMER, ADC, DAC, UART | 4.1 General purpose timer/ External event counters 4.2 10-bit ADC 4.3 10-bit DAC 4.4 UART Serial Communication. 4.5 Interrupt Controller. 4.6 Interrupt Sources. 4.7 External Interrupt | 15 | 30 |

| | | | | |
|----|---|--|----|----|
| V | I2C, SPI, PWM, RTC, WATCHDOG TIMER | 5.1 I2C – bus serial I/O Controller 5.2 SPI- Serial I/O Controller 5.3 Watchdog timer 5.4 Pulse Width Modulator | 06 | 20 |
| VI | ARM CORTEX Processors | 6.1 Introduction to ARM CORTEX series. 6.2 Improvement over classical series and advantages for embedded system design. 6.3 CORTEX A, CORTEX M, CORTEX R processors series, versions, features and applications. 6.4 Need of operating system in developing complex applications in embedded system 6.5 Desired features of operating system & hardware support from processor, Firmware development using CMSIS standard for ARM Cortex. 6.6 . Survey of CORTEX M3 based controllers, its features and comparison. | 04 | 15 |

75 Marks

3. **Semester Examination (Theory)**

Theory semester examination includes a two hour theory paper of 50 marks and practical/viva-voce examination of 25 marks.

- Progressive evaluation is to be done by the subject teacher as per the prevailing curriculum implementation and assessment norms.
- It is mandatory to appear for semester examination and skill tests. A student remaining absent in any of the examination/test or fails to complete a prescribed number of assignments and Laboratory experiment will not be declared successful for that examination head.

RATIONALE:

It is a prerequisite for the students to know the various total plant controls in the process industry along with its design. It is essential to know all elements of physical systems using mathematical modelling. An automatic control system saves manpower, reduces cost of production, improves the performance of the system, increases the accuracy of the final product and helps in mass production so that the knowledge of this subject is required to have deeper grasp of the control techniques as need to be studied in the subjects (in process control, process instrumentation). This course will facilitate students to use the different control systems used in various applications from simple home heating controllers using a thermostat to large Industrial control systems used for controlling processes.

COURSE OUTCOMES: On successful completion course, students will be able to:

| CO | CO statement | Marks % weightage |
|------|--|----------------------|
| CO 1 | Understand the basic elements of the control system and PLC. | 35 |
| CO 2 | Determine the stability of the control system. | 25 |

| | | |
|------|---|----|
| CO 3 | Analyze performance characteristics of the system using frequency response methods. | 25 |
| CO 4 | To create ladder diagrams for different process control applications. | 15 |

LEARNING STRUCTURE:

| | |
|-------------|---|
| Application | Servomechanism, PLC based systems, Automation in industries. |
| Procedure | Standard test inputs, Process Control using Discontinuous, Continuous and Composite control actions. |
| Principle | Block diagram reduction technique, Stability and Performance of control system (Time Domain and frequency Domain), Process Control, Ladder (programming language) diagram |
| Concept | Open loop, closed loop, Linear and non- linear systems, Time varying and time In-varying systems, State variable models, impulse response models |
| Facts | Electrical, Mechanical, Pneumatic and Hydraulic systems , ON-OFF and Composite controllers, PLC |

Course Contents

THEORY

| Unit | Chapter | Topic and Details | No. of Lectures assigned | Weight age in % |
|------|-----------------------|---|--------------------------|-----------------|
| 1 | Control system basics | Control system basics: Basic block diagram of control system and its practical examples 1.2 Classification of control systems: Open loop, closed loop, Linear and non-linear systems, Time varying and time In-varying systems. 1.3 Basic elements of servomechanism 1.4 Transfer function (TF) models of mechanical, electrical thermal, and hydraulic systems 1.5 Block diagram reduction technique: Requirement, reduction rules. 1.6 Concepts of state variable models, impulse response Models | 10 | 25 |

| | | | | |
|---|---|---|----|----|
| 2 | Standard test inputs and stability | 2.1 Standard test inputs: Step, Ramp And Parabolic And Impulse Time Response: Transient and steady state. 2.2 Stability of control system 2.3 Stability and Performance (Time Domain) 2.4 Stability and Performance (Frequency Domain) 2.5 Concept of stability | 15 | 30 |
| 3 | Process Control & Industrial Pneumatics | 3.1 Process Control System 3.2 Control Actions: 3.2.1 Discontinuous control action: ON-OFF 3.2.2 Continuous control action: Proportional 3.2.3 Composite Control actions: PI, PD, PID 3.3 Fundamentals of pneumatic control system 3.3.1 Function and applications of pneumatic components 3.3.2 Application of Pneumatics | 07 | 20 |
| 4 | PLC Basics | 4.1 Basics of PLC: Block diagram [functions of each block], Classification, Specifications 4.2 Requirements of PLC in Industries | 06 | 10 |
| 5 | PLC Logic | 5.1 PLC modules: Discrete and analog. Input / Output modules 5.2 PLC Addressing and Instruction set 5.3 Programming using Ladder programming language | 07 | 15 |

PRACTICALS

| Sr. No | Course Outcome | Laboratory Activities | No. of Hrs. assigned |
|--------|----------------|--|----------------------|
| 1 | CO1 | Introduction to Scilab and Plot standard test signals using Scilab | 02 |
| 2 | CO2 CO3 | Test step response of RC, RLC circuit | 02 |
| 3 | CO2 CO3 | Test the function of temperature control using on-off control | 02 |
| 4 | CO1 | Study of P, PI, PID controllers using Scilab | 02 |
| 5 | CO2 CO3 | Impulse response of a transfer function. / Transfer function using Scilab | 02 |
| 6 | CO2 CO3 | Time domain analysis of second order system / Time response analysis using XCOS | 02 |
| 7 | CO2 CO3 | Frequency response analysis of Lead / Lag compensating network | 02 |
| 8 | CO1 | Identify and test different parts of PLC | 02 |
| 9 | CO1 CO4 | Develop a ladder diagram to test the function of logic gates. | 02 |
| 10 | CO1 CO4 | Develop ladder diagrams for Adder and Subtractor. | 02 |
| 11 | CO1 CO4 | Develop ladder diagram for ON and OFF control of lamp using timer and counter. | 02 |

| | | | |
|----|---------|---|----|
| 12 | CO1 CO4 | Develop ladder diagram for temperature control system | 02 |
| 13 | CO1 CO4 | Develop ladder diagram for Parking system | 02 |

SAMPLE PROJECT BASED ASSIGNMENTS:

| Sr. No | Course outcome | Assignments | Marks |
|--------|----------------|---|-------|
| 1 | CO1 | Prepare a report on different control systems used in regular applications. | 10 |
| 2 | CO1 | Prepare reports on different controllers available in the market. | 10 |
| 3 | CO1 | Visit nearby Institute / Industry and prepare a report on different processes available and control systems used to control it. | 10 |
| 4 | CO2 CO3 | Test on-off controller for the given type of control loop and prepare a report. | 10 |
| 5 | CO1 | Do the market survey of different manufacturers of PLC and submit the small survey report of at least two manufacturers of PLC. | 10 |
| 6 | CO1 | Develop a ladder diagram and for Automatic door control system. | 10 |
| 7 | CO4 | Industry visit :Automation (Pneumatic/PLC based) After industry visit, submit technical reports along with micro Observation of small things. b) Prepare technical specification list of PLC. c) Operational and maintenance practices of PLC and Pneumatic based systems. | 10 |

| | | | |
|---|-----|---|----|
| | | d) Download any one video of PLC based applications and share with your friend on Google classroom. | |
| 8 | CO4 | Develop a ladder diagram for any applications of process control. | 10 |

Note: - It is expected to build one mini project in a group of two students covering all the course outcomes. The entire mini project will be divided into five assignments.

SKILL TEST:

| Sr. No | Course Outcome | Topic | Marks |
|--------|----------------|--|-------|
| 1 | CO2 | Study performance of the RC /LC/RLC circuits of given system | 5 |
| 2 | CO2 | Study and test performance of time response of a given system | 5 |
| 3 | CO3 | Comment on stability of given system | 5 |
| 4 | CO3 | Performance analysis of given PLC based system | 5 |
| 5 | CO1 CO4 | Prepare and Test a ladder diagram for traffic light control system. | 5 |
| 6 | CO1 CO4 | Prepare and Test a ladder diagram for toggle the lamp using timer and counter. | 5 |
| 7 | CO1 CO4 | Prepare and Test a ladder diagram for water level system. | 5 |

Note: - At least three skill tests should be performed in a semester.

EXAMINATION/ASSESSMENT SCHEME:

| Question | Q1 | | Q2 | | Q3 | | Q4 | | Q5 | |
|---------------------|----|--------------|----|----|----|----|--------------|--------------|--------------|--------------|
| Sub-Question | A | b OR b | a | b | a | b | a OR a | b OR b | a OR a | B OR b |
| Marks | 05 | 05 | 04 | 06 | 04 | 06 | 04 | 06 | 04 | 06 |
| CO | 03 | 02 | 04 | 02 | 01 | 03 | 01 | 04 | 02 | 01 |
| Unit/Chapter | 02 | 03 | 05 | 01 | 03 | 02 | 01 | 04 | 02 | 05 |
| Level of Competence | U | U | A1 | R | U | A2 | U | R | R | R |

R Remember - 22, U Understand - 18, A1 Apply - 4, A2 Analyze - 6, E Evaluate - 0, C Create – 0

FINAL EXAMINATION CHAPTER WEIGHT-AGE SCHEME:

| Chapter | Marks | |
|---------|------------|-------------|
| | Compulsory | With option |
| 1 | 10 | 14 |
| 2 | 15 | 19 |
| 3 | 09 | 14 |
| 4 | 06 | 12 |
| 5 | 10 | 16 |
| Total | 50 | 75 |

Final theory examination course outcome weight-age scheme:

| Course Outcome | Que No. | Marks | Total | Weightage% (Total/50)x100 |
|----------------|--------------|-------|-------|------------------------------|
| CO1 | 3(a) | 04 | 14 | 28 |
| | 4(a)/ 4(a) | 04 | | |
| | 5(b) / 5 (b) | 06 | | |
| CO2 | 1(b)/1(b) | 05 | 15 | 30 |
| | 2(b) | 06 | | |
| | 5(a)/ 5(a) | 04 | | |
| CO3 | 1(a) | 05 | 11 | 22 |

Course Name : Diploma in Electronics
Semester : VI
Subject Name : DIGITAL SYSTEM DESIGN
Subject Code : DE 6004

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | |
|---|------------------|-------------------|--------|---|------------------------------|--------------------------------|-----------------------------------|---------------------------|
| Theory Hrs. | Tutorial Hrs. | Practical Hrs. | Credit | Semester Exam Duration (TH/PR)Hours | Internal Marks (TH+PR) | Semester Exam Marks (TH) | Semester Exam Marks (PR) | Total Marks (TH/PR) |
| 03 | 00 | 02 | 04 | 02 | 75 | 50 | 25 | 150 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | | |

Note:-

1. Minimum 40% marks are needed for passing in internal and semester examinations for theory and practical

2. Internal marks

| | |
|---------------------------|----------|
| Project Based Assignments | 50 Marks |
| Practical Lab | 10 Marks |
| Skill Test | 15 Marks |
| Total | 75 Marks |

3. Semester Examination (Theory)

Theory semester examination includes a two hour theory paper of 50 marks and practical/viva-voce examination of 25 marks.

- Progressive evaluation is to be done by the subject teacher as per the prevailing curriculum implementation and assessment norms.
- It is mandatory to appear for semester examination and skill tests. A student remaining absent in any of the examination/test or fails to complete the prescribed number of assignments and Laboratory experiment will not be declared successful for that examination head.

Rationale:

The students need to learn basic concepts of digital circuits and systems which leads to the design of complex digital systems such as microprocessors. The students need to know combinational and sequential circuits using digital logic fundamentals. The students will learn the design of combinational and sequential circuits. This is the course by which students get exposure to the digital electronics world.

Course Outcome: On successful completion course, students will be able

| CO | CO statement | Marks % weightage |
|-----|--|----------------------|
| CO1 | To design and analyze combinational circuits using VHDL based VLSI design flow | 30 |
| CO2 | To design and analyze sequential circuits using VHDL based VLSI design flow | 30 |
| CO3 | To design and analysis preview of digital circuits using PLDs | 30 |
| CO4 | Understand CPLDs and FPGAs | 10 |

Prerequisite

Basic Electronics and Digital logic circuits

Learning Structure

| | |
|-------------|---|
| Application | Sequential, Combinational machines, memory devices , complex digital machines |
| Procedure | Mealy/ moore machine designing procedure, combinational circuit design procedure, compilation, simulation and synthesis procedure of VHDL |
| Principle | Modelling principles of VHDL, principles of logic reduction, Mealy and Moore machine principles |
| Concept | Logic circuit reduction, Finite state machines, combinational and sequential machines, PLDs and FPGAs architectures |
| Facts | Electronic components, number system, boolean algebra, logic gates, memory devices, Integrated circuits, VLSI libraries, PLDs and FPGAs |

Course Contents

Theory

| Unit | Chapter | Topic and Details | No. of Lectures assigned | Weight age in % |
|-------------|---|---|---------------------------------|------------------------|
| I | Introduction to Finite State Machines (FSM) | 1.1 Need for state machines state machine, basic concepts in state machine analysis 1.2 Mealy Sequential Circuit Design 1.3 Moore Sequential Circuit Design Equivalent States | 02 | 05 |
| II | Introduction to VHDL | 2.1 Introduction to VHDL Hardware Description Languages VHDL Description of Combinational Circuits VHDL Modules 2.2 Sequential Statements and VHDL Processes Modeling Flip-Flops Using VHDL Processes Processes Using Wait Statements Compilation, Simulation, and Synthesis of VHDL Code VHDL Data Types and Operators Simple Synthesis Examples. | 06 | 10 |

| | | | | |
|-----|--|---|----|----|
| III | Combinational logic circuit design and VHDL implementation | <p>Introduction</p> <p>3.1.1 Full Adder and Subtractor</p> <p>3.1.2 Decoder and Encoder</p> <p>3.1.3 ALU and Barrel Shifter</p> <p>3.1.4 4X4 keyboard encoder</p> <p>3.1.5 Multiplexer and Demultiplexer</p> <p>3.1.6 Multiplier and Divider</p> <p>3.1.7 Hamming code encoder and correction circuits</p> <p>3.1.8 BCD to 7-Segment Display Decoder</p> <p>3.1.9 BCD Adder</p> <p>3.1.10 Traffic Light Controller</p> <p>State Graphs for Control Circuits</p> | 12 | 20 |
| IV | Synchronous state machine design and VHDL implementation | <p>4.1 Sequential counters</p> <p>4.2 State changes referenced to clock Number of state flip-flops Input and Output forming logic</p> <p>4.3 Generation of a state diagram from a timing chart ,Redundant states</p> <p>4.4 General state machine architecture</p> <p>4.5 Concept of asynchronous state machine and</p> | 15 | 30 |

| | | | | |
|----|------------------------------|--|----|----|
| | | <p>comparison to synchronous state machine</p> <p>4.6 Design and VHDL implementation of FSMs Linear feedback shift register (pseudorandom and CRC)</p> <p>4.7 VHDL Models for Multiplexers. VHDL Libraries Modeling Registers and Counters Using VHDL Processes</p> <p>4.8 Behavioral and Structural VHDL Variables, Signals, and Constants, Arrays, Loops in VHDL</p> | | |
| V | Programmable Logic Devices | <p>5.1 Introduction to Programmable Logic Devices Read-Only Memory</p> <p>5.2 Programmable Logic Arrays (PLA)</p> <p>5.3 Programmable Array Logic (PAL)</p> <p>5.4 Combinational PLD-Based State Machines</p> <p>5.5 State Machines on a Chip</p> | 06 | 20 |
| VI | CPLD –Altera Series and FPGA | <p>6.1 Introduction to Programmable Logic Devices</p> <p>6.2 Programming and applications using complex programmable logic devices Altera series</p> | 04 | 15 |

| | | | | |
|--|--|--|--|--|
| | | 6.3 FPGA – Logic blocks, routing architecture, Design flow, Technology Mapping for FPGAs | | |
|--|--|--|--|--|

PRACTICALS

| Sr. No | Course Outcome | Laboratory Activities | No. of Hrs. assigned |
|--------|----------------|---|----------------------|
| 01 | CO1,CO2 | Introduction to Quartus II, VHDL | 02 |
| 02 | CO1,CO2 | Introduction to VLSI Kit | 02 |
| 03 | CO1 | Compile, Simulate and Synthesize a VHDL program to performs Gate operations | 02 |
| 04 | CO1 | Compile, Simulate and Synthesize a VHDL program to perform 4:1 multiplexer operation using when else code. | 02 |
| 05 | CO1 | Compile, Simulate and Synthesize a VHDL program to perform 4:1 multiplexer operation using with select code. | 02 |
| 06 | CO1 | Compile, Simulate and Synthesize a VHDL program to perform a 4:1 multiplexer operation using process and If else statement. | 02 |

| | | | |
|----|-----|---|----|
| 07 | CO1 | Compile, Simulate and Synthesize a VHDL program to performs 4:1 multiplexer operation using case select statement | 02 |
| 08 | CO1 | Compile, Simulate and Synthesize a VHDL program to performs adder operations | 02 |
| 09 | CO1 | Compile, Simulate and Synthesize a VHDL program to subtraction operations | 02 |
| 10 | CO1 | Compile, Simulate and Synthesize a VHDL program for encoder operations | 02 |
| 11 | CO1 | Compile, Simulate and Synthesize a VHDL program for decoder operations | 02 |
| 12 | CO2 | Compile, Simulate and Synthesize a VHDL program for flip-flop operations | 02 |
| 13 | CO2 | Compile, Simulate and Synthesize a VHDL program for counter operations | 02 |
| 14 | CO2 | Compile, Simulate and Synthesize a VHDL program for register operations | 02 |

Sample Project Based Assignments:

| Sr. No. | Course Outcome | Details | Marks |
|---------|----------------|---|-------|
| 1 | CO1 | Simulate Basic logic gates/ universal gates or XOR and XNOR using VHDL code | 5 |
| | CO1 | Simulate combinational logic circuit using VHDL code (Half adder/full adder/half subtractor/Full subtractor /multiplexer /de-multiplexer /encoder /decoder) | 5 |
| 2 | CO2 | Simulate sequential logic circuit using VHDL code (SR f/f,, D f/f, JK f/f, T f/f,) | 5 |
| | CO2 | Simulate sequential logic circuit using VHDL code (3-bit UP counter / 3- Bit DOWN counter) | 5 |
| | CO2 | Simulate SISO/SIPO/PISO/PIPO shift register using VHDL code | 5 |
| 3 | CO3 | Simulate a PROM circuit using VHDL code for given machine. | 5 |
| | CO3 | Simulate PAL circuit using VHDL code for given machine. | 5 |
| | CO3 | Simulate PLA circuit using VHDL code for given machine. | 5 |
| 4 | CO4 | Implementation of given machine using CPLD | 5 |
| | CO4 | Implementation of given machine using FPGA | 5 |

Note: - It is expected to build one mini project in a group of two students covering all the course outcomes. The entire mini project will be divided into five assignments.

Skill Test

| Unit No | Course Outcome | Details | Marks |
|---------|----------------|---|-------|
| I to VI | CO 1 to 4 | Interpret the operations. Interpret the variation in hardware depending on the used loop. Debug program. Simulate VHDL program, Find faults in circuits. Synthesize VHDL program Making of mini Project | 15 |

Examination/Assessment Scheme:

| Question | Q1 | | Q2 | | Q3 | | Q4 | | Q5 | |
|--------------|----|--------------|----|---|----|---|--------------|--------------|--------------|--------------|

| Skill Test | 15 Marks |
| Total | 75 Marks |

3. Semester Examination (Theory)

Theory semester examination includes a two hour theory paper of 50 marks and practical/viva-voce examination of 25 marks.

- Progressive evaluation is to be done by the subject teacher as per the prevailing curriculum implementation and assessment norms.
- It is mandatory to appear for semester examination and skill tests. A student remaining absent in any of the examination/test or fails to complete a prescribed number of assignments and Laboratory experiment will not be declared successful for that examination head.

Rationale:

Embedded Operating Systems intends to learn the students about the basic concepts and kernel architecture of Embedded Operating Systems. This type of operating system is typically designed to be resource-efficient and reliable. The hardware running an embedded operating system can be very limited in resources

such as RAM and ROM, therefore embedded design of these operating systems may have a narrow scope tailored to a specific application in order to achieve desired operation under these constraints. The students will be able to decide optimal hardware configuration for the embedded application and the ability to develop a programmable embedded platform.

Course Outcome: On successful completion course, students will be able to :

| CO | CO statement | Marks % weightage |
|-----|--|----------------------|
| CO1 | To decide optimal hardware configuration for the embedded application. | 15 |
| CO2 | To understand the basic concepts and kernel architecture of Embedded Operating Systems. | 18 |
| CO3 | To demonstrate Embedded Operating Systems functionality on Free RTOS and Arduino platform. | 33 |
| CO4 | To develop Embedded Operating systems for Embedded systems and IoT application | 34 |

Learning Structure:

| | |
|-------------|--|
| Application | Embedded System with Embedded Operating Systems. Application of programming for given task |
| Procedure | Decide optimal hardware configuration for the embedded application. Effective use of Embedded Operating Systems. |

| | |
|-----------|--|
| Principle | Principles of working of Embedded Hardware, Programming, creating, deleting, suspending tasks and interrupt handling, Memory Managements |
| Concept | Computer resources, input output and storage. Concept of programming, library |
| Fact | Embedded Hardware , Computer, software's (IDE software and Embedded Operating System platforms) |

Course Contents

PRACTICALS

| Sr. No. | Course Outcome | Lab Activities | No. of Hr. assigned |
|----------------|-----------------------|--|----------------------------|
| 1 | CO3 | Free RTOS Arduino Getting Started Example. Arduino IDE and installed the RTOS library. | 4 |
| 2 | CO1,CO3 | Develop a Program to Creating, Deleting and Delaying task in Free RTOS and Arduino | 4 |
| 3 | CO1,CO3 | Develop a Program to Suspending and Resuming task in Free RTOS and Arduino | 4 |
| 4 | CO1,CO3 | Develop a Program to Handling Interrupt in Free RTOS and Arduino | 4 |
| 5 | CO1,CO3 | Develop a Program to Queue Management – Read/Write to Queues in Free RTOS and Arduino | 4 |
| 6 | CO1,CO3 | Develop a Program to Inter -task Communication Queue in Free RTOS and Arduino | 4 |
| 7 | CO1,CO3 | Develop a Program Direct To Task Notifications in Free RTOS and Arduino | 4 |

| | | | |
|----|-----------------|--|---|
| 8 | CO1,CO3 | Develop a Program Mutex Scheduling in Free RTOS and Arduino | 4 |
| 9 | CO1,CO3 | Develop a Program Memory Managements in Free RTOS and Arduino | 4 |
| 10 | CO1,CO3 | Develop a Program Stack Space Managements in Free RTOS and Arduino | 4 |
| 11 | CO1,CO3 | Develop a Program Low Power Management in Free RTOS and Arduino | 4 |
| 12 | CO3 | Installation to Embedded Network Operating System | 4 |
| 13 | CO2,CO3 .CO4 | Develop a Program Asynchronous TCP/IP client Asynchronous TCP/IP client and multi-core task implementation | 4 |
| 14 | CO2,CO3 .CO4 | Develop a Program for IoT application | 4 |
| 15 | CO2 CO4 | Develop a Program for Wireless Sensor N/W with five nodes and one Routers | 4 |

SAMPLE PROJECT BASED ASSIGNMENTS

| Sr. No | Course outcome | Assignments | Marks |
|--------|----------------|--|-------|
| 1 | CO1,CO2 | Identify embedded systems applications around you and list hardware used. Also identify kernel architecture of Embedded Operating Systems. | 10 |
| 2 | CO3 | Explore the library function available in Free RIOS | 10 |
| 3 | CO2,CO3 | Decide the Embedded System Application and Collect required hardware of your application. | 10 |
| 4 | CO4 | Develop Embedded Operating Systems for decided Above Application | 10 |

| | | | |
|---|-----|--|----|
| 5 | CO4 | Develop Embedded Systems with Embedded Operating Systems | 10 |
|---|-----|--|----|

Note: - It is expected to build one mini project in a group of two students covering all the course outcomes. The entire mini project will be divided into five assignments.

SKILL TEST

| Sr. No | Course Outcome | Topic | Marks |
|--------|----------------|---|-------|
| 1 | CO3 | Develop a Program to Suspending and Resuming task in Free RTOS and Arduino | 5 |
| 2 | CO3 | Develop a Program Memory Managements in Free RTOS and Arduino | 5 |
| 3 | CO4 | Develop a Program to communication with other device in Free RTOS , Arduino, Bluetooth devices...etc. | 5 |

Examination/Assessment Scheme:

| Question | Q1 | | Q2 | | Q3 | | Q4 | | Q5 | |

Course Name : Diploma in Electronics

Semester : VI

Subject name : MAJOR PROJECT-I

Subject Code : DE 6006

Teaching and Examination Scheme:

| | | |
|-----------------|--------------------|--|
| Teaching scheme | Examination Scheme | |
|-----------------|--------------------|--|

| Theory Hrs. | Tutorial Hrs. | Practical Hrs. | Credit | Semester Exam Duration (TH/PR)Hours | Internal Marks (TW+PR) | Semester Exam Marks (TH) | Semester Exam Marks (PR) | Total Marks (TW+PR) |
|---|---------------|----------------|--------|-------------------------------------|------------------------|--------------------------|--------------------------|---------------------|
| 00 | 00 | 08 | 04 | 00 | 100 | 00 | 00 | 100 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | | |

Note:

1. Minimum 40% marks are needed for passing in Internal Term work (TW) and Practical examination

2. Internal Marks

| | |
|-----------------------|-----------|
| Term Work | 50 Marks |
| Practical Examination | 50 Mark |
| Total | 100 Marks |

- Term Work marks will be given based on the performance of student in Assignments (Assignments in Annexure A) given throughout semester
- Practical Examination will consist of a review session where students of a concerned group will present their project idea, prototype, implementation methods, budget, and project deadline. Students will be assessed based on Criteria as mentioned in Annexure B

Rationale:

Change is the only constant; technology is rapidly changing due to high speed developments. To pace with the modern technology, it is important for diploma electronics graduates to develop self-learning skills. The course “Major Project-I” is designed with an aim to meet self-learning capabilities along with project management. This includes project selection, planning, design thinking within the time allocated along with documentation.

The Major Project I is also included with Seminar with the aim to develop certain set of

Communication skills (drafting survey questions and writing survey report performing requisite lab experiments , writing conclusions of the work done and physical phenomenon observed, participating in group discussions, verbally defending the project in the form of Seminar etc.)

Course Outcome: On successful completion course, students will be able

| CO | CO statement | Marks % Weightage |
|-----|--|----------------------|
| CO1 | To select and draft project problem statement and write specifications. | 30 |
| CO2 | To test the feasibility of practical implementation of defined problem statement | 30 |
| CO3 | Apply project management techniques | 30 |
| CO4 | To communicate effectively and confidently as a member of a team | 10 |

ROADMAP FOR PROJECT GUIDES:

1. The project work is proposed to be carried out during the VI and VII semesters so that learners prepare during the VI semester, do some field work based on the preparation during the mid-semester vacation and report the analysis and inferences during the VII semester.
2. The learners would reach a level of maturity by the time they reach VI semester and so a meaningful project lasting for a year can be executed by them.
3. To execute the project with involvement needs constant guidance and monitoring of the progress of the learners by the guide.
4. This does not mean teacher has to advice learners.
5. be confident about the ability of the learner and “intellectually provoke” them with challenging questions. These questions should prompt the learners to search information and update themselves (to be carried out during the first two weeks).

6. Do not feed information to learners. Instead create a 'cognitive dissonance' (a challenging question or situation that the learner is not able to find an immediate answer but feels the need to search for information to find a solution).
7. Defer judgment on learners and give them identified sources if required like a journal article, book or a web site.
8. Even if the learners report their inability to solve do NOT give or prescribe a solution.
9. Be patient and give time for the learner to construct his knowledge.
10. Give corrective feedback to the learner by challenging his solutions so that his logic is questioned and it develops further.
11. This leads to the first activity viz., literature survey and conceiving a project.
12. During this phase meet the project team in a group and create a healthy competition among the learners to search different sources and synthesize their findings in the group.
13. Aim for bringing out a workable innovative project conceived within the first eight weeks as given in the schedule attached.
14. During these two phases and the third phase the teacher should assess the strengths and weakness of the members of the group and allocate differential work to team members on the remaining tasks to be carried out during the next thirty weeks.
15. This is to ensure active participation of all the members of the team.
16. By the end of the twelfth week finalize the project and a schedule of further activities for each member indicating the time frame in which his activities are to be executed may be made ready. A soft copy of this schedule may be collected from each learner by the guide to follow up.
17. This schedule prepared by each learner need to be documented for checking further progress of the project.
18. The next few phases of the project may require active guidance of the guide especially regarding the sources of collecting data, if a sample data is to be collected the number of units has to be decided, collating the data/fabricating, tryout/analysis and finally coming out with meaningful conclusions or models or application
19. Data like models, designs, technical specifications, source code, protocols and original records need be collected from one authentic source as there will not be any variation. The teacher may guide the learners to authentic source.
20. Data having limited variability like product/service quality, processes and standards, procedures need to be collected from a sample as there is a variation. The number of units from whom (source) the data is to be collected is called sample. The sample needs to be representative of the expected variation. The

decision on the size of the sample and the number of units need guidance from the teacher. For example, data regarding the quality of a product/service need be collected from 3 to 5 personnel at different levels of a service provider or dealers of a product. The numbers given are suggestive but a guide based on his experience has to make valid suggestions.

21. Data having a wide range of variation like customer satisfaction where the customers are members of the public need a larger number of units to accommodate the diversity. A tool like questionnaire with predetermined questions need to be prepared, tried out on a small sample and finalize the questions. Data may be collected from at least 30 units. This number is suggested to apply statistical analysis for meaningful conclusions. Guides may decide on the sample size depending on the accessibility of data.

22. The intention of the above three points viz., 19, 20 and 21 is to ensure objectivity in data collection i.e., to reduce the subjectivity of the human mind.

23. All the above activities need to be completed before three to four weeks before the end of VI semester (refer the spread sheet related to scheduling).

24. The learners may be instructed to collect data objectively with identified sample during the next 4 to six weeks which includes the mid semester holidays. This would enable the learners to visit the field and collect data without the constraint of reporting to institution and attending classes on a regular basis.

25. The collected data need to be organized and entered to spread sheets or similar formats for analysis. Qualitative data may be converted to quantitative using a rating scale or similar data organization procedures.

26. The result of most analysis on spreadsheet could be obtained in tables or graphs as per the requirement.

27. Activities mentioned in points 24, 25 and 26 may be carried out by learners during 4 to 8 weeks after commencement of VII semester.

28. Interpretation of the analyzed tables and graphs to arrive at meaningful inference. The guide at this stage may defer his ideas on interpretation allowing the learners to do this. In case the learners err in the process they may be given corrective feedback.

29. A report of the whole process of doing the project may be written, word processed and submitted as mentioned.

30. Guides may contact industries and try to solve their problems so that the learners get a field experience and they get ready for the industry.

31. Innovations and innovative practices may be encouraged among the learners to be pursued as a project. Developing prototypes, (in simulation or real) trying out feasibility of new ideas, changing existing systems by adding modules, combining, assembling new modules and developing new systems may be given higher priority over routine bookish projects.

32. The schedule of events proposed is for an investigative project as a model. Guides may alter the prescribed schedule to suit the kind of innovative projects sited in point No.31 above.

33. Industry personnel may be involved in conceiving, executing and evaluating projects. This gives credibility to the institute and acceptance of learners for absorption into the company.

GUIDELINES TO LEARNERS TO COMPLETE PROJECT:

1. On the basis of 6th Sem. Preparation, field work should be done during the mid-Semester vacation and reporting of analysis and inferences should be done in the VII semester.
2. You have the ability and the level of maturity needed to conceive an innovative and meaningful project accomplishing which gives you recognition by the industry and empowers you with the power of knowledge.
3. Understand your strength and weakness and make an effort to find the strength and Weakness of other peers in the team.
4. Complement each other's strength rather than compete with peers within the team. This will enable you to complete a comprehensive and innovative project relevant to the industrial needs rather than doing a routine copy of what others have done.
5. Seek guidance from the teacher and update him/her about the progress.
6. Be confident about your ability and that of other members of your group. Take extra efforts to collect information, share with your peers and synthesize your knowledge.
7. Question everything including the ideas of your teacher. Accept the ideas and instructions which are internally consistent (logical).
8. Involve actively in group activities and contribute towards the tasks.
9. Do not depend too much on the teacher as a source of information, search on your own and build your knowledge structure. Search for authentic sources like journal articles, books and authentic sites rather than blogs and tweets.
10. Though brief, record your thoughts and activities including searches immediately.
11. Prepare a schedule for your work on a spread sheet and encourage your peers to do the same.

12. Show your schedule and that of others to the teacher and get his feedback.
13. Keep reviewing the schedule every fortnight and take corrective steps if needed. For doing this keep the general guideline schedule given in the curriculum as a backdrop.
14. Tools used for data collection like instruments, testing machines, questions to be asked and software may be tried out and standardized by the twelfth week of the project. Seek the teacher's help who is experienced in doing this.
15. Collect data dispassionately or objectively (without applying your personal prejudice). Complete this task before the VII semester begins.
16. While entering data into the spread sheet ask your peer member to verify. This will ensure accuracy of data entry.
17. Use appropriate mathematics/statistics for calculations. Seek help from external sources (other than your teacher) if required.
18. The results of your analysis need to be graphically represented and documented. You may also add photographs and video clips to increase the validity.
19. This task needs to be completed within 8 weeks after commencement of VII semester.
20. Interpret the data (after analysis) and arrive at meaningful inferences on your own in discussion with your peers. Get it ratified by your teacher.
Suggestions from the teacher may be discussed among your peers and incorporated if they are internally consistent.
21. The project report may be word processed (videos, photographs attached in soft copy) and submitted in triplicate two weeks before the end of VII semester.
22. Involve passionately in the team work, make constructive contributions and come out with an industry friendly project which will equip you in your professional development.

ASSIGNMENTS :

| Sr. No. | Assignment | Marks |
|---------|------------|-------|
|---------|------------|-------|

| | | |
|---|--|----|
| 1 | Idea generation using one of the following methods- Disrupt method , Mind mapping method, Brain storming Method | 10 |
| 2 | Idea evaluation using one of the following methods- Decision matrix , Paired comparison, 5Q Method | 10 |
| 3 | Implementation methodologies Project life cycle ,Stake holder analysis, Scope planning, Cost, Risk , Procurement and Schedule management, Introduction to agile project management, Project Closure | 10 |
| 4 | Prototyping/Modelling | 10 |
| 5 | Questionnaire for idea validation | 10 |

ASSESSMENT CRITERIA

| Sr. No. | Criteria | Marks |
|---------|--------------------------------------|-------|
| 1 | Project Identification | 10 |
| 2 | Punctuality and overall contribution | 10 |
| 3 | Innovation and feasibility | 10 |
| 4 | Plan Execution | 10 |
| 5 | Presentation | 10 |
| Total | | 50 |

Course Name : Diploma in Electronics

Semester : VII

Subject name : Electronics Surveillance and Security (Elective)

Subject Code : DE 7101

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | |
|-----------------|---------------|----------------|--------|-------------------------------------|--------------------------|--------------------------|--------------------------|---------------------|
| Theory Hrs. | Tutorial Hrs. | Practical Hrs. | Credit | Semester Exam Duration (TH/PR)Hours | Internal Marks (TH + PR) | Semester Exam Marks (TH) | Semester Exam Marks (PR) | Total Marks (TH/PR) |
| 3 | 0 | 2 | 4 | 2 | 75 | 50 | 25 | 150 |

Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral

Note:-

1. Minimum 40% marks are needed for passing in internal and semester examinations for theory and practical

2. Internal marks

| | |
|---------------------------|----------|
| Project Based Assignments | 50 Marks |
| Practical Lab | 10 Marks |
| Skill Test | 15 Marks |
| Total | 75 Marks |

3. Semester Examination (Theory)

- Theory semester examination includes a two-hour theory paper of 50 marks.
- Practical semester examination includes a two-hour Practical/Viva of 25 marks.
- Progressive evaluation is to be done by the subject teacher as per the prevailing curriculum implementation and assessment norms.
- It is mandatory to appear for semester examination and skill tests. remaining absent in any of the examination/test or fails to complete the prescribed number of assignments and Laboratory experiment will not be declared successful for that examination head.

Rationale:

Electronics security industry has developed over a decade and become industry standard across the worldwide.

The CCTV Camera Security Industry has grown at rapid pace with development happening in all the Tier 1, Tier 2 and Tier 3 Cities across all spectrum right from housing colonies, government departments and commercial establishments.

Every small and big businesses have opted for the latest advanced technologies in the electronics surveillance and security systems.

Electronics surveillance and security industry needs qualified trained professionals and this course is introduced to students to developed skills as per industry requirements.

Course Outcomes: On successful completion course, students will be able to:

| CO | CO Statement | Marks % Weightage |
|-----|---|----------------------|
| CO1 | Understand the Security & Surveillance System in terms of equipment, system, tools. | 51% |
| CO2 | Install & maintain the security & Surveillance System | 49% |

Prerequisite

Basics knowledge of electronics communication systems and devices.

Learning Structure:

| | |
|-------------|---|
| Application | CCTV security & surveillance Monitoring Detecting. |
| Procedure | Installation and maintenance electronics surveillance and security systems |
| Principle | Back light compensation, ICR Digital Zoom Motion detection wall mount, ceiling mount. |
| Concept | Configuration of electronic surveillance and security devices. |
| Facts | CCTV cameras. cables & connectors DVR Monitor display Smoke detector, Passive infrared detectors etc.. |

Course Contents:

THEORY

| Unit | Chapter | Topic and Contents | Hours | % Weightage |
|------|---|---|-------|----------------|
| I | 1.Introduction to Electronics surveillance and security systems | 1.1 Features, components, system configuration of different electronics surveillance and security systems 1.2 The Role of Video in Asset Protection | 05 | 18 |
| II | 2.Basic of CCTV cameras | 2.1 Camera types and uses: - Fixed and movable, indoor and outdoor monochrome and colour, day and night. 2.2 Camera specifications: - Sensitivity, signal to noise ratio and resolution 2.3 Types of camera – Box, Bullet, IP, Wireless Cameras Lens types: - Fixed and variable focal length, manual and motorised zoom. Use of lens calculator | 08 | 22 |
| III | 3.CCTV Networking and Recording | 3.1 Introduction to DVR Access controls and NVR technologies 3.2 Password Management, Power over Ethernet Concepts and Open Network Video Interface Forum (ONVIF). 3.3 Network configurations of CCTV systems 3.4 Storage Calculation Concepts, Play and up of security systems. 3.5 Cloud Technologies related to CCTV Camera based Security systems 3.6 Planning ,marketing in office automation and site survey | 10 | 20 |

| | | | | |
|----|---|--|----|----|
| IV | 4. Installation of CCTV | 4.1 Installation techniques like Wall Mount and ceiling mount 4.2 Camera addressing setting 4.3 Protocol & baud rate setting 4.4 Configuration and Setting of advance features like auto scan, camera power, Back light compensation ICR, Digital Zoom. Focus mode, Iris mode, white balance mode and motion detection. 4.5 Maintenance of CCTV security systems | 10 | 20 |
| V | 5. Installation and testing of Smoke detectors & Alarm System | 5.1 Introduction to Smoke detectors & Alarm System Design, principle, sensor type 5.2 Passive infrared detectors 5.3 Electrical and Mechanical parts of smoke detector & Alarm System Installation, 5.4 Testing and checking of smoke detector & Alarm System | 12 | 20 |

PRACTICAL LAB

| Sr. No | Course outcome | Lab Activities | No. of Hrs assigned |
|--------|----------------|--------------------------------|---------------------|
| 1 | CO1 | Set up a Camera | 2 |
| 2 | CO1 | Set up a Monitor | 2. |
| 3 | CO1 | Set up Network devices | 2 |
| 4 | CO1 | Set up Encoder and Decoders | 2 |
| 5 | CO1 | Set up recording devices (DVR) | 2 |
| 6 | CO1 | Set up Server and Storage | 2 |
| 7 | CO1 | Set up UPS | 2 |
| 8 | CO2 | Connect & test system elements | 2 |
| 9 | CO2 | Set up smoke detector | 2 |
| 10 | CO2 | Set up Alarm system | 2 |

PROJECT BASE ASSIGNMENTS

| Unit No | Course Outcome | Details | Marks |
|----------|----------------|--|-------|
| I,II,V | CO1 | Identify the different component of CCTV system, smoke detectors / Alarm system with its features and specifications | 10 |
| I,II,V | CO1 | Planning ,marketing in office automation and Site survey | 10 |
| III,IV,V | CO2 | Electrification and wiring the site. | 10 |
| III,IV,V | CO2 | Perform Testing and Commissioning. | 10 |
| III,IV,V | CO2 | Perform Trouble shooting and maintenance | 10 |

Note: - At least three project based assignments should be performed in a semester covering at least one assignment from each CO.

SKILL TEST

| UNIT | Course outcome | Topic | Marks |
|-----------|----------------|--|-------|
| | | | 15 |
| I ,II,III | CO1 | Identifying the different parts of CCTV Surveillance, with its working and uses. | 8 |
| IV,V | CO2 | Testing of smoke detector and alarm systems. | 2 |
| | CO2 | Setup a security and surveillance system with specified requirement | 5 |

Note:-At least three skill tests should be performed in a semester.

Examination/Assessment Scheme:

| Question | Q1 | | Q2 | | Q3 | | Q4 | | Q5 | |
|--------------|-----|--------------|-----|-----|-----|-----|--------------|--------------|--------------|--------------|
| Sub-Question | A | B OR B | A | B | A | B | A OR A | B OR B | A OR A | B OR B |

Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral

Note:-

1. Minimum 40% marks are needed for passing in internal and semester examinations for theory and practical

2. Internal marks

| | |
|---------------------------|----------|
| Project Based Assignments | 50 Marks |
| Practical Lab | 10 Marks |
| Skill Test | 15 Marks |
| Total | 75 Marks |

3. Semester Examination (Theory)

- Theory semester examination includes a two-hour theory paper of 50 marks.
- Practical semester examination includes a two-hour Practical/Viva of 25 marks.
- Progressive evaluation is to be done by the subject teacher as per the prevailing curriculum implementation and assessment norms.

- It is mandatory to appear for semester examination and skill tests. remaining absent in any of the examination/test or fails to complete the prescribed number of assignments and Laboratory experiment will not be declared successful for that examination head.

Rationale:

Present computing era is based on internet and hence networking is an essential part of course. Prime concern is that in current advanced digital world various security threats are increasing day by day posing problems to data confidentiality, integrity and availability. This course aims at learning basic cryptography techniques and applying security mechanisms for operating systems as well as private and public network to protect them from various threats.

Course Outcomes: On successful completion course, students will be able to:

| CO | Statement | Marks % Weightage |
|-----|---|----------------------|
| CO1 | Use basic concepts of networking for setting up computer network. | 37 |
| CO2 | Identify and describe the common types of security threats are risks to the Computer Systems. | 15 |
| CO3 | Ability to configure various computer networks with security levels. | 29 |
| CO4 | Maintain wired and wireless secure networks. | 19 |

Prerequisite

Computer Fundamentals,
Concepts of analog and digital communication

Learning Structure:

| | |
|-------------|---|
| Application | Configure, Install, Manage and administer of server based network with security concerns. |
| Procedure | Installation and administration of computer network. |

| | |
|-----------|---|
| Principle | Configuring Network, Managing Network resources |
| Concept | Network Configuration, Concept of Wireless networks |
| Facts | Computer, Networking Devices and Tools, protocols, Intrusion Viruses, Trojan's, etc.. |

Course Contents:

THEORY

| Unit | Chapter | Topic and Contents | Hours | % Weightage |
|------|------------------------------------|--|-------|-------------|
| I | 1.Introduction Computer Network | 1.1 Introduction to Computer Network 1.2 Network Topologies 1.3 Network Connecting Devices and their role 1.4 Switching Networks -Message switching, Circuit Switching and Packet Switching 1.5 Basics of network computing models: peer to peer, Client Server, Introduction to OSI Reference model 1.6 Internet protocols and IP addressing- UDP, TCP/IP, DHCP, Mobile IP, Internet Routing Protocol 1.7 Unix Commands for device configurations | 8 | 14 |
| | 2.Introduction to Security Threats | 2.1 Threats to security: Viruses and Worms, Intruders, Insiders, Criminal organizations, Terrorists, Information warfare 2.2 Avenues of Attack, steps in attack 2.3 Security Basics – Confidentiality, Integrity, Availability 2.4 Types of attack: Denial of service (DOS), backdoors and trapdoors, sniffing, spoofing, man in the middle, replay, TCP/IP Hacking, Phishing attacks, Distributed DOS, SQL Injection. Malware: Viruses, Logic bombs | 6 | 12 |

| | | | | |
|-----|--|---|----|----|
| II | 3.Organization al Security & Cryptograph y | <p>3.1 Password selection, Piggybacking, Shoulder surfing, Dumpster diving, Installing unauthorized Password selection, access by non-employees</p> <p>3.2 Physical security: Access controls Biometrics: finger prints, hand prints, Retina, Patterns, voice patterns, signature and writing patterns, keystrokes, Physical barriers</p> <p>3.3 Password Management, vulnerability of password, password protection, password selection strategies, components of a good password.</p> <p>3.4 Introduction Plain text, Cipher Text, Cryptography, Cryptology, encryption & De-cryption.</p> | 12 | 24 |
| | 4.Network Security | <p>4.1 Firewalls: working, design principles, trusted systems, Kerberos.</p> <p>4.2 Security topologies – security zones, DMZ, Internet, Intranet, VLAN, security implication, tunnelling.</p> <p>4.3 IP Security: overview, architecture, IP Sec configurations, IP Sec security</p> <p>4.4 Email Security: security of email transmission, malicious code, spam, mail encryption</p> <p>4.5 Web Security: Intruders, Intrusion detection systems (IDS): host based IDS, network based IDS, logical components of IDS, signature based IDS, anomaly based IDS, network IDS components advantages and disadvantages of NIDS, and host based IDS components, advantages and disadvantages of HIDS.</p> | 10 | 20 |
| III | 5.Wireless Networks and Security | <p>5.1 Introduction to Wireless Networks, Wireless LANS Wi-fi & ad-hoc wireless networks, wireless sensor networks, Cellular Mobile Networks, Comparison of wireless and Fixed Telephone Networks.</p> | 5 | 16 |

| | | | | |
|--|------------------------------------|---|---|----|
| | | 5.2 Wireless network security Connecting to WEP/WPA PSK secured networks, monitoring and diverting wireless traffic. | | |
| | 6.Network services vulnerabilities | 6.1 Introduction to Network vulnerability, Types of network Vulnerabilities-Hardware based Software based and human based, 6.2 General Security countermeasure techniques spoofing, network scanning and fingerprinting etc. | 4 | 14 |

PRACTICAL LAB

| Sr. No | Course outcome | Lab Activities | No. of Hrs assigned |
|--------|----------------|--|---------------------|
| 1. | CO1 | Study of various networking devices and use of Unix commands | 02 |
| 2. | CO1 | Installation of windows server | 02 |
| 3. | CO2 | Installation of Web-browser with security setting concern. | 02 |
| 4. | CO1 | Installation and configuration of Network Interface card and identify its MAC address. | 02 |
| 5. | CO1 | Learn to do network cable crimping | 02 |
| 6. | CO1 | To study installation and Configuration of Access Point. | 02 |
| 7. | CO3 | Setup network and configure IP addressing, subnetting and masking. | 02 |
| 8. | CO3 | Learn to manage networking resources like Sharing files / folders, devices and printers in the network and access the shared resources from other nodes. | 02 |
| 9. | CO1 | Learn to use network cable testing and troubleshooting tools. | 02 |
| 10. | CO4 | i) Use Telnet to Login a remote machine ii) Connect remote machine using Secure Shell(SSH) | 02 |
| 11. | CO2 | Study of the features of firewall in providing network security and to set Firewall Security in windows. | 02 |
| 12. | CO4 | To study WLAN Setup using ADHOC mode. | 02 |
| 13. | CO4 | To implement Wi-Fi Protected Access (WPA) security in WLAN. | 02 |

Any 10 experiments to be performed and assessed.

PROJECT BASED ASSIGNMENTS

| Unit No | Course Outcome | Details | Marks |
|------------|----------------|--|-------|
| CO1 CO3 | CO1 | Create a small Physical network using computers using relevant software and Draw network layout with its topology for network setup. | 10 |
| | CO1 | Learn to network cable crimping and network cable testing | 10 |
| | CO1,CO3 | Installation of Windows Server Share files / folders, devices and printers in the network and access the shared resources from other nodes. | 10 |
| II | CO2 | Study of steps to protect your personal computer system by creating User Accounts with Passwords and types of user Accounts for safety and security and also “How to make strong passwords” and “passwords cracking techniques”. | 10 |
| III | CO3, CO4 | Configure security settings of browsers you used for surfing. Install and configure Wi-Fi Router with Security Setting. | 10 |

SKILL TEST

| Unit | Course outcome | Topic or Sample Questions | Marks (15) |
|------|----------------|--|------------|
| I | CO3 | Install Web-browser and Configure Web browser security settings. | 02 |
| | CO1 | Install and configure Network Interface card and identify its MAC address. | 02 |
| II | CO1 | To do network cable crimping and testing | 02 |
| | CO3 | To install windows server and protect your personal computer system by creating User Accounts with Passwords and types of User Accounts for safety and security. | 02 |
| III | CO1 | To set up a small computer network. | 03 |
| | CO4 | Configure Wi-Fi Router with Security Setting. | 02 |
| | CO2 | To configure firewall security settings in windows. | 02 |

Examination/Assessment Scheme:

| Question | Q1 | Q2 | Q3 | Q4 | Q5 |

| 3 | 0 | 2 | 4 | 2 | 75 | 50 | 25 | 150 |

Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral

Note:-

1. Minimum 40% marks are needed for passing in internal and semester examinations for practical

2. Internal marks

| | |
|---------------------------|----------|
| Project Based Assignments | 50 Marks |
| Practical Lab | 10 Marks |
| Skill Test | 15 Marks |
| Total | 75 Marks |

3. Semester Examination (Theory)

- Theory semester examination includes a two-hour theory paper of 50 marks.
- Practical semester examination includes a two-hour Practical/Viva of 25 marks.
- Progressive evaluation is to be done by the subject teacher as per the prevailing curriculum implementation and assessment norms.
- It is mandatory to appear for semester examination and skill tests. remaining absent in any of the examination/test or fails to complete the prescribed number of assignments and Laboratory experiment will not be declared successful for that examination head.

Rationale:

Internet-of-Things (IoT) is a network of connected devices. The IoT network includes digital machines, objects, tags, electronic devices, etc. each with unique identifiers (UIDs). Smart devices are used for detecting and transferring data for real-time monitoring and other applications. The design course, "Internet of Things (IoT)" aims to learn about the Architecture, Machine to Machine connectivity, IoT enabling technologies, IoT Protocols, IoT Privacy, Security and Governance which helps students to develop Domain Specific Applications on IoT platform.

Course Outcomes: On successful completion course, students will be able to:

| CO | CO Statement | Marks % Weightage |
|-----|---|----------------------|
| CO1 | Apply design concept to IoT solutions | 27% |
| CO2 | Analyse various M2M and IoT architectures | 37% |
| CO3 | Create IoT solutions using sensors, actuators and Devices | 36% |

Prerequisite

LPC 2148 architecture and Programming, Free RTOS etc.

Learning Structure:

| | |
|-------------|---|
| Application | Application on Internet of Things (IoT) platform for given tasks. |
| Procedure | Decide optimal hardware configuration for the IoT. |
| Principle | IoT Architecture and Machine to Machine connectivity |
| Concept | Concept of programming, libraries of Embedded Operating System, ARM structure, development tools of ARM |
| Facts | Embedded Hardware , Computer, software's (IDE software and Embedded Operating System) |

Course Contents:

THEORY

| Unit | Chapter | Topic and Contents | Hours | % Weightage |
|------|---|--|-------|----------------|
| I | 1. Introduction to IoT | 1.1 IoT and its characteristics, IoT vision, IoT Conceptual Framework, IoT Architectural overview, Technology behind IoT, Sources of IoT. | 5 | 10 |
| II | 2. IoT Architecture | 2.1 IoT Reference Model- Introduction, Reference Model and architecture, IoT reference Model, 2.2 IoT Reference Architecture- Introduction, Functional View, Information View, Deployment and Operational View, Other Relevant architectural views. | 6 | 12 |
| III | 3. IoT enabling technologies | 3.1 Wi-Fi Modules and Interfacing: Different Wi-Fi Modules, Introduction to ESP8266 and Node MCU – Concept, Pin Diagram, Interactive computing with Node MCU, Offline and Online webserver. | 10 | 24 |
| IV | 4. IoT Protocols | 4.1 Introduction to M2M, IoT 4.2 Difference between IoT and M2M, HTTP, 4.3 Thing Speak & MQTT and Cloud Services. | 10 | 22 |
| V | 5. IoT Privacy, Security and Governance | 5.1 Introduction, Overview of Governance, Privacy and Security Issues. 5.2 IoT security challenge, Spectrum of security considerations, Unique security challenges of IoT devices. | 10 | 24 |
| VI | 6. Domain Specific Applications of IoT | 6.1 IOT Applications. 6.1.1 Energy Monitoring (case study) 6.1.2 Smart water management (case study) 6.1.3 Intelligent Traffic systems (case study) | 4 | 08 |

| | | | | |
|--|--|--|--|--|
| | | | | |
|--|--|--|--|--|

PRACTICAL LAB

| Sr. No | Course outcome | Lab Activities | No. of Hrs assigned |
|--------|----------------|---|---------------------|
| 1 | CO1 | To Interface Bluetooth Shield with Microcontroller and Perform Client-Server Bluetooth Communication between Two Boards | 2 |
| 2 | CO1 | To Interface Ethernet Shield with Microcontroller and Perform Client-Server Wi-Fi Communication between Two Boards | 2. |
| 3 | CO1 | To Interface RTC DS3231 with Microcontroller and Perform real time communication between Two Boards | 2 |
| 4 | CO2 | To display "Hello world" on the browser from device using Ethernet shield for Microcontroller board. | 2 |
| 5 | CO2 | To display output of sensor value on the browser from device using IP address of device using Ethernet for Microcontroller board. | 2. |
| 6 | CO2 | To Toggle LED over the internet using MQTT protocol | 2 |
| 7 | CO2 | To sensor value from the sensor in the database. | 2 |
| 8 | CO2 | To sensor value from the sensor in the database in every time interval | 2 |
| 9 | CO2 | To control LED through Switch and display it in graph on cloud | 2 |
| 10 | CO2 | To control Stepper motor Switch and display it in graph on cloud | 2. |
| 11 | CO2 | To rotate stepper motor in different speed and display it in graph on cloud | 2 |
| 12 | CO3 | To upload sensor values on Think Speak Website | 2 |
| 13 | CO3 | To upload sensor values on MQTT Website | 2 |
| 14 | CO3 | To develop simple Android app using MIT App Inventor | 2 |

| | | | |
|----|-----|--|---|
| 15 | CO3 | To control LED with Android Mobile app | 2 |
|----|-----|--|---|

Note: - Sensor are Temperature, Humidity, and Proximity...etc

PROJECT BASE ASSIGNMENTS

| Unit No | Course Outcome | Details | Marks |
|------------|----------------|--|-------|
| I | CO1 & CO2 | Analyse IOT application in Indian Scenario for ex: i) IOT and Aadhaar ii) IOT for health services. iii) IOT for financial inclusion. iv) IOT for rural empowerment. v) IOT for agriculture sector | 10 |
| II | CO1 & CO2 | Decide the IoT Application. | 10 |
| III, IV, V | CO2 | Apply design concept to IoT solutions for decided Above Application | 10 |
| VI | CO3 | Develop IoT Application for decided Above Application | 20 |

Note: - At least three project-based assignments should be performed in a semester covering at least one assignment from each CO

SKILL TEST

| UNIT | Course outcome | Topic | Marks |
|----------------|----------------|---|-------|
| I | CO1 | Control device using MQTT protocol | 5 |
| II, III, IV, V | CO2 | Send Message on Web Browser from device | 5 |
| VI | CO3 | Information exchange between two devices. | 5 |

Note: - At least three skill tests should be performed in a semester.

Examination/Assessment Scheme:

| Question | Q1 | | Q2 | | Q3 | | Q4 | | Q5 | |
|---------------------|-----|--------------|-----|-----|-----|-----|--------------|--------------|--------------|--------------|
| Sub-Question | A | B OR B | A | B | A | B | A OR A | B OR B | A OR A | B OR B |
| Marks | 05 | 05/05 | 06 | 04 | 06 | 04 | 04/04 | 06/06 | 04/04 | 06/06 |
| CO | CO1 | CO2 | CO2 | CO3 | CO3 | CO1 | CO1 | CO2 | CO1 | CO3 |
| Unit | I | IV | IV | VI | V | III | III | II | III | V |
| Level of Competence | R | A | U | A | A | R | A | R | U | A |

Final Examination Chapter Weight-age Scheme:

| Chapter | Marks | |
|---------|------------|-------------|
| | Compulsory | With option |
| 1 | 05 | 05 |
| 2 | 06 | 12 |
| 3 | 12 | 20 |
| 4 | 11 | 14 |
| 5 | 12 | 18 |
| 6 | 04 | 04 |
| Total | 50 | 75 |

Final Theory Examination Course Outcome Weight-age Scheme :

| Course Outcome | Que No. | Marks | Total | Weightage% (Total/50)x100 |
|----------------|---------|-------|-------|------------------------------|
| CO1 | Q1(A) | 5 | 17 | 34% |
| | Q3(B) | 4 | | |
| | Q4(A) | 4 | | |
| | Q5(A) | 4 | | |
| CO2 | Q1(B) | 5 | 17 | 34% |
| | Q2(A) | 6 | | |
| | Q4(B) | 6 | | |
| CO3 | Q2(B) | 4 | 16 | 32% |
| | Q3(A) | 6 | | |
| | Q5(B) | 6 | | |

Total (Internal & External) Course Outcome Weight-age Scheme :

| Sr. No. | Project Based Assignments (50 Marks) | Skill Test (15 Marks) | Practical Lab (10 Marks) | Final Practical exam (25 Marks) | Final theory exam (50marks) | Weightage% (Total)x100 |
|---------|--|--------------------------|--------------------------------|--|--------------------------------------|---------------------------|
| CO1 | 10 | 05 | 03 | 05 | 17 | 27% |
| CO2 | 20 | 05 | 04 | 10 | 17 | 37% |
| CO3 | 20 | 05 | 03 | 10 | 16 | 36% |
| Total | 50 | 15 | 10 | 25 | 50 | 100% |

Course Name : Diploma in Electronics
Semester : VII
Subject name : Automation and Robotics
Subject Code : DE 7003

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | |
|-----------------|---------------|----------------|--------|-------------------------------------|--------------------------|--------------------------|--------------------------|---------------------|
| Theory Hrs. | Tutorial Hrs. | Practical Hrs. | Credit | Semester Exam Duration (TH/PR)Hours | Internal Marks (TH + PR) | Semester Exam Marks (TH) | Semester Exam Marks (PR) | Total Marks (TH/PR) |
| 3 | 0 | 2 | 4 | 2 | 75 | 50 | 25 | 150 |

Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral

Note:-

1. Minimum 40% marks are needed for passing in internal and semester examinations for practical

2. Internal marks

| | |
|---------------------------|----------|
| Project Based Assignments | 50 Marks |
| Practical Lab | 10 Marks |
| Skill Test | 15 Marks |
| Total | 75 Marks |

3. Semester Examination (Theory)

- Theory semester examination includes a two-hour theory paper of 50 marks.
- Practical semester examination includes a two-hour Practical/Viva of 25 marks.
- Progressive evaluation is to be done by the subject teacher as per the prevailing curriculum implementation and assessment norms.
- It is mandatory to appear for semester examination and skill tests. remaining absent in any of the examination/test or fails to complete the prescribed number of assignments and Laboratory experiment will not be declared successful for that examination head.

Rationale:

In today's era Automation is playing a key role in Industries. Industries are adopting automation and robotics for economic viability and mass production.

A diploma holder with knowledge of systems/components required for automation of a modern industrial unit have tremendous job opportunities in automated manufacturing units/assembly lines, process industry, Power generation stations.

It is important for the students to learn the basics of robotics and automation, how the system works and the importance of PLC, SCADA and robots in automation.

Course Outcomes: On successful completion course, students will be able to:

| CO | CO Statement | Marks % Weightage |
|-----|--|----------------------|
| CO1 | Identify function of electronic, electrical and mechanical hardware for a robotic application. | 24 |
| CO2 | Assist in maintenance and troubleshooting of robots in industries / automation. | 23 |
| CO3 | Suggest Automation system to meet customer requirements. | 21 |
| CO4 | Plan and design automation system using Programmable Logic Controllers. | 32 |

Prerequisites:

Students should know:

1. Knowledge of Basic Electronics, Digital Electronics, Electronics measurement and Instruments.
2. Fundamentals of sensors and Actuators.
3. Basics of Microprocessor and Microcontrollers.
4. Knowledge of interfacing of Simple I/O with microprocessor and microcontroller.

Learning Structure:

| | |
|-------------|--|
| Application | To apply electronics system design in robotics and automation & develop programming required for specific application. |
| Procedure | Selection and interface of input and output devices for specific control application, develop algorithm and ladder diagrams. |
| Principle | Device interfacing and programming of controllers. |
| Concept | Ladder diagram for PLC, Controller Interfacing and programming. |
| Facts | Controllers, Drives, Sensors, Actuators, Power devices, Robots |

Course Contents

THEORY

| Unit | Chapter | Topic and Details | No. of Lectures assigned | Weight age in % |
|----------|-------------------------------------|---|--------------------------|-----------------|
| Unit -I | 1 - Introduction to automation | 1.1 Introduction: Automation overview, Requirement of automation systems, Architecture of Industrial Automation system, 1.2 Introduction of PLC and supervisory control and data acquisition (SCADA). 1.3 Industrial bus systems: Modbus & profibus 1.4 Controlling equipment's in Automation: Programmable counters, Timers, Temperature controllers with PID | 10 | 22% |
| Unit -II | 2 - Programmable logic controllers: | 2.1 Programmable controllers: Analog, digital input and output modules, 2.2 PLC programming: Ladder diagram, Sequential flow chart, 2.3 HMI (Human Machine Interface): Types and working principle. 2.4 PLC Communication and networking, PLC selection, PLC Installation, | 07 | 16% |

| | | | | |
|-----------|---|--|----|-----|
| Unit -III | 3 - Introduction to Robotics | <p>3.1 Definition, need, brief history, social justification</p> <p>3.2 Basic Robot Terminology configuration and its working</p> <p>3.3 Basic structure of a Robot (Industrial) and Classification – Cartesian, cylindrical, spherical, horizontal articulated (SCARA), Mechanical arm, Degree of freedom, Links and joints, Wrist rotation, Mechanical transmission-pulleys, belts, gears, harmonic drive.</p> <p>3.4 Linear and rotary motion and its devices.</p> <p>3.5 Robot configurations:</p> <ul style="list-style-type: none"> (1) stand above (2) in line (3) cycle independent, <p>3.6 Selection criteria for robots.</p> <p>3.7 Robot machine vision.</p> | 10 | 22% |
| Unit -IV | 4 - Robotics and Automation components: | <p>4.1 Robot Components (Anatomy): Manipulator, end effects, drive system, controller.</p> <p>4.2 Kinematics systems: Forward & Inverse, Degree of Freedom</p> <p>4.3 Sensors</p> <p>4.4 Actuators: Electric, Hydraulic and Pneumatic</p> <p>4.5 Introduction of DC and AC servo drives for motion control.</p> <p>4.6 Feedback Devices (Rotary, Linear Encoders)</p> | 10 | 22% |

| | | | | |
|---------|---|---|----|-----|
| Unit -V | 5 - Industrial applications and Maintenance | <p>5.1 Overview of Industrial automation using robots, PLC: Basic construction and configuration of robot, Pick and place robot, Welding robot. Metal detector etc.</p> <p>5.2 Robot Maintenance need and types</p> <p>5.3 Common Troubles and remedies in robot operation.</p> <p>5.4 General Safety Norms, Aspects and precautions in robot handling.</p> | 08 | 18% |
|---------|---|---|----|-----|

PRACTICALS

| Sr. No | Course Outcome | Laboratory Activities | No. of Hrs assigned | Weight age in % |
|--------|----------------|--|---------------------|-----------------|
| 01 | CO1 | To study an introduction to Robots configuration | 02 | 10 |
| 02 | CO3 | To study the different types of sensors and Actuators | 02 | 10 |
| 03 | CO4 | Interface Drives and Stepper motors using μ P or μ C with feedback devices (<i>with rotary encoders</i>) | 02 | 10 |
| 04 | CO4 | Interface PLC and prepare Ladder Diagram | 02 | 10 |
| 05 | CO2 | Study of Robot with 2 DOF, 3 DOF | 02 | 10 |
| 06 | CO4 | Develop a Program for golfer /thrower configuration | 02 | 10 |
| 07 | CO4 | Develop a Program for coffee maker configuration using PLC | 02 | 10 |
| 08 | CO2 | To study the robot programming | 02 | 10 |

| | | | | |
|----|-----|--|----|----|
| 09 | CO4 | Develop a Program for Elevator using PLC | 02 | 10 |
| 10 | CO4 | Logic implementation for car parking system | 02 | 10 |
| 11 | CO4 | Logic implementation for Bottle Filling Application using PLC | 02 | 10 |
| 12 | CO4 | Logic implementation for Metal detector Application using PLC | 02 | 10 |
| 13 | CO4 | Use PLC for sensing level of water in the tank using float switch and control level of water using ON/OFF solenoid valve | 02 | 10 |

PROJECT BASED ASSIGNMENTS

| Unit No | Course Outcome | Details | Marks |
|---------|----------------|---|-------|
| IV | CO1/CO3 | Industry visit : Robotics/Automation Submit following technical reports along with micro observation of small things. a) Prepare a small survey report of two automation industries. b) Operational and maintenance practices of robots and its systems. | 10 |
| I | CO 2 | List two different Industrial types of robots and their application a) Latest Worldwide international level b) Latest National level c) compare both performance and features wise | 10 |
| III | CO2 | a) Download free simulation software b) Study of a small program for Pick and place tasks. | 10 |
| I,II | CO 2 & CO 3 | a) List various Robot controlling parameters and find how they affect the performance of Robots. b) list sensors used in automation. select appropriate sensor for various applications | 10 |

| | | | |
|---|----------|--|----|
| V | CO 1/CO4 | Do the internet / market survey and make a list of leading manufacturers of the PLC, SCADA, HMI and other industrial automation tools. | 10 |
| V | CO 4 | Refer to the operating manual of the PLCs of reputed manufacturers and prepare step by step procedure to use PLC for the specific application. | 10 |

Skill Test

| Unit No | Course Outcome | Details | Marks |
|---------|-----------------|--|-------|
| I | CO1,CO2,CO3,CO4 | Use Simulator to perform material handling operations using Robotic Arm. Describe the procedure to common troubles. Prepare a small industrial application using a ladder diagram. | 15 |

Examination/Assessment Scheme:

| Question | Q1 | | Q2 | | Q3 | | Q4 | | Q5 | |
|---------------------|------|--------------|-----|--------------|--------------|------|--------------|-----|-----|--------------|

Rationale:

The field of electronic communication systems includes radio, mobile, optical and satellite communication. These skills are required in an electronic engineering diploma holder to maintain electronic communication equipment and circuits. This course is intended to lay the foundation for understanding these advanced communication systems.

Course Outcomes: On successful completion course, students will be able to:

| CO | CO Statement | Marks % Weightage |
|-----|---|----------------------|
| CO1 | Develop skill as an entry level fibre optic communication technician. | 50 |
| CO2 | Develop skill as an entry level wireless communication technician. | 50 |

Prerequisite

Principles of analog and digital electronic communication, Electromagnetic theory, Wave propagation, Antennas and Semiconductor physics.

Learning Structure:

| | |
|-------------|---|
| Application | Application of devices & components in circuit, use of equipment's in repairing and maintenance of communication systems |
| Procedure | Network planning and survey, propagation methods and wireless data transmission, troubleshooting, lossless communication and splicing procedure. |
| Principle | Principle of devices & components, channel assignment strategies, satellite stabilization in orbit, principles of light theory. |
| Concept | Baud rate, Bit rate, strengths and limitations of communication systems, transmission mode characteristics, cellular concepts, spread spectrum techniques, characteristics of GSM |

| | |
|-------|--|
| Facts | Mobile, satellite, information antenna, transmission media, losses in communication, GSM, components of communication systems. |
|-------|--|

Course Contents:

Theory

| Unit | Chapter | Topic and Contents | Hours | % Weightage |
|------|--------------------------|---|-------|----------------|
| I | Data Communication Media | <p>1.1 Baud rate, Bit rate, types of errors in data communication and error correction technique Concept of gain unit decibel dB and dBm.</p> <p>1.2 Types of communication media and frequency band of operation</p> <p>1.3 Guided media: Types of cable-twisted pair cable, coaxial cable, fibre optic cable.</p> <p>1.4 Unguided media: Microwave communication, Infrared communication.</p> | 3 | 8 |
| II | Fiber Optics | <p>2.1 Introduction to Fiber optic communication.</p> <p>2.1.1 Strength and limitations of fiber optic system</p> <p>2.1.2 Light propagation: reflection, refraction, Snell's law Light propagation through cable, Mode of propagation, index profile.</p> | 12 | 28 |

| | | | | |
|-----|-------------------------|---|---|----|
| | | <p>2.1.3 Fiber optic cables: cable geometry and construction, fiber optics cable mode, single mode, step index fiber, multimode index fiber, multimode graded index fiber, tight and loose buffer tube cables, compliant in fiber optic cable, factors affecting performance of optical fibers as a transmission medium and fiber cable losses.</p> <p>2.1.4 Light source and Detector: Light emitting diode (LED), Photo Transistor, Laser diode,</p> <p>2.1.5 Optical tools and Instruments.</p> <p>2.1.6 Fiber Optic Network Planning and Route Survey</p> <p>2.1.7 Fiber internet:- Dark fiber and Lit Fiber, concept of the Last Mile and its types as FTTP/FTTH/FTTB/FTTD, FTTB, FTTC/FTTN/FTTS, Comparison of Fibers Internet with DSL, Cable, and Wireless Internet</p> | | |
| III | Microwave Communication | <p>3.1 Introduction to Microwaves.</p> <p>3.2 Microwave Transmission Concept of Mode, Characteristics of TEM, TE and TM Modes, Losses associated with microwave transmission.</p> <p>3.3 Passive Devices: - Microwave Passive components: Directional Coupler, Magic Tee, Wave-guide Corners, Bends, Twists, Attenuator, Circulator, Isolator and Resonator.</p> | 8 | 16 |

| | | | | |
|----|-------------------------|--|----|----|
| | | <p>3.4 Microwave Active components: Tunnel diode, Varactor diodes, PIN diodes, Gunn Diodes, IMPATT diodes, Microwave Transistors, Microwave oscillators and Mixers. Microwave tubes: Klystron, TWT, Magnetron.</p> <p>3.5 Microwave Systems Wireless Communications system</p> | | |
| IV | Satellite Communication | <p>4.1 Introduction to Satellite Communication, Satellite Communication System</p> <p>4.2 Orbits and Launching Methods: Introduction, Kepler's Laws, Definitions of Terms for Earth-Orbiting Satellites, Orbital Elements, Apogee and Perigee Heights, Orbit Perturbations, Effects of a non-spherical earth, Atmospheric drag.</p> <p>4.3 The Space Segment: - Transponder, Stabilization of satellite in satellite orbit.</p> <p>4.4 Radio Wave Propagation: Introduction, Atmospheric Losses, Ionospheric Effects, Rain Attenuation, Other Propagation Impairments.</p> | 6 | 16 |
| V | Mobile Communication | <p>5.1 Cellular Concept, Channel Assignment Strategies, Interference & System Capacity.</p> <p>5.2 Mobile Radio Propagation, Basic Methods of Propagation, Outdoor Propagation Models, Multipath & Small-Scale Fading, Modulation Techniques.</p> | 10 | 20 |

| | | | | |
|----|---|--|---|----|
| | | <p>5.3 Spread Spectrum Techniques, Frequency Hopping Systems, Multiple Access Techniques, Frequency division multiple-access (FDMA) Time division multiple-access (TDMA) Code division multiple-access (CDMA) Space Division Multiple access (SDMA)</p> <p>5.4 Various Generations of Wireless Networks First Generation Networks, Second Generation Networks, 2.5G Mobile Networks, 3G: Third Generation Networks, 4G: Fourth Generation Networks, 5G Fifth Generation Network.</p> <p>5.5 Circuit switching Technique, Switching Node, Packet Switching, The X.25 Protocol</p> | | |
| VI | Generations in mobile communication technology. | <p>1.5 Introduction,</p> <p>1.6 Architecture of GSM, characteristics of GSM Standards and services,</p> <p>1.7 Radio transmission parameters in GSM System,</p> <p>1.8 Data transmission in GSM Applications.</p> <p>1.9 Technology Variation from 1G to 5G.</p> | 6 | 12 |

PRACTICAL LAB

| Sr. No | Course outcome | Lab Activities | No. of Hrs assigned |
|--------|----------------|---|---------------------|
| 1 | CO1 | V-I Characteristics of LED (E - O converter) | 2 |
| 2 | CO1 | Characteristics of Photodetector | 2 |
| 3 | CO1 | Measurement of Numerical Aperture | 2 |

| | | | |
|----|-----|--|---|
| 4 | CO1 | Setting up Fiber Optic Analog & Digital Link | 2 |
| 5 | CO1 | Characteristics of Fiber Optic Communication Link | 2 |
| 6 | CO1 | Study of Bending Loss | 2 |
| 7 | CO1 | Study of Propagation Loss in Optical Fiber | 2 |
| 8 | CO1 | Transmitting & receiving three separate Signals (Audio, Video, and Tone/ Voice) simultaneously through satellite link and perform Link Fail Operations | 2 |
| 9 | CO1 | Study the delay between Uplink transmitter and Downlink receiver during data transmission | 2 |
| 10 | CO1 | Send Tele-command and receive Temperature & intensity of light from satellite | 2 |
| 11 | CO1 | Fusion splicing of the glass optical fibers | 2 |
| 12 | CO1 | Stripping and cleaving Light coupling | 2 |
| 13 | CO1 | Ben loss sensing | 2 |
| 14 | CO2 | Calculate the carrier to noise ratio for a satellite link | 2 |
| 15 | CO2 | Introduction and identification of microwave components. | 2 |
| 16 | CO2 | Study of the characteristics of the Klystron tube and to determine its electronic tuning range. | 2 |
| 17 | CO2 | GSM Theory & Standards | 2 |
| 18 | CO2 | Understanding of GSM technology, its network, GSM capability & data services. | 2 |
| 19 | CO2 | Understanding RF environment & study of GSM network by actually connecting to the GSM environment by any service provider. Command Level Study | 2 |

| | | | |
|----|-----|---|---|
| 20 | CO2 | Real Time study of GSM 07.05 & 07.07 commands in various Categories | 2 |
| 21 | CO2 | Interfacing GSM Module with Arduino | 2 |
| 22 | CO2 | Understanding Global Positioning System (GPS) | 2 |

(Any 10 experiments)

Project Base Assignments

| Unit No | Course Outcome | Details | Marks |
|-------------|----------------|---|-------|
| I, II | CO1 | Compare Fiber optic communication with coaxial cable communication | 5 |
| | CO1 | Compare light sources used in fiber optic communication | 5 |
| | CO1 | Compare light detectors in fiber optics communication | 5 |
| | CO1 | Identify the different OFC tools from given toolkit | 5 |
| | CO1 | Write down the function of the given tools required for fusion splicing. | 5 |
| | CO1 | Enlist the most common causes of fiber optic malfunctions and state remedies | 5 |
| | CO1 | Study the survey report shared with you and submit conclusion | 5 |
| III, IV, V, | CO2 | Summarize the role of satellites in the 21st century communications ecosystem | 5 |
| | CO2 | Compare fourth and fifth generation networks | 5 |
| | CO2 | Write the performance criteria of cellular mobile networks | 5 |
| | CO2 | Write notes on traffic scheduling criteria for 4G wireless networks | 5 |

| | | | |
|----|-----|--|---|
| VI | CO2 | Compare GSM with CDMA | 5 |
| | CO2 | Enlist and describe steps followed to interface GSM with Arduino | 5 |

Note: - At least three project-based assignments should be performed in a semester covering at least one assignment from each CO

Skill Test

| UNIT | Course outcome | Topic | Marks 15 |
|----------------|----------------|--|-------------|
| I , II | CO1 | Identify the Non- metallic OFC, Armored OFC, Arial cable, Submarine Cable, Patch cord and Pigtail from given set of fiber cables based on applications | 5 |
| | | Obtain characteristic of given device | 5 |
| | | Implement a fibre optic system and calculate losses | 10 |
| III, IV, V, VI | CO 2 | Transmitting & receiving Signals simultaneously through satellite link and perform Link Fail Operations | 5 |
| | | Identification of microwave components from given set and depict its uses | 5 |
| | | Interfacing GSM Module with Microcontroller | 10 |

Note: - At least three skill tests should be performed in a semester from CO1 and CO2.

Examination/Assessment Scheme:

| | | | | | |
|----------|----|----|----|----|----|
| Question | Q1 | Q2 | Q3 | Q4 | Q5 |
|----------|----|----|----|----|----|

| | | | | | | | | | | |

| Unit | 3 | 2 | 1 | 2 | 4 | 2 | 5 | 5 | 4 | 6 |
| Level of Competence | R | A | R | A | U | R | A | R | U | R |

Final Examination Chapter Weight-age Scheme:

| Chapter | Marks | |
|---------|------------|-------------|
| | Compulsory | With option |
| 1 | 4 | 4 |
| 2 | 17 | 22 |
| 3 | 5 | 5 |
| 4 | 8 | 12 |
| 5 | 10 | 20 |
| 6 | 6 | 12 |
| Total | 50 | 75 |

Final Theory Examination Course Outcome Weight-age Scheme :

| Course Outcome | Que No. | Marks | Total | Weightage% (Total/50)x100 |
|----------------|---------|-------|-------|------------------------------|
| CO1 | Q1 (B) | 5 | 21 | 42 % |
| | Q2 (A) | 4 | | |
| | Q2 (B) | 6 | | |
| | Q3 (B) | 6 | | |
| CO2 | Q1 (A) | 5 | 29 | 58% |
| | Q3 (A) | 4 | | |
| | Q4 (A) | 4 | | |
| | Q4 (B) | 6 | | |
| | Q5 (A) | 4 | | |
| | Q5 (B) | 6 | | |

Total (Internal & External) Course Outcome Weight-age Scheme:

| Sr. No. | Project Based Assignments (50 Marks) | Skill Test (15 Marks) | Practical Lab (10 Marks) | Final Practical exam (25 Marks) | Final Theory exam (50marks) | Weightage% (Total)x100 |
|---------|--------------------------------------|-----------------------|--------------------------|---------------------------------|-----------------------------|------------------------|
| CO1 | 25 | 8 | 6 | 15 | 21 | 50 |
| CO2 | 25 | 7 | 4 | 10 | 29 | 50 |
| Total | 50 | 15 | 10 | 25 | 50 | 100% |

Course name : Diploma in Electronics

Semester : VII

Subject name : Major Project-II

Subject code : DE 7005

Teaching and examination scheme:

| Teaching scheme | | | | Examination Scheme | | | | |
|---|------------------|-------------------|--------|--|---------------------------|--------------------------------|-------------------------------------|---------------------------|
| Theory Hrs. | Tutorial Hrs. | Practical Hrs. | Credit | Semester Exam Duration (PR)Hours | Internal Marks (PR) | Semester Exam Marks (TH) | Semester Exam Marks (PR/VIVA) | Total Marks (TH/PR) |
| 0 | 0 | 8 | 4 | 2 | 50 | 00 | 50 | 100 |
| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | | |

Note:-

1. Minimum 40% marks are needed for passing in internal and semester examinations for theory and practical

2. Internal marks

| | |
|-----------------------|----------|
| Term Work | 25Marks |
| Practical Examination | 25 Marks |
| Total | 50 Marks |

- Term Work marks will be given based on the performance of student in Assignments and Skill Component throughout semester
- Practical Examination will consist of a review session where students of a concerned group will present their project idea, prototype, implementation methods, budget, and project deadline. Students will be assessed based on Criteria as mentioned.

3. Semester Examination

| | |
|-----------------------|----------|
| Project Demonstration | 25 Marks |
| Project Report | 25 Marks |
| Total | 50 marks |

- Semester examination includes demonstration and presentation of their working projects followed by Practical/Viva of 25 marks.
- Evaluation of project report by the members includes 25 marks
- Progressive evaluation is to be done by the project guide as per the prevailing curriculum implementation and assessment norms.
- It is mandatory to appear for semester examination and skill tests. remaining absent in any of the examination/test or fails to complete the prescribed number of assignments and Laboratory experiment will not be declared successful for that examination head.

Rationale:

The final year project is a typical requirement in an engineering diploma. It introduces the students to professional engineering practice by providing them with an opportunity to work on an open-ended engineering problem. Typically, the students would apply knowledge from different areas or courses, which they have studied in their curriculum using methods, tools and techniques, which they learned to a real-world scenario. The project is also a major

requirement for accreditation of an engineering programme. This is due to the fact that students would have to apply not only their engineering knowledge and proficiencies (hard skills), but also to demonstrate their competence in generic, professional skills (soft skills). The project is also an ideal place to assess both types of skills. It also emphasizes the importance of life-long learning as a fundamental attribute of graduate engineers.

Course Outcome: On successful completion course, students will be able

| CO | CO statement | Marks % Weightage |
|-----|--|----------------------|
| CO1 | To implement project problem statements with stated specifications and design. | 40 |
| CO2 | To Prepare Documentation on Project report. | 40 |
| CO3 | To communicate effectively and confidently as a member of a team. | 20 |

Roadmap for Project Guides:

1. To face an engineering problem and solve with the help of his guide using the concepts and knowledge assimilated during her education.
2. Through a project the engineering diplom makes a synthesis of the information received and uses it to solve an engineering problem in a particular discipline or across disciplines. It is also a vehicle for many skills required for engineering graduates.
3. The final year project in curricula is ideally to be a design project and is the culmination of all the subjects learned in various courses in curriculum.
4. It is intended to be a major educational experience and a rewarding effort on the part of both students and the guide / supervisor.
5. The goals of the project are:
 - To give the students an experience of carrying out an individual project and sense of accomplishment associated with such an undertaking.
 - To encourage the students to make a meaningful intellectual commitment to an engineering problem.
 - To help in the development of one of the most important attributes of an engineer - self-discipline.
 - To emphasize the use of fundamental concepts, and use of texts and references rather than rely on staff members for all of the answers.

- To emphasize the presentation of technical material by informal summary reports, drawings, formal reports and presentations.
 - To help the students to critically evaluate their own work.
6. The following items are the essential features of an acceptable design project
- Development of student creativity.
 - Use of open-ended problems.
 - Formation of design.
 - Problem statement and specification.
 - Synthesis of alternative solutions.
 - Feasibility.
 - Detailed system description.
 - Consideration of constraints (e.g. economic, safety, reliability, etc).
 - Utilization of engineering and scientific principles
7. In order to satisfy the above requirements, the ideal design project must satisfy the following criteria:
- The project must be integrative; the student must integrate the material from several of the disciplines of particular areas of engineering.
 - Each project must have meaningful analysis; analysis will usually be required in completing the synthesis. In synthesis various alternatives must be considered, evaluated and the most suitable alternative selected.
 - The presentation (written report, drawing and oral presentation) must be of professional quality.
 - Economic analysis - the design of any item must include some cost analysis whether it is a single item or a mass-produced item.
 - Safety analysis - there are few if any items, which will not have safety implications. Safety is not some obscure meaningless regulation to be ignored whenever possible, but is a serious concern that every engineer must address.
 - Final evaluation - the final evaluation of proposed design should be a critical self-evaluation of team effort. This evaluation should consider such items as how good is the design, what would be needed to complete the design, what changes could be suggested for improving the design.

- Environmental impact - environmental issues have become crucial and environmental consequences (positive or negative) of any engineering solution should be carefully considered and addressed.
 - Social impact - can be part of the environmental impact, but can also be considered as a separate item looking at the consequences of the engineering solution on the community and well-being of the individuals and families.
8. Skill part on project report creation to be conducted for following areas,
- Writing of Abstract, Introduction
 - Writing of Paper, formatting of paper and publication procedure on reputed journals
 - Result compilation and deducing a conclusion
 - Document formatting on MS word and Latex

Guidelines to Students to Complete Project:

1. The ideal design project should be done in a certain sequence major steps can be identified as
 - The first step would cover design needs, problem recognition and definition, proposal writing, searching and optimization techniques leading to an algorithmic approach to design, cost estimation and economic evaluations.
 - The second step provides a complete design experience under professional guidance. This step covers the actual design of a project.
 - The third step includes completion of the design project, design liability, design presentations, design report, design evaluations and manuals.
2. The project is important to students not only because of the educational benefits, but also because it can bring some other benefits, such as getting a better job. Some of the items, which should be considered by students are summarized below:
 - who does an outstanding project gains self-confidence that carries over into her other work and which is also observed by the interviewers for a job.
 - Many students prepare brief summary documents on their projects and take these briefs with them to interviews. The impact of this effort can be significant.
 - The students are encouraged to enter a local/regional/national student paper and project contest where they compete with students. High quality oral presentations usually are made on the best designs.

- There are national prizes for student design projects. Each year many students have projects which are eligible for submission to these contests. Prizes are significant and the resume impact is more important.
3. Ideally, the project should be done in teams to provide students with the team-working skills. It would also improve communication with the supervisor and free exchange of ideas with peers. Team projects allow building experiences on how to resolve team conflicts and how to work with people who are not necessarily friends.
4. Major outcome of the project are
- an ability to apply knowledge of mathematics, science, and engineering
 - an ability to design and conduct experiments, as well as to analyse and interpret data
 - an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
 - an ability to identify, formulate, and solve engineering problems
 - an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice
 - an ability to function on multi-disciplinary teams
 - an understanding of professional and ethical responsibility
 - an ability to communicate effectively
 - a recognition of the need for, and an ability to engage in lifelong learning and
 - a knowledge of contemporary issues

Term work in the form of assignments, presentations, papers will be assessed based on the following criteria.

Assignments:

| Sr. No. | Assignment | Marks |
|---------|--|-------|
| 1 | Writing Abstract & Introduction. | 10 |
| 2 | Writing and publishing Papers at start of project, during the project and at the end of project. | 10 |
| 3 | Compilation of result and Conclusion. | 10 |
| 4 | Project Report formatting on MS Word or Latex | 10 |
| 5 | Presentation and Demonstration of working project | 10 |

| | |
|-------|----|
| Total | 50 |
|-------|----|

Skill Component:

| Sr. No. | Skill | Marks |
|---------|--|-------|
| 1 | Innovation and creativity | 10 |
| 2 | Feasibility, Synthesis of alternative solutions, and Execution | 10 |
| 3 | Detailed system description and Consideration of constraints and scope for future modification. | 10 |
| 4 | Professional and ethical responsibility | 10 |
| 5 | Design of experiments, process & system and interpretation and analyses of data to meet desired results. | 10 |
| Total | | 50 |

Total of above two components will be scaled down to 50 as a TW marks.

Final Exam Assessment Criteria:

| Sr. No. | Criteria | Marks |
|---------|----------------|-------|
| 1 | Project Report | 25 |
| 2 | Project | 25 |
| Total | | 50 |

| Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral | | | | | | | | |

Note:-

Minimum 40% marks are needed for passing in internal and semester examinations.

College will assign two mini projects to be performed in during in plant training in industry to achieve hands on practice and skill to be developed under industrial facilities to ensure all the perquisites of higher semester.

1. Internal Marks

Term work

| | |
|----------------------------------|-----------|
| Log Book | 50 Marks |
| In plant training report writing | 50 Marks |
| Total | 100 Marks |

2. Semester Examination

Semester examination includes

| | |
|---------------------------------|-----------|
| Final viva/voce | 50 Marks. |
| In plant Training Industry Viva | 50 Marks |
| Total | 100 Marks |

Rationale:

An In-plant Training is an opportunity offered to students, called interns, to work at a firm for a fixed period of time. In Plant training is part of our curriculum with duration of 24 weeks and 8 hours per day. Interns will prepare a report on the work done during the In-plant training and In-Plant Training Certificate will be awarded by the industry after successful completion of training. During in plant training student get opportunity to implement, test and adopt their learnings on industrial platform. During In-plant training students are offered stipend from concern industry as per university norms.

Scope:

Internship Training provides a real time exposure for the students on the latest and trending technologies in the core companies which enables them employable.

Following are some of the Job Roles in Electronics Industry.

Job role

- System Designer.
- Junior engineer,
- Telecommunication/RF engineer
- Maintenance engineer,
- Technician/supervisor,
- Assembly line engineer,
- Service/support engineer,
- Sales engineer.
- Machine operator,
- Quality control engineer,
- Programmer,

Benefits of an Internship

1. An opportunity to develop your knowledge and skills in a particular field or industry
2. Exploring different roles to see which one you would like to pursue.
3. Getting insight into the way businesses work and what challenges they face on a daily basis
4. The opportunity to create a network of contacts.
5. Gaining valuable work experience to set you apart from other candidates
6. Acquiring university module credits.
7. Applying the concepts and strategies of academic study in a live work environment of industry

Course Outcomes: On successful completion of course, students will be able to perform:

- a. To understand the work culture of the industry.
- b. To understand the Product and its relation with changing needs of the society.
- c. To adapt the work environment without compromising the principles.
- d. To relate the knowledge with its industrial applications.
- e. To improve the skills of the technicians like designing, testing, tracing, debugging, soldering, documenting and many more.

- f. To tackle the challenges successfully.
- g. To inculcate the spirit of social service for being eco-friendly
- h. To develop entrepreneurial spirit among trainee
- i. Electronics technician work, Designing, Assembly and soldering work.

Learning Structure

| | |
|-------------|---|
| Application | Work as engineer, technician in electronics and telecommunication sector. |
| Procedure | Machine operator, standard operating, Circuit designing and fault-finding procedures. |
| Principle | Rules and discipline of particular industry, etiquettes, social and work ethics. |
| Concepts | Work as professional, designing and programming concepts, fault finding, testing. |
| Facts | Profession, roles, discipline, technology, skills. |

List of Industries

Students are being sent to the industries as per their interest and capability.

Below are the names of industries where our students are regularly placed for In-plant training.

1. Tata Institute of Fundamental Research (TIFR)
2. Bhabha Atomic Research Centre (BARC)
3. Aditya Solutions
4. Ashida Electronics Pvt Ltd
5. Dipel Electronics Pvt.Ltd.
6. Electrolab India Pvt. Ltd.
7. Electronics Regional Testing Laboratory (ERTL)
8. Industrial Design Centre, IIT-Bombay
9. NCC Telecom Pvt. Ltd.
10. Core Technologies Pvt. Ltd.
11. Western Regional Instrumentation Centre (WRIC)
12. Larsen & Toubro Ltd.
13. APLAB Ltd.
14. Systems Creator Pvt. Ltd.

15. Quality Logger Pvt. Ltd.
16. Simtek Medico Systems Pvt. Ltd.
17. Radix Electro systems Pvt Ltd
18. Artemis Pvt Ltd
19. GenMeaint Pvt Ltd.
20. Applied Digital Microsystems Pvt Ltd.

Course Name : Diploma in Electronics
Semester : VIII
Subject name : Entrepreneurship and Innovation (Online mode)
Subject Code : DE8002

Teaching and Examination Scheme:

| Teaching scheme | | | | Examination Scheme | | | | |
|-----------------|---------------|----------------|--------|--------------------------------------|---------------------|--------------------------|----------------------------|---------------------|
| Theory Hrs. | Tutorial Hrs. | Practical Hrs. | Credit | Semester Exam Duration (TH/PR) Hours | Internal Marks (TW) | Semester Exam Marks (TH) | Semester Exam Marks (Viva) | Total Marks (TH/PR) |
| 4 | 0 | 0 | 4 | 0 | 50 | 0 | 50 | 100 |

Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, OR-Oral, TW- Term work

Evaluation (Theory)

- Progressive evaluation is to be done by the subject teacher as per the prevailing curriculum implementation and assessment norms.
- It is mandatory to submit assignments given by the teacher. remaining absent in any or fails to complete the prescribed number of assignments will not be declared successful for that head.

Rationale:

This course aims to develop skills for becoming a successful entrepreneur by conceiving an enterprise. Resource generation and risk mitigation are integral part of the course. It involves "building something from nothing" and successful entrepreneurs know how to manage and mitigate uncertainty and risk. The course content is relevant to those individuals thinking about starting a business or who are already in business - large or small, those who are interested in commercializing their own innovations or of others, and those who advise project consultant or engage in policy making in the entrepreneurship area.

The course also aims to create sustainable entrepreneurs by providing required ecosystem.

Course Outcomes: On successful completion course, students will be able to

| CO | CO Statement | % Weight age |
|-----|--|--------------|
| CO1 | Enable the students to learn the various aspects and techniques of creativity for innovation | 25 |
| CO2 | To develop the qualities of entrepreneurs that contributed to their success | 25 |
| CO3 | Evaluate the various sources of raising finance for startup ventures. | 25 |
| CO4 | Engage in a continuing learning process through the interaction with peers in related topics, as individuals and as team members | 25 |

Prerequisite

Entire diploma in electronics curriculum.

Learning Structure:

| | |
|-------------|--|
| Application | Industry, Management, Startup, Grass root innovation |
| Procedure | Negotiation, decision making process and approaches, Effectuation and Causation; |
| Principle | Forms of business organizations; organizational structures promoting entrepreneurship. |
| Concept | Policy Initiatives and focus; role of institutions in promoting entrepreneurship Business model canvas, Business Pitching, |
| Facts | Business, workers, finance, customer, behavioral characteristics/traits, entrepreneurial challenges |

Course Contents:

Rules -

1. Every student shall ordinarily be allowed to keep terms for the given semester (except In Plant Training) in a program of his enrolment for a particular subject, only if she fulfills at least seventy five percent (75%) of the attendance taken as an average of the total number of lectures, practical, tutorials etc. wherein short and/or long excursions/field visits/study tours/intra and intercollege competitions organized/permitted by the college and supervised by the shall be credited to her attendance for the total no of periods which are otherwise delivered on the material

day/s for that subject. In such case, student will not be able to appear for any of the examination and will be marked as a status "NAA" for the subject.

2. Without prejudice to what is stated here-in-above, the Principal shall be the competent authority to condone the absentee of any student further up to additional 10%, and Hon Vice Chancellor further up to additional 15% if deemed fit after verifying the genuineness and gravity of the problem that justifies the student to remain absent, which generally shall be limited to his own sickness, sickness of his parent, death of his parent etc. supported by valid evidence, documentary or otherwise.
3. It is compulsory for the students to attend In-Plant training of 24 weeks in Semester V and Semester VIII. During the training, students can avail public holidays and applicable casual leaves only after obtaining necessary prior permission. Principal shall be the competent authority to condone the absentee to additional 10%, if deemed fit after verifying genuineness and gravity of the problem that justifies the student to remain absent, which generally shall be limited to his own sickness, sickness of his parent, death of his parent etc. supported by valid evidence.
4. Subject may be further divided into Theory (INT/EXT), Practical (INT/EXT) and Termwork (INT). A candidate shall be declared to have passed the examination in a subject if he/she secures not less than 40% each of the heads of passing.
5. A student who PASSES in the Internal Assessment but FAILS in the End Semester Examination (EXT) of the course shall reappear for the End Semester Examination of that course. However, his/her marks of the Internal Assessment shall be carried over and he/she shall be entitled for grade obtained by him/her on passing.
6. If a student fails in TW (INT) or TH(INT) she will not be eligible to appear for the semester TH (EXT) of that particular subject. If a student fails in PR (Internal), then she will not be eligible for the semester PR (EXT) exam. In such case, TH(EXT) /PR(EXT) of the particular subject will be marked as a status "NAP" as applicable.
7. Marks obtained in 7th and 8th Semester will be considered for the award of class /grade in Diploma
8. Promotion Rules
 - a. A student shall be allowed to keep term for Semester II irrespective of grades obtained in each course of Semester I.

- b. A student shall be allowed to keep term for Semester III if she passes each of Semester I and Semester II OR she fails in not more than forty percent of heads of the passing of Semester I and Semester II have taken together and does not have pending NAA status in any of the semester I and semester II subject.
- c. A student shall be allowed to keep term for Semester IV irrespective of grades obtained in each course of Semester III.
- d. A student shall be allowed to keep term for Semester V (In-Plant Training) if she passes in all heads of Semester I, Semester II, Semester III and Semester IV

OR

She has passed in all heads of Semester I and Semester II and fails in not more than forty percent heads of passing Semester III and Semester IV taken together and does not have pending NAA status in any of the previous semester.

- e. A student shall be allowed to keep term for Semester VI upon successful completion of In-Plant Training of 24 weeks in Semester V.
- f. A student shall be allowed to keep term for Semester VII if she passes in all heads of Semester I, Semester II, Semester III, Semester IV, Semester V and Semester VI

OR

She has passed in all heads of Semester I, Semester II, Semester III, Semester IV and Semester V, and have failed in not more than forty percent heads of passing of Semester VI without any pending NAA status in any of the previous semester.

- g. A student shall be allowed to keep term for Semester VIII (Internship) irrespective of grades obtained in each course of Semester VII.

9. Grace Marks

Grace Marks for Passing in each of head of passing (Theory /Practical /Oral /Termwork).

The examinee shall be given the benefit of grace marks only for passing in each head of passing, (Theory/Practical/Oral/Termwork) in External examinations as follows:

| Head of Passing | Grace Marks Upto | Head of Passing | Grace Marks Upto |
|-----------------|------------------|-----------------|------------------|
| Upto- 50 | 2 | 251-300 | 7 |
| 51-100 | 3 | 301-350 | 8 |

| | | | |
|---------|---|-------------|----|
| 101-150 | 4 | 351-400 | 9 |
| 151-200 | 5 | 401 & above | 10 |

Provided that benefit of such gracing marks given in different heads of passing shall not exceed 1% of the aggregate marks in that examination. Provided further that this gracing is concurrent with the rules and guidelines of AICTE.

Provided further that the benefit of gracing of marks under this Ordinance, shall be applicable only if the candidate passes the entire examination of semester.
